# Reshaping your world®

Norton, the world's premium abrasive brand, offers powerful, precise and user friendly solutions enabling our customers to shape and surface-finish all types of materials even in the most complex and challenging applications.

As the technology leader, Norton sits at the forefront of the industry providing highly engineered, high-performance value-adding abrasives.

Norton's continual investment in R&D and close collaboration with customers generates highly performance-optimised innovations.

This strong commitment ensures that exciting new products are continuously introduced which offer substantial customer benefits. Helping to improve process productivity and reshape the world of abrasive solutions.

### UTILISING NEW TECHNOLOGIES

As well as New Product Development, Norton is committed to utilising technology breakthroughs in all its existing products. Both the Norton stock range and made-to-order solutions are continually reviewed to ensure that the product offer remains fresh and conforms to the most recent market trends. This approach ensures that all Norton products benefit from state-of-the-art technology, and that the Norton brand has continued sustainable market growth.

### INNOVATION AT WORK

Norton reinforces its position as market and innovation leader by constantly analysing the market to ensure it continuously fulfils customer needs. Norton looks to acquire and hold extensive knowledge about its customers' business activities and product priorities. This market orientated approach enables Norton to better anticipate customer requests and to have an improved understanding of market developments.

### THE ABRASIVE EXPERTS

Norton's technical expertise ensures not only are the most appropriate products used in all abrasives applications but also they are used in an effective and safe manner, maximising performance. Through this Norton looks to establish valuable working partnerships with its customers of all sizes and stature.

### COMMITTED TO CUSTOMER NEEDS

These working partnerships are reinforced through extensive marketing activities that support its complete and innovative product range. Norton is much more than the world's leading manufacturer of abrasive products, it's a brand that has become and remains number one in the minds of its customers. Norton is committed to the long-term development of abrasives and is part of a company that looks to assist customers in all their abrasive needs.

# ABRASIVE TECHNOLOGICAL EXCELLENCE

NORTON'S RELENTLESS COMMITMENT TO DELIVERING TECHNOLOGICAL EXCELLENCE IS REINFORCED THROUGH ITS "CENTRES OF EXCELLENCE".

Since Norton's first breakthrough, in 1885, research efforts have continued to produce industry leading results. At the start of the 20th Century Norton's first innovation was the invention of Norton's trademark Alundum abrasive grain, an aluminium oxide grain that could be manufactured to meet precise grinding requirements.

Throughout the 20th and early 21st Centuries Norton has increased its research efforts by developing

innovative products made with new grains including, aluminium oxide, zirconium oxide (Norzon), Seeded Gel (SG) and IPA (Vortex).

Today, Norton's relentless commitment to Delivering Technological Excellence is reinforced through its "Centres of Excellence". Positioned across the globe, each centre concentrates on the development of exciting new products and grains for all applications found within one type of abrasives.

**OUR WORLD GRINDING TECHNOLOGY CENTRE IS DEDICATED TO THE ADVANCEMENT OF GRINDING TECHNOLOGY AND ABRASIVE PRODUCT PERFORMANCE.**

## BONDED ABRASIVES

Opened in 1993, the World Grinding Technology Centre in Worcester, Massachusetts, USA, is Norton's premier research centre for Bonded Abrasives products. In 1998, the centre was renamed as the Higgins Grinding Technology Centre, in honour of the late Milton P. Higgins, a member of one of the founding families of Norton.

The centre is dedicated to the advancement of grinding technology and abrasive product performance, using structured R&D that focuses on grinding system solutions, coolant system solutions, and process diagnostics and optimisation. The centre conducts regular training sessions promoting a systems orientated education focusing on new process development, and increasing the awareness of new product technology. The centre enables Norton to set the standard for Bonded Abrasive product performance throughout the worldwide abrasives industry.

## SUPER ABRASIVES

The Norderstedt European Grinding Technology Centre (EGTC), founded in 2001, is located at the Saint-Gobain Abrasives Diamantwerkzeuge production plant in Norderstedt, Germany. Since opening, the EGTC has played a key role in new grinding wheel and process technology development for Super Abrasive and Bonded products.

The centre brings together the expertise of Super Abrasive and Bonded specialists who have a profound understanding of the complex grinding system, with innovative measurement and analysis tools which enables detailed investigation of grinding wheel performance and complex tool-workpiece interactions.

The EGTC conducts short-term customer application projects in close collaboration with the Saint-Gobain Abrasive application engineering team, who have a strong European presence. As well as this, long-term projects targeting more complex tasks are frequently performed by the centre. The centre allows research teams, consisting of end-users, grinding wheel manufacturers and machine manufacturers, to meet in one place. This enables fast, sustainable and economical solutions for all Super Abrasive applications. The EGTC possesses a number of modern CNC grinding and consignment machine tools to deal with the different applications found in a global market.

The attitude at the centre is highlighted by the numerous seminars and training sessions conducted each year, for both Saint-Gobain Abrasives employees and Norton customers from across the globe.

**THE NORDERSTEDT EUROPEAN GRINDING TECHNOLOGY CENTRE (EGTC), BRINGS TOGETHER THE EXPERTISE OF SUPER ABRASIVE & BONDED SPECIALISTS WHO HAVE A PROFOUND UNDERSTANDING OF COMPLEX GRINDING SYSTEMS, WITH INNOVATIVE MEASUREMENT & ANALYSIS TOOLS.**

**THE HIGHLY SOPHISTICATED TEST CENTRE HAS ADVANCED TRAINING FACILITIES.**

## CUTTING-OFF & GRINDING WHEELS

The Saint-Gobain Abrasives Centre of Excellence in Eibergen, Netherlands has outstanding experience in testing Cutting-off and Grinding wheels. The highly sophisticated test centre has advanced training facilities with a range of carefully selected, up-to-date machines enabling tests to be carried out on the most common application materials. It is possible to test all wheels in the Norton range from diameter 76mm to 406mm, analysing cutting performance, grinding performance, and wheel safety.

The test centre also contains a state-of-the-art robot, which, when used by the centre's expertly trained operators, enables highly reliable test figures to be produced in clear test reports. This not only helps Norton sales teams sell products but also supports Research and Development efforts.

Regular training sessions are also conducted for employees and customers which cover both the theoretical and practical aspects of our products and their application. Regular presentations and demonstrations are given by our product and application specialists.

## COATED ABRASIVES

For more than 80 years our manufacturing plant, in Wesseling near Cologne, Germany, has been well-known for the development of Coated Abrasive products. Computerised production processes, high performance product specifications formulations and a long-standing quality management system give the required assurance for the high performance of all Wesseling manufactured products.

This long standing expertise has allowed Norton product and application engineers to have a superb understanding of the technical issues encountered during coated abrasive applications.

The Wesseling Technology Centre, due to be officially opened as a Centre of Excellence in 2007, features a state-of-the-art Automotive Aftermarket training centre including a spray booth that replicates the real life working environment of Body and Paint Shops.

The Technology Centre is also equipped with a high tech back stand grinder, down draft tables and selected hand tools, that allow focused application tests to take place. This gives Norton engineers the fullest and most accurate knowledge of applications using basic products to more high-tech engineered abrasives, such as Norax®.

The forward thinking approach adopted at Wesseling is passed to sales staff through regular training sessions, giving them a greater understanding of our products to pass on to our customers.

## DIAMOND BLADES

Norton's facilities in Bascharage, Luxembourg, host the Norton Diamond products state-of-the-art Centre of Excellence.

Ideally located in the centre of Europe, the facilities are used to offer regular training sessions to both staff and customers.

Visitors to the centre can learn about the best use for the different types of diamond blades, compare the different Norton ranges in the demonstration area, and learn about effective and safe methods of use. Using products and seeing them being used by experts not only helps provide a more memorable experience, but also helps people develop a greater understanding.

The showroom at Bascharage also gives visitors the opportunity to see the whole range of Norton Diamond Blades as well as every type of Clipper machine.

The centre is also a key resource for product development and testing. All new products are subjected to strenuous tests to gather accurate application and performance statistics.

This not only ensures product safety, it also ensures accurate information is gathered meaning products can be sold with confidence by our sales personnel. The test area is of-course equipped with a wide range of up-to-date equipment, to help measure and control product tests.

THE WESSELING CENTRE OF EXCELLENCE FEATURES A STATE-OF-THE-ART AUTOMOTIVE AFTERMARKET TRAINING CENTRE INCLUDING A SPRAY BOOTH THAT REPLICATES THE REAL LIFE WORKING ENVIRONMENT OF BODY AND PAINT SHOPS.

THE BASCHARAGE CENTRE OF EXCELLENCE IS A KEY RESOURCE FOR PRODUCT DEVELOPMENT AND TESTING. ALL NEW PRODUCTS ARE SUBJECTED TO STRENUOUS TESTS TO GATHER ACCURATE APPLICATION AND PERFORMANCE STATISTICS.

## DELIVERING INNOVATIVE EXCELLENCE

CUTTING EDGE INNOVATION MAKES NORTON QUANTUM GRINDING WHEELS LAST 50% TO 100% LONGER – DESIGNED FOR MAXIMUM PERFORMANCE AND COST SAVINGS.

Investing in R&D, stimulating the generation of new ideas, and increasing the speed at which cutting-edge science is turned into market-ready products, are identified as key factors that determine business success and are some of Norton's main business priorities.

Norton also takes an innovative approach to its business operations, and is committed to the continuous improvement processes and services, creating, evaluating and exploiting new ideas to help continuously add value to its customer relations.

Recently a number of product innovations have been introduced. These are clearly highlighted throughout this catalogue.

Norton's innovative abrasive solutions offer outstanding productivity and versatility, and help reinforce its position as the world's leading manufacturer of abrasives.

### NEW ABRASIVE TECHNOLOGY

**VITRIUM<sup>3</sup>**

#### REVOLUTIONARY BOND TECHNOLOGY

Through Saint-Gobain Abrasives' extensive research and development program in grinding wheel technology, comes Vitrium<sup>3</sup> a new generation, patent-pending bond.

This revolutionary bond platform features an exclusive chemistry that delivers an entirely new grain adhesion science, resulting in improved product versatility across a wide range of precision grinding applications.

#### THE ULTIMATE GRINDING EXPERIENCE

By combining three of the very best Norton patented technologies (Norton Quantum, Vortex2 and Vitrium<sup>3</sup>); Norton Quantum X grinding wheels provide maximum performance, increased productivity and reduced process costs.

Norton Quantum X grinding wheels are ideal for the most challenging applications including high material removal, heat sensitive and difficult to grind alloys and thin wall parts which may be sensitive to deformation.

## NEW PRODUCT INNOVATIONS

The perfect formulation of market feedback, our relentless commitment to end user comfort and a new infusion of technology brings this distinctive range of grinding wheels to the forefront.

The impressive cutting action doesn't compromise comfort as it effortlessly bites into metal.

Norton Quantum3's design delivers remarkable power and refined control from start to finish.

So you have smooth cutting performance to remove metal much faster while using fewer wheels for the job.

## INFILTRATED HIGH DENSITY DIAMOND BLADES

Norton's Infiltrated High Density technology (I-HD™) combined with its patented diamond blades laser-welding process is the biggest breakthrough in Diamond Tools this century.

Infiltration achieves high uniform density across each whole segment without applying high pressure (like the standard process). This allows Norton to manufacture very robust segments which wear evenly, remain intact and perform faster at higher cutting speeds.

Norton's optimized process also means increased segment design flexibility resulting in greater diversification of diamond blade shapes to best suit applications and materials being cut.

This revolutionary process provides our customers with:

- A faster tool cutting speed by +30%
- Longer product life by at least +20%
- Advanced safety breakthrough with a 100% warranty against segment loss
- A wider choice of segment design to suit a variety of applications and materials
- Greater user comfort

## NEW PRODUCT CONCEPTS

### VULCAN

#### FOR ALL INDUSTRIAL APPLICATIONS

Norton has a global reputation for its high quality and job focused abrasive products, and the new Vulcan range is no exception. With cutting-off and grinding wheels, flap discs and a range of diamond blades, Vulcan is a multi-solution provider, offering performance, value and convenience in all industrial applications.

#### FOR FOUNDRY APPLICATIONS

The new Norton Foundry X cut-off and grinding wheels have been specifically designed for heavy duty foundry applications and to perform on a range of tough materials.

The bond technology in Foundry X cut-off wheels provide greater heat resistance resulting in longer abrasive life, improves cut-rate and allows a shorter cycle time. The zirconia grains in the grinding wheels provide a high metal removal rate, reduced downtime and longer product life; making them ideal for using with high frequency angle grinders.

#### FOR SURFACE CONDITIONING

Vortex Rapid Prep Belts are the newest extension of the non-woven coated abrasive range for surface conditioning. These abrasive belts are used for blending, finishing and deburring in industries ranging from aerospace to metal fabrication, and MRO operations. They also include proprietary Clean Bond™ resin technology, resulting in a smear-free finish that improves productivity by eliminating rework.

#### PRECISION, SPEED AND POWER

The new long life ZA24Q rail cutting wheel has been specifically designed for use on steel and railway tracks, including subway, tram and train.

The sharp, high performance premium grain and innovative optimised bond technology provides a fast and precise cut. The wheel can be used on any rail cutting machine with a clamping device (electrical and petrol).

#### BELIVE IN PINK

Norton Quantum R928 high performance flap discs, with polycotton cloth backing and pink ceramic grain, provide an improved cut rate and product life compared to both premium zirconium discs and ceramic products in the market, thanks to its high density configuration. R928 also features an additional supersize layer giving this flap disc range cooler cutting properties, reducing heat generation during use for better part quality first and every time. R928 is the ideal flap disc for quick grinding when used at medium pressure on stainless steel or harder metals.

# DELIVERING GOOD, BETTER AND BEST SOLUTIONS

One size fit's all isn't for everyone and at Norton we believe in delivering the right choices that matter to you. Our abrasives are classified as Good, Better and Best performance/price tiers to help you chose the right product for your application, every time.

And clear graphics and communication help to visually differentiate between our Good, Better, and Best product solutions.

## STILL NEED A DIFFERENT CHOICE?

We also have products for the very basic need where the lowest initial price point is priority to get the job done. If you need help to determine the right tier for your specific needs, don't hesitate to contact us or via your local Norton sales representative.

## DELIVERING MADE-TO-ORDER SOLUTIONS

WHATEVER THE INDUSTRIAL SECTOR, NORTON IS DEDICATED TO PROVIDING THE MOST APPROPRIATE AND EFFECTIVE ABRASIVE SOLUTION.

### NORTON IS A UNIQUE SOLUTION PROVIDER

Whatever the industrial sector, Norton is dedicated to providing the most appropriate and effective abrasive solution for any application including cutting, grinding and polishing.

In addition to the thousands of stock products available in Coated, Bonded, Thin Wheels, Diamond Blades and Super Abrasives, Norton offers a large number of made-to-order products designed to meet any technical requirement.

Made-to-order solutions represent a significant amount of the complete Norton product offering.

When complex application environments have to be analysed, when cutting-edge technology is necessary to optimise product performances, our leading brand offers the premium solution.

Many Norton customers benefit from our technical support – facilitating the choice of abrasive and combining insight from both sides to run appropriate tests and improve processes.

Sharing views and experiences, Norton represents your preferred partner to increase productivity and reduce overall cost.

### WHY SELECT NORTON

- Our Centres of Excellence enable product testing under real conditions
- We have highly skilled, knowledgeable and experienced personnel devoted to delivering high performance solutions to fulfil customer needs
- We allocate time and resource to product testing/customer case studies
- We have acquired invaluable experience over our long history
- We establish client partnerships to ensure we are aware of the most up-to-date technology with regard to processes, machines and coolants.

To learn more about Norton made-to-order capabilities, highly effective engineered solutions, cutting edge technologies that can help you optimise performance and reduce costs, please contact your local Customer Service Department.

**HELP CUSTOMERS SELECT THE RIGHT ABRASIVE FROM OUR HUGE PRODUCT OFFERING AND DELIVER HIGHLY ENGINEERED SOLUTIONS THAT NOT ONLY MEET BUT EXCEED VERY SPECIFIC AND TECHNICAL REQUIREMENTS, IN ALL MARKET SEGMENTS.**

## DELIVERING LOGISTICAL EXCELLENCE

In order to confirm Norton's market leading position and support our highly engineered, innovative product solutions, Norton operates a range of ERP and Quality Management systems. This enables continuous improvement of performance at every stage of the logistic chain, through careful effective monitoring of all logistical processes and the subsequent implementation of new technology and best practice procedures.

**NORTON HAS A LOGISTICS TEAM OF 80 SPECIALISED PEOPLE WHO ARE DEDICATED AND FOCUSED ON SATISFYING CUSTOMER REQUIREMENTS.**

Today, Norton has a logistics team of 80 specialised people who are dedicated and focused on satisfying customer requirements. Our planning system, integrated directly with our order processing system, is managed and controlled by a team of forecasting experts who look to maintain and improve our service level (over 97% today).

Reviews are continuously undertaken to improve packaging techniques and new packaging technology is regularly considered, and implemented where appropriate. This ensures customers receive all products in excellent condition.

Norton operates the biggest abrasives distribution centre in Europe with 10 000m<sup>2</sup> used to stock more than 8000 product lines in one location. We have more products at our fingertips than any other abrasives manufacturer in the world. Shipping over 4000 product lines every day and working closely with carefully selected partners, gives us the necessary experience and expertise to provide an unrivalled delivery service to our customers.

TECHNICAL INFORMATION

## A HISTORY OF EXCELLENCE

In the mid 19th Century, a group of ceramists and entrepreneurs in Worcester, Massachusetts, USA, set out with a goal: meet the growing need of the burgeoning U.S. manufacturing industry, which needed an ever increasing supply of grinding wheels to build and maintain machinery.

By 1876 Norton were manufacturing grinding wheels, and had acquired a patent for vitrified wheels. In 1885 the Norton Emery Wheel Co. was founded to manufacture the first grinding wheel that could be precision made and mass-produced.

Through the latter part of the 19th Century Norton expanded its abrasives range and reached customers throughout the U.S. and Canada. In 1909, Norton built its first European plant in Germany. This was followed by plants in France (1920), UK (1930), and Italy (1935). In the 1930's Norton strengthened its position by expanding into Coated Abrasives. In the same decade Norton developed Diamond and CBN based Super Abrasives.

By 1950 Norton had established itself as the leading world-wide abrasives brand. In 1956, Norton entered South America through an acquisition in Brazil, and followed this with plants in India (1968) and Japan (1972). This steady growth, based upon innovation, technology and responsiveness to customers, has continued and Norton now has a presence in 28 countries around the world.

In 1990, Norton was acquired by Saint-Gobain, a world leader in the manufacture of engineered materials. Saint-Gobain, founded in France in 1665, shares Norton's tradition of commitment to its business and customers, of understanding and responding to the needs of the marketplace and of technical innovation. Saint-Gobain's experience has been a strong addition to the Norton brand.

For over 125 years, Norton has provided innovative solutions for the challenges faced by industries. Our dedication to our business and customers ensures we will continue to be the world's number one abrasive manufacturer supplying a complete range of products that continually add value and efficiency to your operation.

**FOR OVER 125 YEARS, NORTON HAS PROVIDED INNOVATIVE SOLUTIONS FOR THE CHALLENGES FACED BY INDUSTRIES. OUR DEDICATION TO OUR BUSINESS AND CUSTOMERS ENSURES WE WILL CONTINUE TO BE THE WORLD'S NUMBER ONE ABRASIVE MANUFACTURER SUPPLYING A COMPLETE RANGE OF PRODUCTS THAT CONTINUALLY ADD VALUE AND EFFICIENCY TO YOUR OPERATION.**

## CREATE GREAT LIVING PLACES AND IMPROVE DAILY LIFE

Saint-Gobain designs, manufactures and distributes materials and solutions which are key ingredients in the wellbeing of each of us and the future of all.

They can be found everywhere in our living places and our daily life: in buildings, transportation, infrastructure and in many industrial applications.

They provide comfort, performance and safety while addressing the challenges of sustainable construction, resource efficiency and climate change.

**SAINT-GOBAIN IS ONE OF THE WORLD'S TOP 100 LEADING INDUSTRIAL CORPORATIONS OPERATING IN 66 COUNTRIES WITH OVER 170,000 EMPLOYEES; IT IS RANKED AMONGST THE TOP 100 GLOBAL INNOVATORS AND HAS OVER 350 YEARS OF INDUSTRIAL HISTORY.**

### SAINT-GOBAIN IS THE LEADER IN MANY MARKETS

#### INNOVATIVE MATERIALS

##### FLAT GLASS

- No. 1 in Europe
- No. 2 worldwide

##### HIGH PERFORMANCE MATERIALS

- No. 1 worldwide

#### BUILDING DISTRIBUTION

- No. 1 building materials distributor in Europe
- Leading player on the plumbing-heating-sanitary market

#### CONSTRUCTION PRODUCTS

##### PIPELINES

- No. 1 worldwide in ductile cast iron pipe

##### GYPSUM

- No. 1 worldwide in plasterboard and plaster

##### INSULATION

- No. 1 worldwide in insulation

##### MORTARS

- No. 1 in Europe for wall facings
- No. 1 worldwide for tile adhesives

##### EXTERIOR PRODUCTS

- No. 2 in the United States for siding products

# DELIVERING A SUSTAINABLE FUTURE

In 2014 Saint-Gobain Abrasives launched its new sustainability plan aligned with our business values and vision. This 5 point plan of operational policies and practices underpins our commitment

to sustainable development as a global leader. We have made significant progress in advancing sustainability with a number of major accomplishments in each area which we have detailed below.

## Our commitment to employees and sustainability

### Our Vision

Be the **global leader** of reference in Abrasives, at the leading edge of **innovation** and **service**. Delivering the most comprehensive **Abrasive Solutions** to our customers.

### Our Values

Comprehensively and strictly apply our Saint-Gobain Principles of Conduct & Action.

#### Conduct

- Professional commitment
- Respect for others
- Integrity
- Loyalty
- Solidarity

#### Action

- Respect for the law
- Caring for the environment
- Worker health and safety
- Employee rights

Pursue an ambitious policy to constantly **improve workplace health & safety**

In our Abrasives plants safety is our number one priority: lost time accidents have reduced five fold in 10 years

All operators individually assessed at least 3 times Per annum through the SMAT program (Senior Management Audit Tool) - >33,000 individual SMAT's conducted globally per annum

c.70,000 hours per annum of training worldwide on Saint-Gobain Safety Standards

Reduction of workplace hardship: exposure to noise, repetitive tasks, safety, ergonomics...

Reduction of exposure to chemicals

Annual world-wide EHS day

## 2. Continuously encourage the **personal development** of our employees

Saint-Gobain named as Top Employer 2015 for third consecutive year

Special focus on diversity, training and career management

Abra+ gives specific exposure of our young talents to senior management

60+ training courses proposed by Saint-Gobain Abrasives University and Saint-Gobain Training

Systematic employee satisfaction surveys

## 3. Be a **responsible & sustainable player** internationally & within our local communities

Founder member of FEPA and oSa, actively promoting the safety of abrasives

Sustainable development policies audited by VERITAS

Sponsors of local communities through initiatives such as social mobility, heating of local schools...

Extensive roll out of international standards ISO 9001, ISO 14001, OHSAS 18001

Internal testing & certification based on the following safety standards:

EN12413: 1999 ( Bonded Abrasives )    EN13236: 2001 ( Super Abrasives )  
EN13743: 2002 ( Coated Abrasives )    EN13236: 2001 ( Diamond Blades )

Saint-Gobain are endorsers of the Caring for Climate statement and the CEO Water Mandate for Water Resource Protection (as part of the UN's Millennium Development Goals)

Third party supplier charters, timber regulations, CSR evaluations and audits, Adhere process, minerals policy...

Saint-Gobain is a member of the United Nations Global Compact

## 4. Minimize the **environmental footprint** of our operations with five priorities

Increase the energy efficiency of our production

Increase the use of recycled raw materials in our plants

Reduce our CO<sub>2</sub> emissions

Optimize our water resources

Strict waste segregation policy

## 5. Continuously **develop eco-valorized products** bringing additional value to our customers

The first abrasives manufacturer to produce FSC® products

Use of natural resins and recycled grains

High performance abrasive products & solutions that help to reduce environmental impact and user exposure:

- low noise
- low vibration
- low dust

# ABRASIVE MARKETS

## METAL FABRICATION

Norton continues to play a key role in the Metal Fabrication market, delivering hi-tech relevant abrasive solutions for all applications in surface preparation and finishing. Decades of acquired expertise combined with innovative technology allows Norton to offer the most appropriate abrasive solutions for the most common applications, including: ship building, food industry, chemical and oil industries and boiler making.

## THE ULTIMATE SOLUTION

An incomparably high performance, high quality product designed specifically for finishing.

**R946**

## GENERAL ENGINEERING

Norton provides technical solutions for applications from surface grinding to sharpening operations on a range of materials from high alloy to stainless steel. In addition Norton offers technical assistance to help provide optimum performance in application precision, quality of finishing and operation productivity. Typical sectors: mechanical, mould industry, tool industry, aerospace subcontractors and medical prosthesis.

Norton Quantum with Vitrium <sup>3</sup>	326	SpeedLok discs	121
Vortex Grinding wheels	329	Metal finishing convolute wheels	257

## THE ULTIMATE SOLUTION

Norton Quantum X grinding wheels are ideal for the most challenging applications including high material removal, heat sensitive and difficult to grind alloys and thin wall parts which may be sensitive to deformation.

## THE ULTIMATE GRINDING EXPERIENCE

## MAINTENANCE & REPAIR OPERATIONS

From the most advanced and critical operation to the simplest task, Norton provides an effective solution. Customers can benefit from the largest stock range of abrasives available anywhere in Europe. On any material Norton can provide you with a range of cost effective solutions for use by hand or machine.

APPLICATION	PRODUCT GROUP	MAIN BENEFITS	PAGE
Sharpening HSS tools	Vitrified bench wheels	Free cutting	355
Light to heavy duty cleaning	Beartex sheets	Conformability to complex surfaces	214
Light deburring	Handy rolls	Long lasting cutting edge	224
Building maintenance	Portable diamond blades	Highly versatile product	442
Cutting pipe	Cut-off wheels	Fast cut	35
Weld & stock removal	Grinding wheels	Fast metal removal	
Blending welds	Flap discs	Versatile and long lasting	94
Deburring	Mounted points	Precise	366, 396
Removing imperfections	Specialities	Wide range of items for accessing intricate areas

## THE ULTIMATE SOLUTION

The Norton Quantum platform of cutting-off, grinding wheels, flap discs and fibre discs offers the ultimate performance, unrivalled product life and highest material removal rates on stainless steels, alloys and carbon steels.

### THE NORTON QUANTUM PLATFORM

## WOODWORKING

Norton has actively developed new solutions with innovative abrasives products in full co-operation with customers over many years. Whatever the machine type is, Norton is in a position to optimise the sanding process. In addition to abrasives dedicated to sophisticated machines, Norton has created a very effective range of tools, easy to use like sponges or sanding block for manual operations. Furthermore, a huge variety of product shapes are available to fit with any particular application that requires specific abrasive types. Typical sectors: carpentry, furniture manufacturer, parquetry (manufacturer and renovation), boat and marine.

APPLICATION	PRODUCT GROUP	MAIN BENEFITS	PAGE
Sanding & finishing of wood	Narrow and wide belts	Long life	271
Sanding contours	Abrasives sanding sponges	Soft and versatile manual finishing	216
Sanding contours	Narrow belts	Very flexible for machine polishing	248
Re-sharpening saw blade	Vitrified wheel	No burn and straight cut	350
Sanding	Portable belts	Long life	236
Hand sanding	Paper sheets	Load resistant	200
Bare wood sanding	Cloth rolls	Excellent finish	222
Varnished surface sanding	No-Fil paper discs	Anti-clogging and longer lasting	171
Edges sanding	Polyester narrow belts	Sharp and long lasting belts	248

## NEW PRODUCTS

COATED ABRASIVES/BEARTEX	PAGE
Norton Ice Discs	181
Multi-Air Discs	174

## THE ULTIMATE SOLUTION

These high performance aluminium oxide belts are ideal for any sanding applications, from rough sanding to finishing operations.

### H231 & H235 NARROW & WIDE BELTS

## FLOOR SANDING

Norton leads the development of abrasive technology in this market through innovations such as Norton Red Heat R955 with SG grain which provides the optimum productivity at the lowest cost.

APPLICATION	PRODUCT GROUP	MAIN BENEFITS	PAGE
Drum sanders	Sheets and rolls	Easy to use, load resistant	277
Belt sanders	Belts	Ideal cost/benefit ratio	274
Edger sanders	Discs	Time-saving	280
Buffer sanders	Screenback Double-sided discs	Anti-clogging for a perfect finish	279

## NEW PRODUCTS

COATED ABRASIVES/BEARTEX	PAGE
Red Heat R955 belts	274

## THE ULTIMATE SOLUTION

These polyester backed belts are extremely strong and ideal for floor sanding. There's no need to look for any other product when sanding hard wood.

### RED HEAT R955 BELTS

## FOUNDRY

Norton holds significant expertise in the foundry applications by conducting thorough analysis of the complete abrasive process to help maximize productivity. The products offered are capable of providing incomparable solutions for the most demanding applications in the industry. Typical sectors: aerospace, automotive and medical prosthesis.

APPLICATION	PRODUCT GROUP	MAIN BENEFITS	PAGE
Deburring	Grinding wheels	High stock removal rate	51
Removing cracks	Resin bond wheel	Fast operation	393
Shaping and deburring	Carbide burrs	Fast cutting	484
Gate removal	Supersize Narrow belts	Cool cut for heat sensitive metal	240
Gate removal	Resin mounted wheels	High stock removal rate	396
Cutting-off	Large Cut-off wheels	Free cutting	385

## NEW PRODUCTS

COATED ABRASIVES	PAGE	BONDED ABRASIVES	PAGE
R996 Viking belts	240	Reinforced organic cut-off wheel	388
Tungsten carbide burrs	484		

## THE ULTIMATE SOLUTION

Norton Foundry X cut-off and grinding wheels have been specifically designed for heavy duty foundry applications and to perform on a range of tough materials.

**FOR FOUNDRY APPLICATIONS**

## RAIL

Rail track is continuously subjected to high stress as a result of the millions of tons of train riding over them each year. Norton makes significant investment in the research and development of all abrasive applications encountered in the rail industry ensuring it continues to offer the most suitable range of abrasive products that focus on providing effective, accurate and safe results. Norton's products for the rail industry are each specifically designed to take into account the hardness of the metal used and the unique shape of rail track.

APPLICATION	PRODUCT GROUP	MAIN BENEFITS	PAGE
Cutting rail	Cut-off wheels	White and straight cuts	65
Deburring rails	Grinding wheels	Weld preparation	40
Grinding rails	Organic cup wheel	Excellent preparation of the rail before welding	393
Finishing welds	Organic straight wheel	Fast operation	393
Deburring Welds	Carbide Burrs	Faster removal than mounted points	484

## NEW PRODUCTS

COATED ABRASIVES	PAGE	BONDED ABRASIVES	PAGE
R996 Viking belts	240	Reinforced organic cut-off wheel	388
Tungsten carbide burrs	484		

## THE ULTIMATE SOLUTION

A comprehensive portfolio of high end rail cutting wheels including the fast cutting A24P-BF41, the long life ZA24T-BF41 and the latest ZA24Q which offers both a fast precise cut and long life.

**PRECISION, SPEED AND POWER**

## TOOL ROOM

The maintenance and repair of cutting tools is common place in almost every manufacturing plant. Norton has a range of highly effective solutions suitable for tool room cutting and sharpening operations.

APPLICATION	PRODUCT GROUP	MAIN BENEFITS	PAGE
Sharpening cemented carbide cutting tools	Diamond wheels	High removal rate could be used wet or dry	399
Cutting drill bits	Non-Reinforced Cut-off wheels	Produce minimal burr and burn	390
Sharpening HSS cutting tools	CBN wheels	Free cutting	399
Sharpening tools	Vitrified cups and dishes	High removal rate and extended product life	301

## THE ULTIMATE SOLUTION

The state-of-the-art Norton B99 bond has been developed for almost all applications, covering the grinding of round tools, saw blades, knives, milling cutters, as well as all OD, flat, and ID applications.

### NORTON B99

## GLASS

Norton offers innovative technological solutions with coated and non-woven abrasives, and supplies a full range of products to cover the various needs for glass converting and finishing operations. Norton has been successful in adapting and evolving its products to match customer's processes in order to meet the most stringent surface quality standards on any type of machine designed for the Glass market. Typical sectors: safety and special glass, building and furniture glass.

APPLICATION	PRODUCT GROUP	MAIN BENEFITS	PAGE
Edge grinding	Narrow belts	High resistant and long life	289
Edge grinding	Cross belts	High quality and resistant	289
Edge finishing	Cork belts	High finishing quality	290
Removal coating after cutting	Beartex wheels	High performance	257

## THE ULTIMATE SOLUTION

Norax belts provide an unparalleled surface finish on all glass applications. The grit X5 is ideal for final finishing of glass edges. Made to order.

[U366 Norax Narrow Belts](#)

## OIL & GAS

Norton has developed a complete range of abrasives specifically designed for the manufacture and repair of upstream, midstream and downstream components, shipbuilding, oil rigs, pipelines, and petrochemical plants. As well as an extensive variety of abrasives for rough and precision grinding, finishing and polishing, Norton offers new innovations, on-site technical support and bespoke solutions for the engineering challenges faced in the industry.

APPLICATION	PRODUCT GROUP	MAIN BENEFITS	PAGE
OD grinding, plungers	Bonded grinding wheels	Excellent part quality and cost reduction	301
ID manual grinding, stabilizer/reamers	Flap discs	Weld preparation & removal	96
Cylindrical grinding rods	Narrow belts for metal	Excellent surface finish	241
Polishing rotors/stators	Non-woven discs	Eliminates process stages, saving time & money	128, 134
Portable off-hand, pipe and weld preparing	Cutting-off and grinding wheels	High stock removal on all materials	48

## NEW PRODUCTS

CUTTING-OFF & GRINDING WHEELS	PAGE	COATED ABRASIVES	PAGE
Oil & Gas	48	Oil & Gas flap discs	96

## THE ULTIMATE SOLUTION

Norton Quantum3 grinding wheels provide the ultimate performance in all demanding applications even on hard alloy steels, providing unrivalled life, highest metal removal rates and the fastest cutting action.

## MERCHANDISING SOLUTIONS

We have a complete set of Norton branded displays to help showcase our products in all environments, plus off the shelf point-of-sale graphics that can also be tailored to customer requirements whether that's for cutting-off and grinding, stock removal, or surface preparation and finishing.

### NORTON DISPLAY KIT

- The complete kit comes with all components needed to create a full display for any product range.
- Kit contains:  
Base x1, pegboards x4, header x1, shelf x1, display bar with 5 pins x1, legs x2, pegs x35
- Accessories can be ordered separately if required.

**NOW LIVE!**

Announcing the launch of our new global website [www.nortonabrasives.com](http://www.nortonabrasives.com), marking a new day in the online world of Norton Abrasives!

The new Norton site delivers a deeper brand experience by giving users detailed access to products, markets, machines and surfaces. It gives more focus on product selection and key sub-brands, with a cleaner layout and dynamic lifestyle photography, and thanks to a more intuitive navigation and responsive design, the new site is easier to navigate on any mobile device.

Going live is only the start of our journey... we will continually enrich the site with fresh content and new features so that your online experience continues to be as good as it can be.

# HOW TO USE THIS CATALOGUE

The Norton product line is segmented into easy-to-use, colour-coded sections. Each of these sections are divided into sub-sections which are categorised by product type, machine type or application.

The first part of each sub-section is designed to help you find the right product – each product is categorised by Good, Better, Best, and is supported by key features and benefits, applications and markets and selection tables.

The second part of each sub-section comprises of product tables – designed to give quick and easy product reference details.

The tables are arranged by product type or application (for Diamond Blades and Cutting Off and Grinding Wheels). The Good, Better, Best concept is repeated to bring clear product comparison. Dimensions, grit, pack quantity and product codes are clearly displayed. In addition, Product Selection charts serve as a quick reference guide to the range. 'Spec Checks' also give helpful information on specific products or range benefits.

Technical and Safety information for each of the core product types is included in a separate section at the back of the catalogue.

## HOW TO ORDER

Please contact your local Customer Service Centre, details can be found on the back page of the catalogue. For countries that are not listed please send your request to our European Headquarters.

When placing an order it helps to have the following information available:

- Your name
- Your account number
- Your order or reference number
- Product article number/s
- Required quantity
- Any special instructions

If you require additional product or technical information then please do not hesitate to contact your local Customer Service or Sales Representative.

For prices and terms of sale please refer to the price list.

### E-PARTNER

We offer two forms of electronic ordering; online ordering through Abrasive Connection or through a full EDI ordering facility. If you are interested in either please contact Customer Service.

## DIFFERENTIATION IN THE RANGE

Norton offers the industry's widest selection of cutting-off and grinding wheels designed to meet every customer's requirement. The range is classified into 3 tiers (Best/ Better/ Good) to help you choose the right product for your specific application.

**BEST +++++  
INNOVATION**

With unparalleled abrasive technology, Norton Quantum 3 and Norton Quantum provides optimum solutions with innovative products dedicated to industrial applications. Norton Quantum 3 wheels deliver an extremely comfortable and efficient grinding solution for all demanding metal fabrication applications. They maintain a consistently high stock removal, even on hard alloy steels, maximizing product throughput without the need for high pressure.

**BEST +++++**

Norton offers premium quality product ranges of aluminium oxide (Omega) abrasive Cutting-off & grinding wheels. These ranges have been developed to meet the demands of the most discerning users. Norton Omega ensures outstanding cutting speed and stock removal rates combined with exceptional long life meaning lower abrasive costs.

**BETTER +++++**

Norton Vulcan and Norzon cutting-off and grinding wheels are extensively used across a range of industries including aerospace, automotive, foundry, fabrication, ship-building and construction. Norton Vulcan and Norzon set an industrial performance standard amongst conventional aluminum oxide grain technologies. They provide optimum performance to price ratio throughout all steel, stainless steel, aluminum and stone applications.

**GOOD +++**

Norton Starline gives above average performance for cutting-off and grinding operations on a wide range of materials, including steel, stainless steel, cast iron and stone.

## ACCU

BEST +++++

INNOVATION

Norton Accu cutting-off & grinding wheels have been developed to give minimal resistance when in use and its free cutting feature absorbs less energy from the battery. It also features a special bond and grain which gives improved user comfort and longer wheel life.

### FEATURES

- Quick, straight cuts with 1,0 thickness
- Cutting, light grinding and polishing with Accu 1-2-3
- Aggressive grain leads to less energy absorption from the battery
- Optimized for cordless grinders
- Optimized for machines of 900W or less

### BENEFITS

- Maximum performance with minimum power
- Enable to work in difficult working areas like work at heights
- Low vibration and comfortable work
- No contamination of stainless steel
- Maximum safety

# NORTON QUANTUM ULTIMATE TECHNOLOGY

Norton Quantum ultra thin cut-off wheels for stainless, alloy and carbon steels provide unrivalled wheel life, highest metal removal rates and fastest cutting action.

### FEATURES

- Premium aggressive NorZon Heavy Duty grain
- Revolutionary Patent Pending Bond Technology

### BENEFITS

- No other wheel lasts longer
- Lowest total abrasive costs
- High metal removal rate
- Fast cutting
- High stability & low vibration
- Less material loss
- Less noise & dust
- Less energy consumption
- Burr-free cutting
- White and clean cutting
- Extreme precision and straight cutting

## NORTON QUANTUM 3

Norton Quantum 3 Grinding Wheels are **MADE TO BITE**

Norton Quantum 3 grinding wheels have been specifically developed by Saint-Gobain Abrasive's R&D team to address the needs of the construction and welding industries for more aggressive, faster and more comfortable grinding wheels. Made from proprietary ceramic grain technology and a newly engineered bond system enabling higher grain retention for longer life and a reduction in grinding temperature Norton Quantum 3 provides three key benefits for the end user:

1. Better operator comfort with reduced hand fatigue from less cutting vibration.
2. Less grinding time, a sharper wheel for high metal removal and reduced pressure from faster cutting action.
3. Less downtime and waste with longer wheel life using fewer wheels.

These benefits are key for weld removal, cleaning, bevelling and general grinding applications on black steel, duplex, high chrome alloys and hard alloys in the maintenance and repair, gas & off-shore, shipbuilding, metal fabrication and steel construction industries where Norton Quantum 3 can help to reduce overall process time and cost.

# OMEGA

BEST +++++

Norton Omega cutting-off and grinding wheels work faster and last longer than standard products, saving you time, money and increasing productivity. Premium, sharp aluminium oxide grain and superior bond system provide exceptional performance in even in the most demanding cutting and grinding applications on metal.

### FEATURES

- Premium, sharp aluminium oxide grain
- Superior bond system
- Iron, sulphur and chlorine free

### BENEFITS

- High material removal rates
- Higher G ratio than standard products
- Faster cutting action
- Longer lasting than standard products
- No contamination transferred to the work piece

## 1-2-3 THE ALL IN ONE SOLUTION

Safe cutting, grinding and polishing with a single product.

### FEATURES

- Cutting, light grinding & polishing with one single product
- Fine grit
- Low vibration
- Three layered strong reinforcement
- Free of iron, sulphur & chlorine

### BENEFITS

- No more lost time due to machine or product changing
- Excellent & uniform finishing result
- Comfortable working
- Operator friendly
- Maximum safety
- No contamination

## BLUE FIRE

The Norton Blue Fire range of cutting-off and grinding wheels offers a choice of high quality metal working tools for all rough applications including: weld removal, surface preparation, metal removal, reshaping and cutting-off rusted and corroded materials. Norton Blue Fire is the choice of the professional and brings quick and comfortable results. The range is packed in small quantity packs that are re-closable.

### FEATURES

- High performance grains
- Newly developed high performance abrasive grain in combination with strong bond system
- Wide range of products

### BENEFITS

- Long life and comfortable working
- 50% + more cuts. Longer life, easier cutting and quicker working with minimum blueing, deburring or reworking
- Products for straight grinders as well as angle grinders in high performance quality level

## OIL &amp; GAS

BETTER ++++

For the highest standards in safety and performance, the Norton Oil & Gas range is the perfect solution, offering high material removal, low vibration and maximum working comfort.

## FEATURES

- High performance durable grain
- Advanced bond system
- Heavy glass fiber reinforcement
- Highest metal removal on high alloys and special steels

## BENEFITS

- Longer product life even in extreme, high pressure applications
- Improved user comfort
- Supreme safety levels for use in the toughest conditions
- Specially selected product range for applications found in the Oil and Gas market

## NORZON QUICK CUT

NorZon Quick Cut cutting and grinding wheels provide optimal performance on stainless steel and all hardened steel alloys. They are also suitable for cast iron applications. NorZon Quick Cut products deliver high value and high performance industrial solutions.

### FEATURES

- Premium combination of zirconia grain and advanced bond system
- Suitable for stainless steel, hardened steel and cast iron applications
- Q-Soft
- R-Medium
- S-Hard
- Free of iron, sulphur & chlorine

### BENEFITS

- Superior performance compared to standard aluminum oxide wheels
- Highest productivity means lowest operating cost
- Easy & comfortable grinding
- Optimised for thick applications
- High stability for easy & comfortable cutting
- Fast material removal
- Optimised for universal applications
- Long product life
- No contamination

## FOUNDRY X

Norton Foundry X grinding wheels have been designed to find the perfect balance between material removal and wheel life. The coarse grit and zirconia grains ensure a high metal removal rate. Foundry X grinding wheels have been designed for High Frequency grinders used in the professional market for rough applications in the toughest environment. Try them out now.

### FEATURES

- Optimized combination of course zirconia and aluminium oxide grains
- Extra reinforcement applied
- Specially developed soft bond system in the Foundry X Comfort
- High Zirconia percentage and hard bond for long life in the Foundry X Long Life

### BENEFITS

- Fit for high frequency grinders, the safest solution in demanding applications
- Maximum user comfort, easy to use and less fatigue
- High material removal, better through put, time saving and cost reduction
- Long life and highly effective, increased productivity

## NORZON FOUNDRY

The Norton Foundry depressed centre wheels feature a blend of aggressive Norzon and versatile aluminium oxide grain that provides a performance advantage on a wide range of ferrous and non-ferrous materials. Norton's advanced resin bond maximizes the cutting ability while maximizing wheel wear. The end result is a wheel that outlasts and outperforms competitive wheels while lowering the costs of cleaning castings.

### FEATURES

- Premium combination of zirconia grain and advanced bond system
- Q-Soft grade
- R-Medium grade
- S-Hard grade

### BENEFITS

- Superior performance compared to standard aluminum oxide wheels
- Highest productivity & lowest cost per cut
- Designed for steel, stainless steel, casts & white, grey & nodular cast iron applications
- For comfortable working
- Fast material removal
- Long wheel life

## MULTI-PURPOSE

**TYPE 41**

### FEATURES

- Cuts all materials
- Ultra thin
- Unique construction
- Low vibration
- Free of iron

### BENEFITS

- No more time loss due to machine or product changing
- Quicker cut with no contamination
- Less noise, dust & material loss
- Extremely precise straight cuts with burr-free results
- Reduced energy consumption
- Counteracts loading & wheelglazing when cutting non-ferrous or plastics

# ALU

Norton Aluminium sets an industrial performance standard amongst conventional aluminum oxide grain technologies. It provides optimum performance to price ratio throughout all aluminum applications.

### FEATURES

- Advanced grain & bond system
- Suitable for aluminium applications
- Unique grain & bond system optimised for non-ferrous

### BENEFITS

- Longer product life & faster material removal
- No more time loss due to machine or product changing
- Counteracts loading & wheelglazing when cutting non-ferrous
- Longer product life & quicker cutting

## RAIL

BETTER ++++

### FEATURES

- Sharp aluminum oxide grain & optimized bond
- Zirconia grain & optimized bond
- Optimized bond and wheel density
- 3 specifications available: soft, medium, hard
- Glass cloth reinforcement

### BENEFITS

- Precise cut
- Fast cutting speed
- White cuts and free cutting
- Optimised for use on steel and railways
- Perfect straight cut without any deviation
- Low vibration on the machine for better user comfort and longer work periods
- Consistent performance for improved quality of cut
- Minimal wheel wear
- Covers all rail machine horsepower and all rail types: subway, tramway, train
- Suitable for use on powerful machines running at 100m/s for 350mm wheels and 80m/s for 300mm wheels
- Maximum safety for the operator

INFORMATION

# INTRODUCTION

The Norton coated abrasive and Beartex product offering encompasses a complete range of belts, discs, rolls, sheets and flap wheels for all your polishing, welding, maintenance and repair operations needs. This extensive product range includes products designed for all types of application, including heavy stock removal, dimensioning, grinding, deburring, cleaning, blending, polishing and finishing operations.

## UNDERSTANDING THE PRODUCT

### COATED ABRASIVES

#### BACKING TYPES

Whether paper, cloth, vulcanised fibre or polyester film, the backing must be smooth enough for uniform adhesive coating, strong enough to withstand grinding pressures and flexible enough to conform to contours if necessary.

#### ABRASIVE BONDS

There are two main types of adhesives in use, one based on animal glue, and the more common based on synthetic heat hardenable resins. The adhesive is applied with a minimum of two bonding applications.

The first, or maker, coat adheres the abrasive grain to the backing ensuring proper anchoring and orientation. After drying, or curing, the second, or sizer, coat is applied. The sizer adhesive, united with the maker bond, provides final grain anchoring and the proper total adhesive level for the finished product.

#### ABRASIVE TYPES

The ideal abrasive grain offers maximum resistance to point wear, yet fractures before serious dulling occurs, thereby satisfying both stock removal and finishing requirements.

#### NATURAL ABRASIVES

Emery is a natural composite of corundum and iron oxide. The particles are blocky in shape and tend to cut slowly, thereby producing a polishing action on the material being abraded. Used for general maintenance and polishing of metals and in very fine grits for highly technical polishing, such as preparing metallurgical specimens requiring very close tolerances. Emery products are black in colour.

## SYNTHETIC ABRASIVES

- Aluminium oxide is tough and well adapted to grinding high tensile materials, such as carbon steel, alloy steels, tough bronze and hard woods. Wherever toughness (ability to resist fracturing) is the main consideration, aluminium oxide out performs all other coated abrasive grains
- Silicon carbide is the hardest and sharpest of the minerals used in coated abrasives. Its hardness and sharpness make it the ideal abrasive for sanding non-ferrous metals (aluminium, brass, bronze, magnesium, titanium, etc.), rubber, glass, plastics, fibrous woods, enamel and other relatively soft materials. Silicon carbide is superior to any other abrasive in its ability to penetrate and cut faster under light pressure
- Zirconia alumina has a unique self-sharpening characteristic which gives it long life on rugged stock removal operations. Zirconia alumina is well suited for heavy grinding of metals and planing of wood, because the controlled fracturing of the grain continuously produces sharp, new abrading points
- Ceramic aluminium oxide is a long-lasting, tough, dense abrasive due to its micro structure. The extremely small micron size particles break off during grinding, producing multiple new cutting edges. As it stays sharp, especially when used in medium and high pressure operations, it cuts at a higher rate than other abrasives. Recommended for use on forged and carbon steels, high nickel and cobalt alloys.

## DIFFERENTIATION IN THE RANGE

Norton offers the industry's widest selection of coated abrasives to meet every customer requirement. The wide range of abrasive types used in the range are classified into 3 tiers by product shape (Best/ Better/ Good) to help you choose the right product for your specific application.

<b>BEST +++++</b> INNOVATION	Using unparalleled abrasive technology, and extremely high performance abrasive grains, Norton provides innovative product solutions dedicated to improving productivity in all industrial applications
<b>BEST +++++</b>	These technologically advanced products meet the demands of the most discerning user giving the highest productivity and the longest product life for the lowest operating costs
<b>BETTER +++++</b>	The core of the Norton Coated Abrasive offering. These products are designed to give superior performance solutions in all abrasive applications, giving high productivity levels and low total abrasive costs
<b>GOOD +++</b>	Standard Norton products that give highly durable solutions with good performance levels

## PRODUCT SELECTION GUIDE

Norton offers a diverse range of products that are suitable for all commonly encountered industrial applications. To enable more effective product selection an overview of appropriate products for the main applications is given in the following pages. Pictograms and colours are used to represent the applications and these are repeated with the product details in the main section.

 FERROUS	 NON-FERROUS	
 HARD WOOD	 SOFT WOOD	 PAINT & VARNISH
 GLASS ARISING		
 STONE		
 SHOE REPAIR

# INTRODUCTION TO BEARTEX NON-WOVEN PRODUCTS

BearTex consists of a backing in “non-woven” nylon fibers evenly impregnated with abrasive granules through the binding action of synthetic resins. This structure forms a “three-dimensional” abrasive material. Since this product was created as a finishing tool for operations where no material need be removed, it is particularly suitable for buffing-up purposes or to reduce the roughness of a surface: BearTex begins to act when other abrasive tools have terminated their work. In all those situations where a buffing, cleaning or finishing operation is required, the BearTex product is decidedly a must.

			9- Ceramic	6- Ultra Fine	
				7- Super Fine	
				8- Micro Fine	

USED WET OR DRY, BEARTEX PRODUCTS OFFER THE FOLLOWING ADVANTAGES:

- A predictably consistent, uniform finish
- Minimum smearing and discolouration of the work-piece as heat is dissipated through the open mesh of the product
- Increased productivity through savings in time
- Ability to automate operations
- Reduced operator training
- Less maintenance required
- Greater safety than other methods
- Conformability to irregular surfaces

These advantages make BearTex products an excellent alternative to bristle brushes, set-up wheels, greaseless compounds, and steel wool. Operators quickly learn the techniques of using BearTex products to produce eye catching finishes.

BEARTEX PRODUCTS CAN BE USED ON A WIDE VARIETY OF SURFACES

- Aluminium
- Chromium
- Tantalum
- Fibreglass
- Brass
- Stainless Steel
- Ceramics
- Wood
- Copper
- Zinc
- Glass
- Plywood
- Nickel
- Titanium
- Plastic

APPLICATIONS INCLUDE

- Deburring
- Blending
- Defuzzing plywood
- Decorative finishes
- Cleaning
- Polishing
- Dulling laminates
- Scrubbing
- Highlighting
- Imparting satin
- Scouring
- Deflashing plastics
- Removing raised wood fibres

## ABRASIVE TYPES

**BEARTEX** products are manufactured utilising either silicon carbide or aluminium oxide abrasive grain. These are the same high quality abrasives used in Norton’s world famous coated abrasive products.

**SILICON CARBIDE** is a hard, sharp, brittle abrasive grain which tends to break down under pressure. Therefore silicon carbide items are sharper, tend to cut faster and produce finer scratch patterns on most surfaces.

**ALUMINIUM OXIDE** is a tough, blocky abrasive which does not tend to break down. Aluminium oxide is more durable than silicon carbide and tends to last longer, produce less discolouration on aluminium, and be more aggressive on certain applications such as hardened steel parts.

### GRIT SIZE

The ‘grit’ refers to the particle size of the abrasive grain that is impregnated into the nylon web during manufacture.

Use of large particles result in a Beartex product that acts more aggressively and produces a coarse surface finish. Small size particles result in a Beartex product that produces fine surface finishes.

### DENSITY

The ‘density’ refers to the number of fibres which have been compressed onto the nylon web material. Most Beartex products are made in a single density designed to meet the requirements of the intended application. However, several wheel items offer two densities to provide a broader range of finishing results.

Under identical conditions, ‘hard’ density wheels cut faster, last longer and produce finer finishes than medium density wheels. ‘medium’ density wheels offer greater conformability and less tendency to load the workface.

### BOND TYPES

Waterproof resins are used throughout the manufacture of Beartex web material to bond the nylon fibres together and to firmly anchor the abrasive grains throughout the web.

# FIBRE DISCS

From rapid weld grinding to blending and finishing, Norton has a complete range of high performance fibre discs available in premium performance Norton SG ceramic aluminium oxide, zirconia alumina, and aluminium oxide abrasives. All fibre discs in the Norton range feature a full resin bond system with heavy duty fibre backing for increased strength, durability and tear resistance.

## APPLICATIONS & MARKETS

## NORTON QUANTUM F996

FERR.  
& NON  
FERR.

### FEATURES

- New SG ceramic abrasives
- Extremely high density of abrasive
- 0,84/0,8mm improved fibre backing
- Supersize with a high % of active fillers

BEST +++++

INNOVATION

### BENEFITS

- Exceptionally high performance
- High material removal even at low pressure
- Generates an excellent surface finish
- Exceptionally long life
- Resists loading & has low heat generation

## GREENLYTE F975

FERR.  
& NON  
FERR.

### FEATURES

- SG ceramic abrasive
- 0,8mm high strength fibre backing

BEST +++++

### BENEFITS

- Fastest cut rate
- Suitable for metal grinding, shaping, blending, edge breaking & weld removal
- Resistant to high pressure
- Cool cut

## NORZON F827

BETTER ++++

### FEATURES

- Norzon abrasive
- 0,8mm fibre backing

*NorZon*

### BENEFITS

- General purpose
- Ideal for grinding, shaping, blending, edge breaking & weld
- High & regular cut rate
- Good for high metal removal in short time
- Excellent price-performance ratio

## F293

GOOD +++

### FEATURES

- Aluminium oxide abrasive
- 0,8mm fibre backing

### BENEFITS

- General purpose
- General metal grinding, shaping & polishing
- Good cut rate
- Weld removal

## F100

### FEATURES

- Tough versatile aluminium oxide abrasive
- 0,8/0,6mm fibre backing
- Grinding additives

### BENEFITS

- Versatile product (ideal for steel and metal alloys)
- Longer product life
- Good performance on steel

MAX RPM	5300	13300	12300	10200	8600

The maximum peripheral operating speed of a fibre disc is 80m/s.  
This is communicated on the box label.

# FLAP DISCS

Norton flap discs are engineered for multiple applications including light stock removal, blending and finishing, meaning they can help reduce processing times and lower costs. Flap discs have a fast cut and provide a better finish than fibre while having the added benefit of a longer life.

## APPLICATIONS & MARKETS

- Stock removal
- Edge chamfering
- Deburring
- Rust/paint removal
- Cleaning & finishing
- Grinding & blending welds

INNOVATION

## NEW NORTON QUANTUM

MAXIMUM PERFORMANCE R928

### FEATURES

- New ceramic grain formulation
- Polycotton cloth
- Heavy abrasive density vs standard ceramic product
- Supersize treatment
- Competitive pricing
- New PINK flaps

### BENEFITS

- High and quick cut rate
- Heavy stock removal
- No Glazing
- Regeneration of grain optimised
- Good resistance
- Comfortable to use, less vibrations
- Thicker product
- Appears a high quality product
- Longer life time
- Boosts cut rate
- Cooling agent
- No burn marks
- Meets market need
- Differentiate vs competition
- Easy to identify on merchandising

## OMEGA HIGH DENSITY R828

**OMEGA**

### FEATURES

- 100% high performance Norton zirconia alumina grain
- Polycotton backing cloth
- Heavy duty configuration

### BENEFITS

- Fast and consistent cut
- Best for heavy duty application
- Long lasting product

## OMEGA R828

BEST +++++

**OMEGA**

### FEATURES

- 100% high performance Norton zirconia alumina abrasive grain
- Specifically engineered heavy cloth optimized for controlled wear characteristics
- Durable innovative bond system

### BENEFITS

- Fast and consistent cut
- Best for mid/heavy duty application
- Increased life time and cut renewal
- Low vibrations

## TWINSTAR QUICK CUT RX22/R822

**TWINSTAR**  
QUICK CUT

### FEATURES

- Premium SG ceramic aluminium oxide & Norton zirconia alumina abrasive blend
- High density disc with extra-large flaps
- Heavy cotton cloth
- Reinforced plastic backing

### BENEFITS

- Aggressive stock removal with less pressure, giving a cooler cut
- Achieves a much longer life due to the high density of flaps

SUPER

## OIL &amp; GAS R828

BETTER ++++

OIL &amp; GAS

## FEATURES

- 100% high performance Norton zirconia grain
- Specially engineered heavy polycotton backing cloth
- Heavy duty configuration

## BENEFITS

- Cut faster
- Longer lifetime
- Ideal for stainless steel medium pressure applications
- Excellent finish
- Ideal for land based and off-shore rig maintenance operations.

## VULCAN R842

VULCAN

## FEATURES

- Self-sharpening zirconium abrasive grain
- New resin bond system
- New thicker cotton backing

## BENEFITS

- Aggressive cutting action
- Faster material removal
- Increased wear resistance than standard discs
- Long product life
- Ideal for all low and medium pressure

## VULCAN R265

VULCAN

## FEATURES

- Durable aluminum oxide abrasive grain
- Heavy cotton cloth
- Double flap disc construction
- Plastic backing

## BENEFITS

- Fast initial cut rate especially on carbon steel

## FLEXI DISCS

**FLEXIFLAP**

### FEATURES

- Premium Norzon grain
- Flexible cloth backing
- Angular flap disc construction
- Available in grit range 40, 60, 80

### BENEFITS

- Remove material quickly & effectively
- Adapt to contours & improved finish
- Increased flexibility in use

## STARLINE R82A/B

**GOOD +++**

**Starline**

### FEATURES

- Blend of quality aluminium oxide and zirconium grain
- Cotton cloth
- Low vibration levels

### BENEFITS

- Fast cutting and optimal material removal rate
- Comfortable working
- Consistent performance for improved part quality
- Ideal for low and medium pressure applications
- Best performance for value

## Q400

### FEATURES

- High concentration of sharp silicon carbide abrasive
- Unique disc pattern

### BENEFITS

- For use on marble, granite, concrete, fibreglass & cast iron
- For heavy duty industrial applications
- Resists loading
- Cooler work area

Semi-flexible discs should be used on an angle grinder with a hard density back-up pad which has the same diameter as the disc. All semi-flexible discs have a maximum operating speed of 80m/s.

# FLAP WHEELS

Flap wheels with internal M14 thread are the ideal tool for use on an angle grinder. Their design makes them ideal for sanding contours and uneven surfaces while delivering a consistent finish with a uniform rate of cut in a wide range of applications, Flap wheels are conformable to intricate shapes and contours.

Very easy to operate:

- No adjustments, dressing, or preparation required before or during operation

Fewer rejected parts:

- More forgiving than other abrasive products
- Reduce the possibility of flattening, gouging and surface deformation

## APPLICATIONS & MARKETS

- Blending, deburring & finishing
- Metal fabrication, welding & polishing

### SPEC CHECK

To prevent unnecessary tool wear do not increase the contact pressure too much, the increase of stock removal should be achieved by using a coarser grit size.

To get a slightly finer surface increase the cutting speed.

To get a slightly rougher finishing increase the contact pressure.

Using same grit size, the finishing is rougher on softer materials.

# BLENDING

Unique compacted structure design offers material removal while imparting a final smear free finish. Ideal for deburring, edge breaking, blending, cleaning and polishing. Durable construction for fast, economical surface preparation. Can be used in sequence with, fibre and flap discs, to de-burr, blend and impart great finishes in one or two operations.

## APPLICATIONS & MARKETS

- Conditioning grindlines
- Blending surface defects
- Deburring and radiusing edges
- Light stock removal

## VORTEX RAPID PREP

### SCM FLAP DISCS

BETTER ++++

**VORTEX**  
RAPID PREP

#### FEATURES

- Layers of Surface Conditioning Material in a variety of grades to suit your application
- Special, three-dimensional non-woven abrasive fabric layers
- High Performance Vortex grain and Clean Bond resin
- Perfect complement to Flap and Fibre discs in the Blending and finishing process

#### BENEFITS

- Quick, durable blending and finishing tool
- Ensures uniform finishing with a consistently low Ra value
- Longer life and durability with smear free cut & finish in 1 action
- Ideal for Cleaning and light de-burring work and the processing of TIG-welded seams on stainless steel

#### SPEC CHECK

Where can a Rapid Blend T27 disc be used?

They can be used in conjunction with flap discs. In some cases, the unitized discs can replace a flap disc. The flap disc leaves scratches on the workpiece. The Rapid Blend disc will remove the coated abrasive scratches, providing a smoother, burr-free finish. They provide a clean bright surface finish on stainless steel.

## VORTEX RAPID PREP

SCM SELF-GRIP<sup>†</sup> WITH REMOVABLE 22mm CENTRE HOLE

### FEATURES

- New resin system & proprietary Vortex grain
- New coating technology
- Combine the cutting speed of coarse grits with the finish of fine grits
- Reduce process time by 50%+
- More resistant to edge wear

### BENEFITS

- Smear free, does not load on aluminium or soft metals
- Thick layer of grain extends product life
- Lowest total cost of consumable tooling per workpiece
- Eliminate 2 to 5 grit sequences to 1 step
- Has up to 4x longer life vs. competitor products

## PRODUCT SELECTION

WHICH GRADE SHOULD I CHOOSE?	
GRADE	FEATURES & BENEFITS
Extra Coarse	Provides longest cutting life & highest aggressiveness to quickly achieve an even surface ready for finer finishing. Ideal for descaling & removing heavy rust & oxides, ideal for deburring, aluminium & excellent performance on hard materials
Coarse	Ideal where a less coarse finish or increased flexibility is required & an aggressive cut is necessary Removes 60-120 grit grindlines - for light deburring
Medium	Removes 120-180 grit grindlines - for cleaning & rust removal
Very Fine	Provides an excellent & uniform finish, ideal choice for fine finishing & pre-coat finishing Removes 180-320 grit grindlines - for finishing, polishing & paint preparation
Super Fine	The finest & most flexible surface conditioning for decorative finishes & excellent surfaces on soft & hard metals, ideal for pre-polishing

## SURFACE BLENDING DISCS FIBRE BACKED

AO SBM

### FEATURES

- Durable fibre construction
- Very sharp abrasive grain
- Rigid, low stretch backing
- Controlled cut & comfortable to use
- Remove and attach quickly (Use with Self-Grip<sup>+</sup> back-up pads)
- Extra coarse grade for de-burring aluminium

### BENEFITS

- Long lasting and cool running
- High, continuous cut rate, resistant to loading and clogging
- Excellent performance on hard materials including steels, nickel, alloys etc.
- Consistent finish
- Ideal for sequential finishing using consecutively finer grades
- Reduced clogging or loading

FB\* = Fibre backed and with 22mm hole (for a stiffer, higher performing disc)

# STRIPPING & CLEANING

Rapid Strip discs are constructed with thick, strong, synthetic fibres and extra-coarse silicon carbide abrasive.

The open web construction of the disc provides fast cutting action with very little loading.

Safer than wire bristle tools, Rapid Strip is suitable for use in many industries.

## APPLICATIONS & MARKETS

- Removal of surface rust & residue, corrosion, light weld splatter, dirt, mill scale & other similar surface contaminants
- Paint & epoxy coating removal
- Surface preparation before applying coatings
- Surface preparation before welding
- Cleaning & conditioning after welding

## BLAZE RAPID STRIP DPC TYPE 27

### FEATURES

- Heavy coating of Norton SG Blaze ceramic alumina long-lasting grain and advanced resin bond
- Open structure

### BENEFITS

- Lasts 2x longer than competitive products
- Does not shed on rust-encrusted pieces, or load on soft metals
- Lighter pressure will finish similar to a medium grit surface conditioning disc; additional pressure will remove material (strip and clean)
- Less downtime, and less production waste/landfill scrap

# MINI FLAP DISCS

For high stock removal, ideal for weld dressing on small and difficult to access areas, with longer life and improved productivity by minimizing downtime.

The Speedlok fastener makes it quick & easy to change discs by locking securely to the back-up pad, so no slipping or release is caused by heat build-up. The 2 button attachment systems (SL3 & SL2) ensure the disc is properly centred and vibration free.

Best performance is achieved at a recommended speed of 30-40m/s. This optimises stock removal, surface finish, thermal load of the workpiece and tool wear.

## APPLICATIONS & MARKETS

- Stock removal, deburring, deflashing, blending and finishing welds in metal fabrication and MRO shops.

# SPEEDLOK DISCS

The tool-free fastening system enables quick disc changes to maximize productivity and minimise downtime.

Ideal for working on small or difficult to access areas like tool and mold construction, automotive, aeronautical & aerospace industry and equipment and pressure vessel construction.

Speedlok fastener makes it quick & easy to change. Disc locks securely to back-up pad, no slipping or release caused by heat. 2 button attachment systems ensuring disc properly centered and vibration free operation.

Optimizing stock removal, surface finish, thermal load of the workpiece and tool wear.

Speedlok discs achieve their best performance at a recommended speed of 15-35m/s.

## APPLICATIONS & MARKETS

- Light to medium pressure grinding, blending & finishing
- For contoured or flat surfaces

## BLAZE R980P

BEST +++++

**BLAZE**

The BEST choice for part cut & finish on stainless steel, inconels, chromium cobalt, titanium and extremely hard materials.

### FEATURES

- Next-generation, Norton SG ceramic alumina grain with self-lubricating, supersize treatment
- 3-ply heavy-duty laminate discs (Y-weight polyester yellow backing)

### BENEFITS

- Provides coolest cut and significantly faster cut rates
- Aggressive disc will help you to remove all defects quickly
- More aggressive; for greatest durability, longest life, and edge-fray resistance on tough applications and stainless steel

# X-TREME R884P

BETTER ++++

The BETTER choice for hard steels, wood and carbon steel.

### FEATURES

- Premium, versatile, self-sharpening zirconia alumina plus grain
- Strong resin bond
- Advanced grain coating
- Semi-open coat
- Durable, Y-wt, 2-ply polyester backing

### BENEFITS

- Provides aggressive cut and longer life than competitive zirconia alumina product
- Improves base adhesion and reduces grain shedding
- Results in longer life and faster cut rate
- Retards loading on soft metals (aluminum, brass, and bronze) and wood, as well as stainless steel and carbon steel
- Stands up to demanding applications: high-pressure and hard-to-grind exotic alloy

### SPEC CHECK

How to mount the disc in the pad?

- SPEEDLOK DISCS TS ATTACHMENT [Type 2 – SL2]  
A turn-on/turn-off style fastener
- SPEEDLOK DISCS TR ATTACHMENT [Type 3 – SL3]  
Twist on & twist off in 2-½ turns

Avoid gouging on contours by using a smaller size holder than the diameter of the discs, such as 38mm holder for 50mm.

Select a hard back-up pad for higher aggressiveness.

MEDIUM BACK-UP PAD

HARD BACK-UP PAD

# BLENDING

Unique compacted structure design offers material removal while imparting a final smear free finish. Ideal for deburring, edge breaking, blending, cleaning and polishing. Durable construction for fast, economical surface preparation. Can be used in sequence with, fibre and flap discs, to de-burr, blend and impart great finishes in one or two operations.

## APPLICATIONS & MARKETS

- Conditioning grindlines
- Blending surface defects
- Deburring and radiusing edges
- Light stock removal

## VORTEX RAPID BLEND OPEN STRUCTURE

**VORTEX**  
RAPID BLEND

This state-of-the-art product is made of a very open web structure of nylon fibers impregnated with patented grain technology and an advanced resin system. With amazing durability it can work on different deburring, blending and finishing applications.

### FEATURES

- Advanced grain technology
- Longer life (5 to 8 times of competitors)
- Blend in 3D
- Open web structure

### BENEFITS

- Controlled cut rate with consistent finish
- Less disc changes and downtime, improved costs
- Face, edge and backside of the disc can be used, operator friendly and no smearing!
- Avoid premature loading - especially good on soft metals e.g. aluminium, brass etc.

## VORTEX RAPID BLEND CLOSED STRUCTURE

High-performance engineered grain provides an aggressive cut and the advanced resin bond system results in the longest wheel life, with up to two times the number of pieces finished per wheel.

### FEATURES

- High-performance engineered grain and improved resin bond system
- Thick nylon web
- New curing process and bond technology
- Excellent form holding

### BENEFITS

- Fast stock removal, reduced cycle time, increased part quality
- Consistent performance, improved part quality, no chemical odour or smearing
- Will not break down under heavy deburring conditions
- Use on a variety of shapes & contours

# RAPID BLEND

NEX

GOOD +++

**Rapid**  
BLEND

Unitized discs are used widely in the preparation of metal surfaces. Excellent for light deburring of flashing & threads, blending alloys, polishing & finishing.

## FEATURES

- Easily preformed
- Holds shape well
- New light density formulation in 2SF and 3SF

## BENEFITS

- Use on a wide variety of contours
- No undercutting or gouging the work piece
- Optimum combination of cut, life & finish with smear resistant properties

## VORTEX RAPID PREP SCM

### FEATURES

- New resin system & proprietary Vortex grain
- New coating technology
- Combine the cutting speed of coarse grits with the finish of fine grits
- Reduce process time by 50%+
- More resistant to edge wear

### BENEFITS

- Smear free, does not load on aluminium or soft metals
- Thick layer of grain extends product life
- Lowest total cost of consumable tooling per workpiece
- Eliminate 2 to 5 grit sequences to 1 step
- Has up to 4x longer life vs. competitor products

# STRIPPING & CLEANING

Rapid Strip discs are constructed with thick, strong, synthetic fibres and extra-coarse silicon carbide abrasive. The open web construction of the disc provides fast cutting action with very little loading. Safer than wire bristle tools, Rapid Strip is suitable for use in many industries.

## APPLICATIONS & MARKETS

- Removal of surface rust & residue, corrosion, light weld splatter, dirt, mill scale & other similar surface contaminants
- Paint & epoxy coating removal
- Surface preparation before applying coatings
- Surface preparation before welding
- Cleaning & conditioning after welding

## BLAZE RAPID STRIP

### FEATURES

- Heavy coating of Norton SG Blaze ceramic alumina long-lasting grain and advanced resin bond
- Extremely versatile; use one disc for multiple operations
- Open structure

### BENEFITS

- Last 2x longer than competitors
- Will not shed on rust-encrusted pieces, or load on soft metals
- Lighter pressure will finish similar to a medium grit surface conditioning disc; additional pressure will remove material (strip and clean)
- Less downtime, and less production waste/landfill scrap

# POLISHING

Polishing is the final stage in the process, to achieve a glossy, high shine finish.

- Use on all metals including stainless steel & aluminium
- Remove fine scratches
- Impart a high quality mirror shine

## RAPID POLISH

GOOD +++

**Rapid**  
POLISH

### FEATURES

- Ideal for use with polishing compounds to give final finish
- 50mm & 75mm diameter size available

### BENEFITS

- Achieves spectacular results on a variety of metals such as stainless steel & aluminium
- Excellent for polishing small areas achieving a good cosmetic finish

	75	07660707384	63642586932	12800	1

#### SPEC CHECK

- Avoid gouging on contours by using a smaller size holder than the diameter of the discs, such as 38mm holder for 50mm.
- Select a hard back-up pad for higher aggressiveness.

## POWER TOOL: STRAIGHT GRINDER OR DRILL

# FLAP WHEELS WITH SPINDLE

Flap wheels are conformable to intricate shapes and contours. Designed to deliver a consistent finish with a uniform rate of cut, flap wheels wear away evenly and without residue, continually exposing fresh abrasives.

Wheels are designed with a 3 or 6mm steel shank as an integral part of each wheel. These shanks run through the wheel creating better balance, a reduction of chatter, and reduced operator fatigue. They also permit quick changes on air tools when using other abrasive products.

Flap wheels with shaft achieve their best performance at a recommended speed of 15-25m/s.

Optimizing stock removal, surface finish, thermal load of the workpiece and toll wear.

## APPLICATIONS & MARKETS

- Blending, deburring and finishing
- Metal fabrication, welding and polishing
- For straight shaft grinders or drilling machines

## SHAPE RECOMMENDATION GUIDE

### STANDARD FLAP WHEEL

Ranging from 15 to 80mm diameter mounted on a 6 diameter steel shaft and for the very small diameters (<=30mm) also available as 3mm shaft as optional. Shaft length of 40mm.

Very durable, long-lasting flap wheels for demanding, heavy stock removal applications.

### SLOTTED FLAP WHEELS

Available in diameters from 30 to 80mm with a 6mm fixing spindle and a shaft length of 40mm.

The additional slots on the flaps improve the flexibility making it much more comfortable to use, reaching difficult-to-access areas and quickly profiles to complex contour of the workpiece.

#### SPEC CHECK

To prevent unnecessary tool wear do not increase the contact pressure too much, the increase of stock removal should be achieved by using a coarser grit size.

To get a slightly finer surface increase the cutting speed.

To get a slightly rougher finishing increase the contact pressure.

Using same grit size, the finishing is rougher on softer materials.

# STANDARD FLAP WHEELS

X-TREME R822

BETTER ++++

**X-TREME**

The BETTER choice for stainless steel and resistant alloys.

**FEATURES**

- Premium, self-sharpening zirconia alumina grain
- Heavy cotton backing

**BENEFITS**

- For aggressive and quick operation
- Ideal for grinding, shaping, blending, edge breaking & weld
- High & regular cut rate

- Flexible cotton backing
- Slotted flaps

### BENEFITS

- For aggressive cut and longer life
- Excellent cut rate on low-pressure finishing operations with ability to leave a very good finish
- Conformable to the workpiece
- Improve the flexibility making flaps much more comfortable to use, reaching difficult-to-access areas

# BEARTEX SPINDLE MOUNTED FLAP WHEELS

## FLAP WHEEL TYPES

### BearTex Non Woven Flap wheels

Mounted on a 6mm diameter spindle, designed to be used on straight line die grinders for removal of oxidation, paint, corrosion and generating grain finishes.

Ideal for finishing large and awkward components.

Can be used for metals, wood, composite and plastics.

Less aggressive than conventional coated abrasive flapwheels.

### BearTex Interleaved Flap Wheels

Interleaved version gives the benefits of aggressiveness by alternatively arranging coated abrasive cloth with the finishing qualities of Non wovens.

They are soft and aggressive, creating a "firmer" wheel that provides a higher rate of cut.

The ratio of Cloth flaps to non woven flaps can be altered to suit particular applications.

Ideal for deburring and grain finishing on stainless steel.

## BEARTEX FLAP WHEELS HEAVY DUTY

BETTER ++++

### FEATURES

- Heavy Duty addition to range
- Flexible and 3 dimensional conformability
- Premium aluminum oxide grain gives a performance boost
- Enhanced Clean Bond resin coverage

### BENEFITS

- Durable blending and finishing wheels with up to x2 more wheel life
- Can access awkward corners and recesses
- Clean, blend, deburr and finish in record time
- Consistent uniform surface finish, no smearing

## BEARTEX FLAP WHEELS

GOOD +++

### FEATURES

- Cushioning action
- Constructed using layers of BearTex with a smear resistant formula
- Available in a wide range of sizes & grades
- Ventilated flap arrangement

### BENEFITS

- Ideal for use on contoured & shaped surfaces
- Consistent & uniform finish with no risk of gouging
- Suitable for a wide range of applications including corrosion removal, cleaning & surface finishing
- Vibration free for a consistent finish without smearing or component discolouration

## BEARTEX TR+ MOUNTED FLAP WHEELS

DIM DxWx ATTACHMENT	GRADE	CAP CODE	PK QTY	BETTER
60x30xTR	Medium A	F2316	10	66261124072

Use with TR+ Holder for quick change capability.  
Also available in interleaf and TR+ in large and small diameter wheels.

**Dimensions Key:** DIM = Dimensions, DIA/D = Diameter, W = Width, S = Spindle

# CARTRIDGE ROLLS

Used on inside surfaces and corners where other abrasive shapes cannot reach and dressing fillet weld seams on metal structures. Typically these are used on high-speed air grinders and are always mounted on a mandrel. Ideal for flash removal, polishing, or removing machine tool marks, and edge breaking.

A compact, lightweight, handheld tool for mandrel-mounted abrasive products that allows for better control than larger die grinders and is a must for any detail work on small parts. Cartridge and Spiral rolls are strips of abrasive cloth rolled and glued to form a solid shape that is designed to break down during use and reveal the next layer of abrasive. Easy to control and to replace due to special mandrel.

Cartridge and Spiral achieve their best performance at a recommended speed of 6-9 m/s. Optimizing stock removal, surface finish, thermal load of the workpiece and tool wear.

## SHAPE RECOMMENDATION GUIDE

### STRAIGHT ZPE

Straight rolls wear to the shape required.

- Effective for flash removal
- Polishing or removing machine tool marks
- Edge breaking
- Valuable abrasive tool for reaching into corners, where larger diameter tools cannot work

All cartridge roll part numbers shown are resin bond, half-glued.

### SPIRAL ZSPI

Spiral rolls are especially suited for use on contoured parts.

Especially useful for grinding/polishing of channels, fillets and radii, and deburring small holes

- Full taper used when the area to finished is hard to reach with a full cartridge roll
- The tapered roll conforms to smaller areas
- Fits into irregular concaves, contours, channels

All spiral roll part numbers shown are full tapered, resin bond, half glued.

#### SPEC CHECK

- Grind using the tip and not the full surface, to prevent adhesive to be damaged from overheat
- Not permitted for wet grinding

**BLAZE** R920

CARTRIDGE AND SPIRAL ROLL

**BEST +++++****BLAZE**

The BEST choice for hard-to-grind materials, stainless steel, cobalt, inconel and titanium.

**FEATURES**

- Next-generation Ceramic Alumina abrasive grain
- Advanced gridding aid
- Improved resin bond system
- Strong X-weight cotton backing

**BENEFITS**

- Provides greatest productivity with significantly faster cut rates and longer life
- For cooler cut and reduces loading and glazing
- For exceptional grain retention and longer life
- For durability and even wear

## X-TREME R422

CARTRIDGE AND SPIRAL ROLL

BETTER ++++

**X-TREME**

The BETTER choice for for tough, difficult-to-grind materials as well as soft, loading materials.

### FEATURES

- Sharp silicon carbide abrasive
- Durable resin bond system

### BENEFITS

- For high initial cut on non-ferrous and soft-loading materials such as titanium, masonry, composites, plastic and rubber
- Ideal solution for titanium and non-ferrous aircraft and engine parts grinding
- For exceptional grain retention and longer life
- For sanding & polishing channels, fillets, recesses, radii, small contours & the bottom of dead-end holes

## BDX R265

CARTRIDGE AND SPIRAL ROLL

GOOD +++

**BDX**

The GOOD choice for difficult-to-grind materials that require an economical option or multi-purpose applications on metals and other materials.

### FEATURES

- Premium aluminum oxide grain
- Advanced full resin bond system

### BENEFITS

- For aggressive cut and longer life
- Great for difficult-to-grind materials (aluminum, carbon steel) and applications requiring an economical option
- Runs cooler and more efficiently; ideal for grinding exotic alloys
- Ensures edge adhesion and longer life

# SPIRABANDS & CONES

Best product for high stock removal and aggression, exceptional tool life even under the most demanding operating conditions. Good choice for blending and polishing curved, contoured and hard-to-reach areas, removing parting lines, imperfections and burrs on all surfaces. The spiral construction avoids shadow marks and provides smooth, chatter-free cutting action. Easy to mount and remove from cylindrical rubber mandrel by turning slightly to the right.

Spirabands & cones achieve their best performance at a recommended speed of 20-30m/s.

Optimizing stock removal, surface finish, thermal load of the workpiece and tool wear.

## APPLICATIONS & MARKETS

- Inside surfaces, edges, contours and corners, dressing fillet weld seams
- Post-processing and repair work on metal structures
- Blending and polishing contours in the construction of equipment and vessels

## BLAZE

SPIRABANDS & CONES

**BLAZE**

The next generation of specialties for metal working applications, with ceramic grain, grinding aid and cotton cloth backing. Cut cooler and last longer on stainless steel, cobalt, inconel, titanium and other hard-to-grind materials.

The maximum performance for lowest overall grinding cost on your most difficult-to-grind materials.

### FEATURES

- Premium Ceramic Alumina abrasive
- Grinding aid
- Strong X-weight cotton backing

### BENEFITS

- Provides longer life vs any other spiraband on Stainless, titanium and super alloys
- Reduces heat, loading and glazing
- Heavy duty application with maximum stock removal

## X-TREME R822 SPIRABANDS & CONES

**BETTER ++++**
**X-TREME**

The BETTER choice for carbon steel and welds.

### FEATURES

- Premium Zirconia alumina abrasive
- Semi-open coat
- Selection of sizes & grades

### BENEFITS

- Delivers aggressive cut rate and longer life on carbon steel and welds
- Prevents loading on aluminum
- Ideal for use on irregular shaped components such as curves, or recesses

# SANDING STARS

Ideal for deburring & finishing difficult to access metal applications, irregular shaped components, holes, radi and grooves as small as 35mm as well as removing sharp edges which may cause manual handling problems on irregular or awkward sized components.

The perfect tool for applications requiring a perfect 360° finish, ideal for irregular surfaces due to high flexibility and conformability. Sanding stars are a multi-layered abrasive tool that are rived together on a 6mm shaft.

Sanding stars achieve their best performance at a recommended speed of 15-25m/s. Optimizing stock removal, surface finish, thermal load of the workpiece and tool wear.

## BLAZE R946 SANDING STARS

**BLAZE**

The next generation of specialties for metal working applications with ceramic grain, grinding aid and J PolyCotton backing. Cut cooler and last longer on stainless steel, cobalt, inconel, titanium and other hard-to-grind materials: maximum performance for lowest overall grinding cost on your most difficult-to-grind materials.

### FEATURES

- Premium Ceramic Alumina abrasive
- Super flexible cloth

### BENEFITS

- Provides longer life vs any sanding star on Stainless, titanium and super alloys
- Reduced heat, loading and glazing on stainless, titanium and super alloys
- Conformable to irregular shaped components and contours
- Heavy duty application

# STRIPPING & CLEANING

## BLAZE RAPID STRIP WHEELS

BEST +++++

### FEATURES

- Heavy coating of Norton SG Blaze ceramic alumina long-lasting grain and advanced resin bond
- Extremely versatile; use one disc for multiple operations
- Open structure

### BENEFITS

- Last 2x longer than competitors
- Will not shed on rust-encrusted pieces, or load on soft metals
- Lighter pressure will finish similar to a medium grit; additional pressure will remove material (strip and clean)
- Less downtime, and less production waste/landfill scrap

# RAPID BLEND UNITISED WHEELS

Unitised wheels are made from compressed and bonded layers of non-woven abrasive. Applications include deburring, cleaning composites, and sharp edge removal.

Unitised wheels produce excellent finishes on nearly all surfaces, although are ideally suited for use on harder materials such as titanium or stainless steel.

## APPLICATIONS & MARKETS

- Surface preparation, cleaning & finishing
- Turbine blades & aerospace maintenance
- Medical instruments
- Cleaning weld lines & moulds
- Tooling industry

## VORTEX RAPID BLEND UNITISED WHEELS CLOSED STRUCTURE

BETTER ++++

### FEATURES

- High-performance engineered grain and improved resin bond system
- Thick nylon web
- Porous
- New curing process and bond technology
- Excellent form holding, preformable
- Up to 2x the number of pieces finished

### BENEFITS

- Aggressive, fast stock removal, reduced cycle times, increased part quality
- 2x longer life and faster finishing – with minimal shedding
- Cool cutting and improved cut rate
- Consistent performance from first contact to stub size, improved part quality
- Will not break down under heavy deburring conditions
- Can be used on a variety of shapes and contours
- Less downtime for changes; maximum productivity

## UNITISED WHEEL NAMING SCHEME

NEX - 8AC	Product Line	Density	Abrasive Type	Grit Size
Name of product line: NEX	NEX	2      Soft	<b>A = Aluminium Oxide</b>	F = Fine
Naming scheme: similar to convolute wheels		3      ↑	S = Silicon Carbide	M = Medium
		4      ↑		<b>C = Coarse</b>
		5      ↑		XC = Extra Coarse
		6      ↑		
		7      ↑		
		8      ↓		
		9      Hard		

### APPLICATIONS

- For all heavy deburring and finishing applications
- Remove grind lines, punched hole burrs and pits or scratches
- Deburring Stainless Steel sinks, tanks and other food equipment
- Thread deburring operations
- Good alternative to spindle-mounted flap wheels and cotton-laminated wheels, which often generate unpleasant odours when grinding.

### SPEC CHECK

- Unitized wheels can be run in either direction.

172 Introduction  
174 Multi-Air Discs

181 Self-Grip<sup>†</sup> &  
Soft-Touch Discs

191 Backup Pads  
194 Self-Adhesive Discs

<sup>†</sup> To help better describe the abrasive fixing system we have changed the name from 'NorGrip' to 'Self-Grip'.

# INTRODUCTION TO THE MULTI-AIR PROCESS

Norton Multi-Air Process combines the excellence of a premium Norton Multi-Air abrasive disc with an innovative dust-extraction Multi-Air back-up pad.

This revolutionary Multi-Air Process gives operators the optimal sanding solution to optimize performance, increase productivity and eliminate dust.

The innovative pad design draws dust into a collection chamber allowing optimal airflow and powerful dust extraction.

Multi-Air addresses multiple markets including those sanding primed and painted parts in the automotive industry, composites, marine gel coat, furniture, non-ferrous metals and many more.

**MULTI-AIR IS PROVEN TECHNOLOGY  
ALREADY ADOPTED BY THOUSANDS  
OF USERS AROUND THE WORLD.**

35% more surface area sanded than conventional system.

30% better dust extraction capacity than conventional system.

## FEATURES

- Insuperable design for maximum dust extraction
- Cutting surface of disc remains clean
- Premium abrasive grain
- Unique Soft-Touch discs

## BENEFITS

- Clogging is virtually eliminated
- Cleaner working environment
- Less dust and contamination
- Consistent cut throughout disc life
- Substantially longer life and faster cut than conventional abrasives

## NORTON MULTI-AIR PROCESS

## DUST EXTRACTION SYSTEM

### EXTRACTION HOLES

- 181 holes maximize dust removal for 150mm
- 125 holes maximize dust removal for 125mm

The overall abrasive area is similar to that of conventional discs with traditional 7, 9 or 15 holes dust extraction.

## MULTI-AIR PLUS A975

BEST +++++

**MULTI-AIR+**

### FEATURES

- Norton SG ceramic abrasive blended with premium heat treated aluminium oxide abrasive
- Unique – blue fibre-reinforced latex paper
- Water based No-Fil
- No pigment in No-Fil or bond
- Improved performance
- Ideal for large surface areas
- Available in grits P80-800

### BENEFITS

- Higher & faster cut rate
- Consistent & uniform scratch pattern
- Combines flexibility with tear resistance
- Resists clogging during use
- No risk of colour transfer
- Extended life
- Less downtime

## MULTI-AIR NORZON H835

**MULTI-AIR**  
WITH NORZON TECHNOLOGY

### FEATURES

- Latest Norzon grain design
- High strength paper backing (E-weight)
- Open grain distribution
- Full resin bond system

### BENEFITS

- Self-sharpening grain
- Improved cut rate, higher productivity
- Extended product life
- Reduces curling & edge chipping
- Tear resistant
- Prevents premature clogging
- Strong & improved grain adhesion

## MULTI-AIR PLUS WITH SOFT-TOUCH TECHNOLOGY A975

### FEATURES

- Norton SG ceramic blended with premium heat-treated aluminium oxide grain
- Blue fibre reinforced latex paper
- Waterbased No-Fil coating
- No pigment in No-Fil or bond system
- Flexible and coloured Self-Grip foam backing
- Multi-Air hole configuration
- Colour coded discs

### BENEFITS

- Faster cut rate
- Improved performance
- Flexible & tear resistant
- Improved load resistance
- No risk of colour transfer
- Allows contour sanding without cutting through
- Maximum dust extraction for a clean work surface and increased life
- Easy product identification

## MULTI-AIR SOFT-TOUCH A275

BETTER ++++

**MULTI-AIR**  
SOFT TOUCH

## FEATURES

- Premium, heat treated aluminium oxide abrasive
- Unique fibre-reinforced latex paper
- Water based No-Fil
- No pigment in No-Fil or bond system
- Flexible foam backing with coloured Self-Grip
- Multi-Air hole configuration
- Colour coded discs
- Available in grits P320-1500

## BENEFITS

- Faster cut rate
- Improved performance
- Flexible & tear resistant
- Improved load resistance
- No risk of colour transfer
- Allows contour sanding without cutting through coating layer
- Maximum dust extraction for a clean work surface & longer life
- For easy recognition of grit size
- Also available in Multi-Air Plus

## MULTI-AIR A275

**MULTI-AIR**

## FEATURES

- Premium, heat-treated aluminium oxide abrasive
- Unique fibre-reinforced latex paper
- Water based No-Fil
- No pigment in No-Fil or bond
- Available in grits P80-800

## BENEFITS

- Faster cut rate
- Flexible & tear resistant
- Improved load resistance
- No risk of colour transfer

## PRODUCT SELECTION

APPLICATION	DENSITY
BACK-UP PADS	
Heavy duty sanding, best for flattening surfaces or dimensioning	Hard
Scuffing, shaping, sanding & finishing	Medium
For use on filler, primer, paint, clear coat, wood, plaster, composites & metal	
Final sanding, to obtain the best finishes	Soft

## KIT MULTI-AIR SANDING BLOCK

	DIM DIAxH(mm)	PK QTY	ART. NO.
 x1 BLOCK	 x3 INTERFACE	 150x18	1 077696024493

Manual sanding block with a set of 3 velcro interchangeable plates (plane, concave and convex) to be used with Multi-Air discs, also Soft-Touch version. With air valve for better aspiration.

**Dimensions Key:** DIM = Dimensions, DIA = Diameter

## SELF-GRIP<sup>†</sup> & SOFT-TOUCH DISCS

Self-Grip<sup>†</sup> discs have a quick release backing that allows quick and easy disc changing, increasing performance by minimising downtime. Soft-Touch discs also include a foam backing that improves product performance and gives an even longer product life. The foam layer absorbs unevenness in the surface, helping to maintain an excellent cutting action providing a very homogenous, high quality finish.

### APPLICATIONS & MARKETS

### NEW NORTON ICE Q255

BEST +++++

INNOVATION

FERR.  
& NON  
FERR.

PAINT/VARN.  
& HARD WOOD

**ice**

#### FEATURES

- Ultra fine grits with color code for friendly use: 1500 - blue, 2000 - fushia, 3000 - green
- Uniformed cut throughout product life span
- Washable and waterproof
- NEW abrasive technology

#### BENEFITS

- Foam backing absorbs water and moulds to the surface for equal pressure distribution
- Smooth finish and lower scratch depth
- Requires less effort during the application
- High quality finish

<sup>†</sup> To help better describe the abrasive fixing system we have changed the name from 'NorGrip' to 'Self-Grip'.

**NEW** PURE ICE FILM DISCS Q175**BEST +++++****PUREice™**

A strong, thin film backing with premium aluminium oxide abrasive and a patented resin technology sands flat, resists loading, lasts long and cuts consistently for a finish that's faster to buff out. A superior no-fil coating means loading is minimised for even longer sanding life.

**FEATURES**

- Patented resin technology
- Consistent, water-based No-Fil stearate application
- Ultra-thin film backing for maximum flexibility
- R&D integral design of film backing and unique resin system
- Colour coded grits

**BENEFITS**

- Excellent grain adhesion for long life and consistent cut
- Resists loading to extend disc life and eliminate pigtails
- Even surface provides a very consistent finish that is easier to buff out
- Can conform to irregular surfaces
- Discs stay flat for a superior surface finish
- Easy identification of grit and application

**MOUNTING**

For better results, use with the Norton Soft interface pad.  
For detailed information see page 193.

**DRY ICE FILM Q260****DRYice™****FEATURES**

- Anti-loading agent
- Consistent finish
- Fast cut
- Smooth film backing
- Long life

**BENEFITS**

- Eliminates pig tails and costly re-work
- Quick and easy to buff out
- Increase productivity
- Consistent finish that buffs out faster
- Less downtime switching discs
- Reduce material and labor costs

## NORTON PRO PLUS A975

**PRO+**

### FEATURES

- Norton SG ceramic abrasive blended with premium heat-treated aluminium oxide abrasive
- Unique blue fibre-reinforced latex paper
- Water based No-Fil, no pigment
- Available in Soft-Touch

### BENEFITS

- Higher & faster cut rate with uniform scratch pattern
- Flexible and tear resistance
- Resists clogging during use and no risk of colour transfer
- Extended life

COATED ABRASIVES & BEARTEX

BONDED ABRASIVES

## BLUE FIRE NORZON H835

**BLUEfire**

### FEATURES

- Latest Norzon grain design
- High strength paper backing (E-weight)
- Open grain distribution
- Full resin bond system
- Available in grits 40-120

### BENEFITS

- Self-sharpening grain
- Improved cut rate
- Extended product life
- Reduces curling & edge chipping
- Tear resistant
- Prevents premature clogging
- Strong grain adhesion

## NORTON PRO A275

BETTER ++++

PRO

## FEATURES

- Premium, heat-treated high performance aluminium oxide abrasive
- Unique fibre-reinforced latex paper
- Water based No-Fil
- No pigment in No-Fil or bond
- Available in Soft-Touch with flexible foam backing & coloured Self-Grip
- Available in Self-Grip grits P80-1500 & Soft-Touch Self-Grip grits P220-1500

## BENEFITS

- Faster cut rate
- Improved performance
- More consistent uniform scratch pattern
- Flexible & tear resistant
- Improved load resistance
- No risk of colour transfer
- Allows contour sanding without cutting through coating layer & easy grit identification

## NEW NORTON PRO FILM Q275

PRO  
FILM

## FEATURES

- Heat-treated aluminium oxide grain
- FEPA 'P' graded abrasive
- Waterbased No-Fil stearate layer on the abrasive
- Flexible film backing
- Self-gripping backing
- Full range of grits available

## BENEFITS

- Fast cut, good material removal and excellent performance
- Approved, high quality discs
- Prevents dust build-up during sanding
- For dry sanding
- Provides a consistent scratch pattern, reduces rework
- Tear resistant
- Quick & easy disc changing, reduce process time
- A product for every application stage

## SPEC CHECK

- Norton Pro Soft-Touch discs are made with a specific soft foam backing with high performance & exceptional long life, directly attached to the abrasive paper
- The foam layer absorbs easily any difference in surface, maintaining an excellent cutting action with a very homogenous, high quality finish

## H231

### FEATURES

- High performance aluminium oxide abrasive
- Semi-open / open coat (depending on grit size)
- Very strong, F-weight paper
- Anti-static properties

### BENEFITS

- Ideal for roughing, intermediate sanding & finishing of solid wood
- Ideal for floor & furniture applications
- Finer grits ideal for polishing metal, plastics & leathers, smoothing fillers, sanding primers, within vehicle repair markets
- Resists clogging
- High performance
- Excellent surface quality

COATED ABRASIVES & BEARTEX

BONDED ABRASIVES

## GOLD RESERVE A296

GOOD +++

**GOLD RESERVE**<sup>+</sup>

### FEATURES

- "P" graded premium aluminium oxide grain
- Strong B weight latex/paper backing
- Water-based, non-loading stearate
- Available in Self-Grip grits P80-P800 & Soft-Touch Self-Grip grits P320-P800

### BENEFITS

- Produces a quick, cool cut
- Produces a more consistent scratch pattern
- Resists tearing
- Conformable and flexible
- Resists loading
- Increases productivity

BEARTEX SELF-GRIP<sup>†</sup> DUST HOLE DISCS

GOOD +++

## FEATURES

- Flexible
- Gentle action
- Non-loading and ideal for finishing solid surface materials
- Resilient construction

## BENEFITS

- Conforms to work surface & provides a uniform finish
- Easily removes burrs without affecting the dimension of the workpiece
- Continual supply of new cutting edges
- Long life, waterproof & solvent resistant

## SPEC CHECK

- Norton has the capability to convert Jumbo rolls into a wide variety of shapes & sizes for your individual application.
- Please contact your local Norton Sales Representative for further information.

## BACK-UP PADS

### FEATURES

- Different densities, available in most popular perforations/dust hole patterns
- New back plate technology
- Attachments for different tools
- Easy-peel technology
- Colour coding of foam layer

### BENEFITS

- Applies to a full range of applications with optimal dust extraction
- Heavy duty design
- Long life
- Adapts to all common orbital sanders
- Longer life of gripping layer
- Easy & quick hardness identification

## BACK-UP PADS

DENSITY	COLOUR	APPLICATION
HARD	BLUE rubber	Heavy duty sanding, best for flattening surfaces or dimensioning
MEDIUM	BLACK rubber	Scuffing, shaping, sanding & finishing. For use on filler, primer, paint, clear coat, wood, plaster, composites & metal
SOFT	ORANGE foam/rubber	Final sanding, to obtain the best finishes

Packed in clear individual display box including: safety recommendations, product information, mounting instructions, versatile attachment system (Festool M8 and standard 5/16) and allen wrench

## SELF-GRIP<sup>+</sup> DUO

Self-Grip<sup>+</sup> Duo

A universal attachment system for both Self-Grip<sup>+</sup> and self-adhesive discs provides the maximum flexibility and optimal finishing results. The Self-Grip<sup>+</sup> DUO combines an innovative design of gripping structures in the shape of flat-top mushrooms which provides a highly uniform finish while allowing both self-adhesive and Self-Grip<sup>+</sup> discs to be used on this unique system.

### FEATURES

- New gripping technology
- Engineered gripping structure
- Excellent resistance to peeling

### BENEFITS

- Uniform surface for better finishing
- Reduced scratching
- No change in backing pad required

Self-Grip<sup>+</sup> standard

† To help better describe the abrasive fixing system we have changed the name from 'NorGrip' to 'Self-Grip'.

#### SPEC CHECK

- Specially designed to give optimal results with very fine grit abrasives, the Norton foam interfaces easily conforms to contours. These are specifically developed for the finishing operation to reduce any risk of scratching
- Self-Grip<sup>†</sup> discs can be used with the Self-Grip<sup>†</sup> hand pad for manual application

<sup>†</sup> To help better describe the abrasive fixing system we have changed the name from 'NorGrip' to 'Self-Grip'.

# SELF-ADHESIVE DISCS

Norton Premium quality self-adhesive discs can be securely fixed onto suitable back-up pads.

## APPLICATIONS & MARKETS

- Preparing primed & painted surfaces
- Stripping primer & paint
- Sanding plastic & fibre-glass

## H231

BETTER ++++

### FEATURES

- High performance aluminium oxide abrasive
- Semi-open / open coat (depending on grit size)
- Very strong, F-weight paper
- Anti-static properties

### BENEFITS

- Ideal for roughing, intermediate sanding & finishing of solid wood
- Ideal for floor & furniture applications
- Finer grits ideal for polishing metal, plastics & leathers, smoothing fillers, sanding primers, within vehicle repair markets
- Resists clogging
- High performance
- Excellent surface quality

## BLACK ICE T401

**BLACK**  
*ice*

### FEATURES

- Premium, ultra fine silicon carbide abrasive
- Advanced resin bond system
- Advanced, A-Weight waterproof paper backing design
- Supplied in rolls of 400 discs

### BENEFITS

- Best finish in wet clear-coat repair applications
- Longer life in wet applications
- Waterproof
- Ultimate flexibility & waterproof performance
- Convenient & easy to store

## MULTI-AIR PLUS A975

BEST +++++

INNOVATION

**MULTI-AIR+**

### FEATURES

- Norton SG Ceramic abrasive blended with premium heat-treated aluminium oxide
- Unique reinforced latex paper
- Water based No-Fil
- No pigment in No-Fil or bond
- Improved performance
- Ideal for large surface area

### BENEFITS

- Higher & faster cut rate
- Consistent & uniform scratch pattern
- Combines flexibility with tear resistance
- Resists clogging during use
- No risk of colour transfer
- Extended life
- Less downtime

## MULTI-AIR NORZON H835

**MULTI-AIR**  
WITH NORZON TECHNOLOGY

### FEATURES

- Latest Norzon grain design
- High strength paper backing (E-weight)
- Open grain distribution
- Full resin bond system

### BENEFITS

- Self-sharpening grain
- Improved cut rate for higher productivity
- Extended product life
- Reduces curling & edge chipping
- Tear resistant
- Prevents premature clogging
- Strong & improved grain adhesion

## NORTON PRO A275

BETTER ++++

**PRO**

### FEATURES

- Premium, heat-treated high performance aluminium oxide abrasive
- Unique fibre-reinforced latex paper
- Water based No-Fil
- No pigment in No-Fil or bond
- Available in grits 80-1000

### BENEFITS

- Faster cut rate
- Improved performance
- More consistent uniform scratch pattern
- Flexible & tear resistant
- Improved load resistance
- No risk of colour transfer

## G131F

GOOD +++

### FEATURES

- Aluminium oxide abrasive
- E-weight paper backing
- Made with FSC mix certified paper backing

### BENEFITS

- Good performance
- Economy product
- Responsibly sourced

### FSC CERTIFICATION

- Utilising responsibly sourced material and preserving natural resources is a high priority so our coated abrasive plants manufacturing paper backed products are now FSC certified.

## H231

BEST +++++

### FEATURES

- Very strong F-weight paper
- High performance aluminium oxide abrasive
- Open grain distribution
- Anti-static properties

### BENEFITS

- Ideal for sanding flat wooden or painted surfaces
- Suitable for metal surface finishing
- Reduces clogging
- Helps minimise dust when used with an appropriate extraction system

## NORTON PRO A275

BETTER ++++

**PRO**

### FEATURES

- Fibre-reinforced latex, B-weight paper
- Premium heat-treated aluminium oxide abrasive blend
- Water based No-Fil anti-loading third layer
- No pigments in No-Fil or bonding system

### BENEFITS

- Tear resistant
- Suitable for use on primer, paint filler & coating sanding (for automotive & transport applications)
- Long lasting, fast cut rate
- Good finish, used wet or dry
- Resists loading & extends life
- No risk of colour transfer

<sup>†</sup> To help better describe the abrasive fixing system we have changed the name from 'NorGrip' to 'Self-Grip'.

## BEARTEX SLIT ROLLS

GOOD +++

### FEATURES

- High quality aluminium oxide or silicon carbide grain
- Uniform web construction
- Can be cut to exact sizes needed
- Flexible for hand and machine use
- Non-loading
- Non-rusting
- Resilient construction

### BENEFITS

- Long product life
- Controlled aggressiveness
- Economical; minimal waste
- Conforms to contours of work surface & provides a uniform finish
- Continual supply of new cutting edges
- No contamination of the workpiece
- Long life
- Waterproof & solvent resistant

# BEARTEX ROTOLO ROLLS PRE-CUT

GOOD +++

### FEATURES

- Thinner web (Thinflex version)
- Ultra flexible
- Advanced web formation

### BENEFITS

- Cuts faster, saves time, with no added effort from the user. Product can be scrunched, rolled and saves shelf space
- Conforms better to contoured surfaces for an ultra consistent scratch pattern. Comfortable to use. Ideal for tight spaces
- Superior grain adhesion, durability and product life

## BEARTEX HAND PADS

GOOD +++

**BearTex**<sup>®</sup>

### FEATURES

- Flexible
- Gentle action
- Non-loading
- Non-rusting
- Resilient construction
- Easy to cut to desired size
- Perforated pads for clean and easy tearing also available

WEBSITE LINK

### BENEFITS

- Conforms to contours of work surface & provides a uniform finish
- Easily removes burrs without affecting the dimension of the workpiece
- Continual supply of new cutting edges
- No contamination of the workpiece
- Long life, waterproof & solvent resistant
- Can be folded to suit hand / shape
- Perforations allow for smooth, shred free split to create 2 smaller easy to use 115mm x 150mm pads

## R222

BEST +++++

### FEATURES

- J-weight cloth backing
- Aluminium oxide abrasive
- Dispenser unit

### BENEFITS

- Ideal for sanding profiled surfaces & round steel parts
- Can be torn into strips
- For general purpose maintenance applications
- Ideal for deburring & derusting metal
- For easy storage
- Protects product
- Eliminates waste

## R202

BETTER ++++

### FEATURES

- Flexible J-weight cotton
- Aluminium oxide abrasive
- Dispenser unit

### BENEFITS

- Flexible & tear resistant
- For easy storage
- Protects product
- Eliminates waste

## F2316

### FEATURES

- Complementary finishing Handy Roll to R222 and R202 range
- Flexible and 3 dimensional conformability
- Premium aluminum oxide grain gives a performance boost
- Enhanced Clean Bond resin coverage
- Dispenser unit

### BENEFITS

- Durable blending and finishing roll
- Can access awkward corners and recesses
- Clean, blend, deburr and finish in record time
- Consistent uniform surface finish, no smearing
- For easy storage
- Protects product
- Eliminates waste

## PRODUCT SELECTION GUIDE

MATERIALS / APPLICATIONS	HIGHLY RECOMMENDED	RECOMMENDED
General purpose (metal, wood, etc.)	R222	R202

### SPEC CHECK

- R222 handy rolls are designed for manual applications. The high flexibility of the cloth in combination with the wide grit range, from coarse to fine, provides an excellent tool for a variety of applications including deburring, rust removal & finishing metal
- Handy rolls are packaged in a protective, convenient dispenser which eliminates costly waste & permits neat, easy storage

# ROTOLO FOAM ROLLS

## NORTON PRO A275

BETTER ++++

PAINT/VARN.  
HARD WOOD  
& SOFT WOOD

**PRO**

### FEATURES

- A275 Norton Pro premium abrasive paper
- Special No-Fil coating
- Flexible foam backing
- Water-resistant
- 25m long roll of pre-cut sheets
- Packed in innovative dispenser box

### BENEFITS

- Excellent for fine sanding with high finishing level
- Reduces clogging
- Ideal for use on round edges, contours & curves without breaking through the paint surface. Easy gripping
- Washable
- Easy to use & economical
- New Easy cut upgraded
- Easy to handle, protected against dust

## GOLD RESERVE A296

GOOD +++

FERR.  
& NON  
FERR.

PAINT/VARN.  
& HARD WOOD

**GOLD RESERVE**

### FEATURES

- "P" graded premium aluminium oxide grain
- Strong B weight latex/paper backing
- Water-based, non-loading stearate

### BENEFITS

- Produces a quick, cool cut
- Produces a more consistent scratch pattern
- Resists tearing
- Conformable and flexible
- Resists loading
- Increases productivity

### SPEC CHECK

- Rotolo Foam pre-cut sheets, conveniently packaged in a roll form, are ideal for fine sanding on round edges, contours & curves, providing an outstanding finish on primers & top coats. The secret of Rotolo Foam lies in the combination of Norton Pro A275 sanding paper & the special foam backing
- To ease product recognition, box labels are colour-coded to a specific grit size. The colour-coding follows the Norton Pro grit colour-coding system

## VIKING R996

### FEATURES

- New generation SG ceramic grain
- New formulation of Supersize layer
- High performance resin system
- YY polyester backing for coarse grits (36-50)
- Available in grits 36, 40, 50, 60, 80

### BENEFITS

- Longer belt life
- High stock removal
- Advanced cooling system
- Less off hand pressure required to cut
- Reduced heat generation
- Maximum performance
- Fast and consistent cut rate
- Cost reduction per part

- Flexible backing
- Highly resistant to clogging & loading
- Various sizes available
- User friendly

**BENEFITS**

- Long lasting
- High, continuous cut rate
- Excellent performance on hard materials (steels, nickel, alloys etc.)
- Controlled cut
- Gives a consistent finish
- Ideal for belt file machines or backstand finishers
- Reduced risk of workpiece damage

# PORTABLE BELTS

Norton offers portable belts in a variety of sizes, designed to fit the most common types of machine. Portable belts are designed for all metal and wood working applications.

All Norton belts are supplied with butt joints for easy mounting and smoother work.

## APPLICATIONS & MARKETS

- Surface grinding & finishing of all metals
- Blending welds
- Sanding & finishing wood
- Floor sanding

## W445

BETTER ++++

NON  
FERR.

GLASS  
ARISING

### FEATURES

- Polyester cloth
- Cork grain

### BENEFITS

- To be used wet or dry
- Ideal for final finishing of glass edges

## R427

GOOD +++

NON  
FERR.

STONE

GLASS  
ARISING

### FEATURES

- X-weight cotton cloth
- Silicon carbide abrasive

### BENEFITS

- Can be used for dry applications only
- Ideal for grinding glass & stone

## R230

NON  
FERR.

HARD WOOD  
& SOFT WOOD

### FEATURES

- Strong cloth backing
- Aluminium oxide abrasive
- Open grain distribution

### BENEFITS

- Multi-purpose product ideal for sanding wood & grinding metal
- Good cutting rate
- Reduced clogging on loading material such as wood & aluminium

## VIKING R996

BEST +++++

INNOVATION

**VIKING**

### FEATURES

- New generation SG ceramic grain
- New formulation of Supersize layer
- High performance resin system
- YY polyester backing for coarse grits (36-50)
- Available in grits 36, 40, 50, 60, 80

### BENEFITS

- Longer belt life
- High stock removal
- Advanced cooling system
- Less off hand pressure required to cut
- Reduced heat generation
- Maximum performance
- Fast and consistent cut rate
- Cost reduction per part

## R976P

### FEATURES

- Backing: strong polyester cloth
- Abrasive: Ceramic Saint Gobain patented Grain
- Bond: high performance phenolic resin
- Third layer: a new high performance formulation of supersize
- Grit availability: 24 to 150
- Shape: Belts, Rolls
- New Bright Pink Color

### BENEFITS

- Higher material removal rate at low and medium pressure in fine grits
- Increased cut rate on Carbon and Stainless Steel material
- Low heat generation reduces risk of burn
- Excellent on various material types; from Stainless Steel to Inconel to Titanium
- Reduce your cost per part

## SG R929

### FEATURES

- Polyester cloth
- Premium SG abrasive
- High content of active filler

### BENEFITS

- Stiff backing for demanding operations
- Excellent cut rate at low & medium pressure
- Cooler cut

## R946

### FEATURES

- Optimised ratio of Hipal – SG ceramic grain
- Hipal technology with unique nano-microstructure & seeded gel technology for consistent grain sharpness
- Supersize layer
- High performance poly-cotton backing

### BENEFITS

- Efficient cut
- Excellent surface finish
- Fast and aggressive cut
- High stock removal
- Reduced process time
- Absorbs heat for a cooler cut and reduced work-piece burn
- Excellent tear resistance and flexibility, conforms to contours

## NORZON R822

### FEATURES

- X-weight cotton cloth
- Norzon abrasive

### BENEFITS

- Stiff backing for backstand grinding
- Long lasting

BETTER ++++

*NorZon*

## BLUE FORCE R872

## FEATURES

- Optimized grain coverage
- Needle shape grain with engineered micro-fracturing properties
- Regeneration of cutting edges
- Y weight polyester backing
- Available in grits P24-P220

## BENEFITS

- Maximize efficiency
- Aggressive cutting action
- Longer belt life
- Higher stock removal
- Open structure to reduce loading
- Availability for every application
- Ideal for use on soft metals

## R426

## FEATURES

- Abrasive: silicon carbide
- Grit availability: P80 to P400
- Polycotton backing
- Shapes available: belts, rolls, jumbos

## BENEFITS

- Consistent cut rate
- Excellent surface finish
- Use for semi-finishing through to finishing applications
- Highly flexible and good tensile strength
- Easy to use flexible cloth backing

## R287 & R309

**GOOD +++**

### FEATURES

- Super flexible cotton cloth backing
- Aluminium Oxide abrasive

### BENEFITS

- Ideal for finishing operations on metal – Fine to Medium surface finish
- Excellent for sanding wood

## R293

### FEATURES

- Heavy polyester cloth
- Premium aluminium oxide
- Contains a small amount of SG abrasive
- Active filler

### BENEFITS

- Good performance
- Improved grain adhesion
- For use on metal & wood edgings
- For extended product life
- Improved life on metal applications

## R265

### FEATURES

- Heavy cotton cloth
- Premium aluminium oxide abrasive

### BENEFITS

- For semi-finishing operations
- Standard general purpose cloth for metal application

# NARROW BELTS FOR WOOD

H231

BEST +++++

## FEATURES

- Very strong, F-weight paper
- High performance aluminium oxide abrasive
- Semi-open/open grain distribution
- Anti-static properties

## BENEFITS

- High performance & easy to mount
- Ideal for roughing, intermediate sanding & finishing
- Finer grits are ideal for polishing metal & plastic
- Resists clogging
- Excellent surface quality
- Less dust generated for an improved working environment

# SURFACE BLENDING BELTS

## NEW RAPIDPREP RF SURFACE BLENDING NARROW BELTS

GOOD +++

### FEATURES

- Durable fibre construction
- Very sharp abrasive grain
- Rigid, low stretch backing
- Highly resistant to clogging & loading
- Various sizes available
- User friendly

### BENEFITS

- Long lasting
- High, continuous cut rate
- Excellent performance on hard materials (steels, nickel, alloys etc.)
- Controlled cut
- Gives a consistent finish
- Ideal for belt file machines or backstand liners
- Reduced risk of workpiece damage

## PRODUCT SELECTION

GRADE	FEATURES & BENEFITS
WHICH GRIT SHOULD I CHOOSE?	
Extra Coarse	Provides longest cutting life & highest aggressiveness to quickly achieve an even surface ready for finer finishing Ideal for descaling & removing heavy rust & oxides, Ideal for deburring, aluminium & excellent performance on hard materials
Coarse	Ideal where a less coarse finish or increased flexibility is required & an aggressive cut is necessary Removes 60-120 grit grindlines - for light deburring
Medium	Removes 120-180 grit grindlines - for cleaning & rust removal
Very Fine	Provides an excellent & uniform finish, ideal choice for fine finishing & pre-coat finishing Removes 180-320 grit grindlines - for finishing, polishing & paint preparation
Super Fine	The finest & most flexible surface conditioning for decorative finishes & excellent surfaces on soft & hard metals, ideal for pre-polishing

## RAPIDPREP BELT RANGE OVERVIEW

TYPE	OPERATION
<p><b>Rapid Prep RPA0-RF:</b> Refining and finishing all metals, where heavy duty combined with flexibility is needed: manual &amp; robotic operations. NARROW and WIDE BELT APPLICATIONS</p>	 <p>NARROW BELT For use on Back stand, bench stand and portable machines</p>
<p><b>Rapid Prep RPA0-XF:</b> Refining and finish all metals where most flexibility is needed: very flexible. FILE BELT APPLICATIONS</p>	 <p>FILE BELT For use on Dynaflex machines and other file belt sanders</p>

# FLANGE MOUNTED FLAP WHEELS

Flange-mounted flap wheels have a continual rate of wear exposing new abrasive grain. Their design makes them ideal for sanding contours and uneven surfaces while delivering a consistent finish with a uniform rate of cut, especially on aluminum and stainless steel parts.

Flap wheels are conformable to intricate shapes and contours. The product structure, abrasive flaps anchored by a resin core at the centre, provides higher flexibility and very smooth surface finish.

Flange mounted flap wheels achieve their best performance at a recommended speed of 38-42m/s. At this speed, abrasive flaps stand up straight due to centrifugal force and only the edges are in contact with the workpiece, optimizing stock removal, surface finish, thermal load of the workpiece and toll wear.

**APPLICATIONS & MARKETS:** Flap wheels are an ideal choice for a wide variety of blending, deburring, finishing applications common in the metal fabrication, welding and polishing industries.

**BDX** R207

FLANGE MOUNTED FLAP WHEELS

**BDX**

The GOOD choice where superior finish is required or on low-pressure applications. Universal product for steel, stainless steel but also for paint removal, plastic or wood.

**FEATURES**

- Premium aluminum oxide grain
- Flexible cotton backing

**BENEFITS**

- For aggressive cut and longer life
- Excellent cut rate with ability to leave a very good finish
- Conformable to the workpiece

Other sizes available upon request.

Alternative Bore Hole sizes upon request - please also see Accessories section for reduction bushings.

### FLANGE MOUNTED MAXIMUM OPERATING SPEED

DIA(mm)	MAX RPM
100	8000
150	5800
165	5500
200	4500
250	3500
300	2800
350	2500
400	2200

**Dimensions Key:** DIM = Dimensions, DIA = Diameter, W = Width, B = Bore

### SPEC CHECK

To prevent unnecessary tool wear do not increase the contact pressure too much, the increase of stock removal should be achieved by using a coarser grit size.

To get a slightly finer surface increase the cutting speed.

To get a slightly rougher finishing increase the contact pressure.

Using same grit size, the finishing is rougher on softer materials.

# BEARTEX FLANGE MOUNTED FLAP WHEELS

Formed by mounting sheets of Beartex around a centre core. The tight packed piece forms the spokes of a wheel. This construction makes flap wheels the most conformable of all Beartex Wheel products... providing a cushioning action which is ideal for use on uneven or irregular surfaces, as well as flat areas.

## APPLICATIONS & MARKETS

- Cleaning threaded parts
- Removing oxide from printed circuit boards
- De-glossing plastic parts
- Producing uniform finishes on aluminium, brass & stainless steel
- Can be used on automatic & robotic equipment

## BEARTEX FLAP WHEEL TYPES

2 types of flap wheel are available:

- 1) 100% non-woven flap wheels (standard for stock)
- 2) Interleaved flap wheels (made-to-order)

Both in variable sizes with widths from 10 to 2000mm.

Available in a wide range of abrasive types, grits and densities for metal and woodworking.

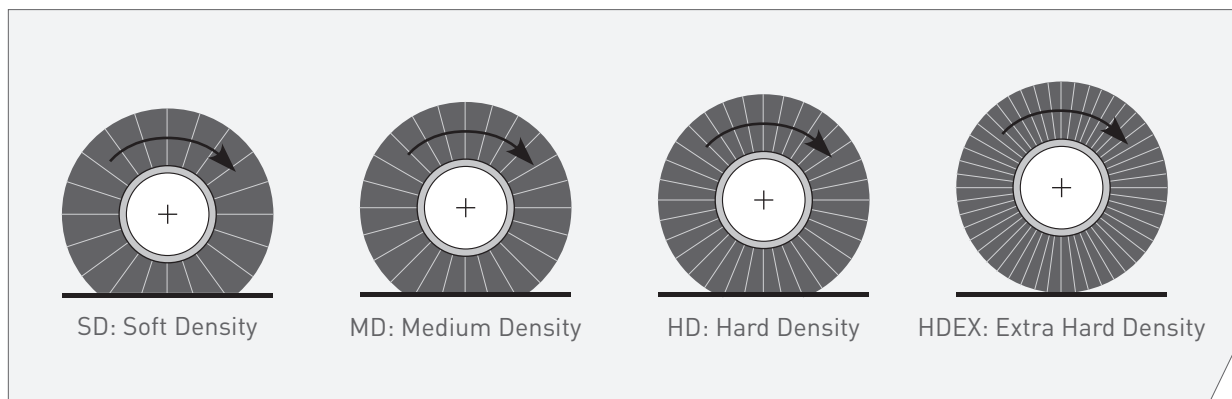

### Interleaved flap wheels

Interleaved version gives the benefits of aggressiveness by alternatively arranging coated abrasive cloth with the finishing qualities of non wovens. They are soft and aggressive, creating a "firmer" wheel that provides a higher rate of cut. The ratio of Cloth flaps to non-woven flaps can be altered to suit particular applications.

Ideal for deburring and grain finishing on stainless steel. Available in both spindle and flange mounted versions. Flange mounted interleaved wheels can be shaped to match the profile, e.g: a wood moulding.

### Densities

The different densities facilitate a versatility ranging from soft cushioning pads to hard cleaning and finishing tools. The density of a wheel can be increased (hardened) by adding more flaps, as shown below:

SD: Soft Density

MD: Medium Density

HD: Hard Density

HDEX: Extra Hard Density

## FLAP WHEELS

GOOD +++

**BearTex**®

### FEATURES

- Cushioning action
- Constructed using layers of BearTex with a smear resistant formula
- Available in a wide range of sizes & grades
- Ventilated flap arrangement

### BENEFITS

- The most conformable of all BearTex wheel products. Ideal for use on contoured surfaces & parts with awkward geometry
- Achieves a consistent & uniform finish with no risk of gouging
- Suitable for a wide range of applications including corrosion removal, cleaning & surface finishing
- Smooth running vibration free product that gives a constant finish without smearing or component discolouration

## VORTEX CONVOLUTE

BETTER ++++

**VORTEX**  
RAPID FINISH

The Most Aggressive, Form-Holding Convolute Wheels.

The breakthrough technology in our proprietary Vortex engineered grain and bond gives these new Vortex convolute wheels up to 2x the cut rate and 5x the life of conventional convolute wheels, making them the first choice for deburring and finishing applications, such as:

- Deburring and finishing automotive gears
- Imparting decorative finishes on plumbing fixtures
- Blending and finishing turbine engine components
- Metal finishing and weld blending at fabrication shops
- Alternative to set-up wheels

### FEATURES

- Unequaled, proprietary Vortex aluminum oxide engineered grain and resin bond system
- Advanced, porous web structure and design

### BENEFITS

- Aggressive, fast-cutting stock removal with exceptional form-holding and uniform finish
- Up to 2x the cut rate and 5x the life of competitive convolute wheels
- Reduced cycle times
- Less truing
- Cooler cutting and improved cut rate
- Minimal wheel wear (“shedding”)

All Vortex convolute wheels are made-to-order.

# RAPID FINISH CONVOLUTE WHEELS

GOOD +++

## RAPID FINISH DCS

Fine finish with light pressure

### FEATURES

- Open mesh construction
- Silicon carbide grain
- Softest convolute wheel

### BENEFITS

- Good for blending, rust removal, applying decorative contrast finishes and low to moderate speed applications
- Not used for deburring

**RAPID FINISH™**

## RAPID FINISH DSS SURFACE FINISHING

Uniform finish with moderate pressure

### FEATURES

- Stronger web compared to clean/finish wheels

### BENEFITS

- More aggressive cutting action & more durability than clean/finish wheels
- Ideal for rust & paint removal, coarse decorative finishes & blending

## RAPID FINISH DMA RED METAL FINISHING

Light deburring, blending & final finishing

### FEATURES

- Strongest resin binders
- Dense, very durable web
- Premium, medium grit aluminium oxide grain
- Uniform grain dispersion & coating

### BENEFITS

- Resilient long life construction
- Can be used for light deburring
- Generates uniform distinct satin & antique finishes
- Cleans & conditions without gouging or changing dimensions of workpiece

## RAPID FINISH LIGHT FINISHING

Light deburring, blending & final finishing

### FEATURES

- Ideal for deburring parts with tight tolerances, without altering geometry
- Improved conformability and resiliency deliver optimum workability to effectively polish intricate profiles in minimal time

### BENEFITS

- Light deburring and finishing of turbine engine and aerospace components
- Finishing applications demanding superior quality and high consistency

## RAPID FINISH SERIES 1000 LONG LIFE

General deburring, blending & finishing

### FEATURES

- Improved smear & heat resistant formula
- Waterproof non-metallic
- Dense web construction (9 density)
- More open web construction (6 density)

### BENEFITS

- Use dry, wet or with oil
- No contamination of workpiece
- Long life & consistent high quality results
- Starting point for deburring, blending, polishing & finishing
- Smear proof & cool cutting on light deburring applications

## RAPID FINISH SERIES 4000

Ideal for heavy deburring applications

### FEATURES

- Improved resin bond system
- High quality synthetic web
- Smear & heat resistant
- Premium abrasive grain
- Waterproof

### BENEFITS

- Free cutting – use both wet & dry
- More consistent finish. Better performance
- Long life for heavy deburring, edge breaking & removing parting lines on exotic metals
- The choice for when edge & form holding are of primary importance

## QUICK PRODUCT SELECTION BY APPLICATION

APPLICATION AREA	SPECIFIC APPLICATION	SPECIFICATION	RECOMMENDED SPEEDS
Cleaning	General purpose cleaning, removing rust oxidation, corrosion, discolouration, flashings, pipe threads, machine parts, plastic moulded parts	DMA or D18 SF	11-32 ms/ 2 200 - 6 000 SFPM
Deburring	Removing medium to heavy burrs – deburring die cast/smoothing radii on metal parts/ blending coated abrasive scratch pattern	D19 SF	28-41 ms/ 5 500 - 8 000 SFPM
Blending	Smoothing parting lines, polishing welds, machine parts	D1 7 SF	28-41 ms/ 5 500 - 8 000 SFPM
Finishing	Satin finish, cosmetic finish, brush finish	D1 7 SF	2-15 ms/ 500 - 3 000 SFPM

## APPLICATION GUIDE

Pressure	<ul style="list-style-type: none"> <li>• Light to medium pressure is recommended for most operations</li> <li>• Avoid excessive pressure which may result in wheel deformation &amp; damage to the work surface</li> </ul>
Feed speed	<ul style="list-style-type: none"> <li>• Feed speeds directly affect the number of pieces completed over a given period of time</li> <li>• Slow feed speed reduces the number of workpieces completed, while producing a shorter scratch pattern</li> <li>• Slow feed speed allows for longer dwell time &amp; permits more work to be done on each piece</li> <li>• Conversely, a fast feed speed increases the number of workpieces completed</li> <li>• While producing a longer scratch pattern</li> </ul>
Oscillation	<ul style="list-style-type: none"> <li>• Oscillation may be used to break up scratch lines</li> <li>• Produce a more uniform finish</li> <li>• Additionally, an increase in cut may be experienced</li> <li>• A general starting point for oscillation is 3/8" amplitude at 200 cycles per minute</li> </ul>
Lubricants	<ul style="list-style-type: none"> <li>• Lubricants, such as water, water soluble oil &amp; straight oil, will decrease the heat generated while running, improve the luster &amp; improve the surface finish</li> <li>• The higher the viscosity of the lubricant, the lower the surface finish (RMS value) produced</li> </ul>

# HIGH STRENGTH DISCS

Made of a strong nylon web impregnated with abrasive grain and resin, BearTex high strength discs are designed for demanding applications on a wide range of substrates. A general purpose product producing light satin finishes.

## APPLICATIONS & MARKETS

- Rust/oxide or coating removal
- Satin finishing of stainless steel cutlery
- Root finishing of titanium turbine blades
- Finishing of stainless steel & aluminium components
- Cleaning moulds & castings

## BEARTEX

**BearTex**®

### FEATURES

- Premium Aluminium Oxide grain combined with strong resin
- Flexible
- Tear resistant
- Can be ganged together to use as a wheel or mop

### BENEFITS

- Long life and clean cutting. Highly smear resistant!
- Follow surface contours
- Can be used for chamfering
- Helps avoid gouging or chunking the workpiece
- Forms a very flexible but durable wheel for bench or straight grinders

# FLAP WHEELS FOR SATINEX MACHINES

These versatile wheels are used on portable machines and are compatible with the most common used systems in the market. Satinex wheels consist of a core of radially bonded strips of abrasive flaps. Their design makes them ideal for fine grinding work on large areas and uneven surfaces while delivering a consistent finish with a uniform rate of cut.

The product structure, abrasive flaps anchored by a resin core at the centre, provides higher flexibility and very smooth surface finish.

Flange mounted flap wheels achieve their best performance at a recommended speed of 15-30m/s. At this speed, abrasive flaps stand up straight due to centrifugal force and only the edges are in contact with the workpiece, optimizing stock removal, surface finish, thermal load of the workpiece and toll wear.

**APPLICATIONS & MARKETS:** Flap wheels are an ideal choice for a wide variety of blending, deburring, finishing applications common in the metal fabrication, welding and polishing industries. Decorative finishing.

## SHAPE RECOMMENDATION GUIDE

### STANDARD FLAP WHEELS

Multipurpose product for use on portable machines where the wheel must fit on an existing 19,1mm arbor.

#### SPEC CHECK

To prevent unnecessary tool wear do not increase the contact pressure too much, the increase of stock removal should be achieved by using a coarser grit size.

To get a slightly finer surface increase the cutting speed.

To get a slightly rougher finishing increase the contact pressure. Using same grit size, the finishing is rougher on softer materials.

## X-TREME R822

BETTER ++++

**X-TREME**

The BETTER choice for stainless steel and resistant alloys.

### FEATURES

- Premium Zirconia alumina abrasive
- Semi-open coat

### BENEFITS

- For aggressive and quick operation
- Ideal for grinding, shaping, blending, edge breaking & weld
- High & regular cut rate
- Retards loading on aluminum
- Ensures perfect linear finish for repair & touch-up jobs

## BDX R207

GOOD +++

**BDX**

The GOOD choice where superior finish is required or on low-pressure applications. Universal product for steel, stainless steel but also for paint removal, plastic or wood.

### FEATURES

- Premium aluminum oxide grain
- Flexible cotton backing

### BENEFITS

- For aggressive cut and longer life
- Excellent cut rate with ability to leave a very good finish
- Conformable to the workpiece
- Ensures perfect linear finish for repair & touch-up jobs

# WHEELS FOR SATINEX MACHINES

BearTex Satinex wheels provide a cushioned abrasive action which not only works well on flat areas, but is also ideal for use in finishing operations on uneven surfaces. These versatile wheels are used on portable machines.

## APPLICATIONS & MARKETS

- Decorative finishing
- Weld blending & Removing paint
- Removing scales oxide & rust
- For use on wood & stainless steel
- In-line brush finishes on stainless steel and aluminium cookware
- Producing fine scratch pattern prior to cotton buffing/compound polishing

## BEARTEX

### FEATURES

- Key way fitting
- Used on portable, variable speed machines
- Wide range of different grades
- Advanced flap wheel construction

### BENEFITS

- High compatibility with most common systems in the market
- High mobility & flexibility
- From rust removal to a satin finish
- Ensures perfect linear finish for repair & touch-up jobs

# ROLLS FOR FLOOR SANDING

BETTER ++++

S413

**FEATURES**

- Very strong combination backing
- Sharp silicon carbide abrasive
- Very open grain distribution

**BENEFITS**

- High tear resistance
- Very high cutting action for rough floor sanding applications
- Long life
- Aggressive cut & clog resistant

S422

**FEATURES**

- Very strong combination backing
- Sharp silicon carbide abrasive

**BENEFITS**

- High tear resistance
- Very high cutting action on hard wood

NORZON R817

*NorZon*

**FEATURES**

- Heavy polyester cloth
- 100% Norzon abrasive
- Open grain distribution

**BENEFITS**

- High tear resistance
- Long lasting cutting edges of Norzon brings long life in floor sanding applications
- Reduces clogging

H425

**FEATURES**

- Strong E-weight paper
- Silicon carbide abrasive

**BENEFITS**

- Ideal for floor sanding
- Good tear resistance
- High cut rate

# SCREENBACK DISCS FOR WALL & CEILING SANDING

## SCREENBACK Q43N

**GOOD +++**

PAINT/VARN, PLASTER & FILLER, HARD WOOD & SOFT WOOD

### FEATURES

- Open-mesh structure
- Open self-gripping backing
- Inter-woven polyester knit backing
- Silicon carbide abrasive
- Waterproof

### BENEFITS

- Anti-clogging
- Longer life time
- To be used on machine with dust extractor for less dust when sanding
- High resistance
- More aggressive cut
- For wet and dry applications

## H425

### FEATURES

- Silicon carbide abrasive
- Strong E-weight paper

### BENEFITS

- High cut rate
- For dry applications only
- Ideal for use on stone surfaces

BETTER ++++

## H231

### FEATURES

- High performance aluminium oxide abrasive
- Semi-open / open coat (depending on grit size)
- Very strong, F-weight paper
- Anti-static properties

### BENEFITS

- Ideal for roughing, intermediate sanding & finishing of solid wood
- Ideal for floor & furniture applications
- Finer grits ideal for polishing metal, plastics & leathers, smoothing fillers, sanding primers, within vehicle repair markets
- Resists clogging
- High performance
- Excellent surface quality

### SPEC CHECK

- Designed to produce consistent performance & assure you a mirror gloss shine.

## PRODUCT SELECTION

Black Super Strip		A thick pad that is aggressive, durable, & consistent, for wet stripping applications
Green Super Scrub		A heavy duty wet scrubbing pad that will remove the toughest scuff marks in heavily soiled traffic areas
Blue Super Clean		For general duty scrubbing or heavy spray cleaning jobs
Beige		For buffing & polishing, good for light traffic areas
Red Buffer		Generally used where a high gloss finish is desired when dry or spray buffing. It can also be used for light cleaning applications
White Super Gloss		A non-abrasive polishing/buffing pad, used dry or with a fine mist to yield a mirror gloss shine

# INTRODUCTION

From standard aluminum oxide bench wheels to premium ceramic abrasive surface grinding wheels, Norton offers high performance abrasive solutions that can maximise productivity in virtually all industrial applications.

The extensive product range is designed to meet all your precision grinding and roughing application needs, with all the most appropriate abrasive specifications, including grinding wheels, segments, mounted points, dressing sticks and sharpening stones.

Norton, the industry's most comprehensive Bonded abrasive product line.

## UNDERSTANDING THE PRODUCT

## ABRASIVE TYPES

### CERAMIC ALUMINIUM OXIDE

Norton SG, Norton Quantum are patented ceramic forms of aluminium oxide that are harder and sharper than conventional abrasive grains. The ceramic grain has a unique microcrystalline structure and when used in a grinding operation this microstructure becomes self-sharpening. This leads to a reduction in the need for wheel dressing and a considerably cooler cutting action.

### ALUMINIUM OXIDE

Generally recommended for grinding materials of high tensile strength, such as stainless steel and tool steels, but it can also be used on some high tensile aluminium and bronze alloys. It is manufactured in varying qualities.

### SILICON CARBIDE

Harder than aluminium oxide with a very sharp abrasive grain shape. It is recommended for grinding relatively soft materials such as aluminium or cast iron as well as grinding extremely hard materials such as cemented carbide.

### ZIRCONIA ALUMINA

For use in rough grinding applications where high stock removal is required. Associated with high tech resin bonds.

## GRIT SIZE

The number in the grinding wheel, marking designating grit size, represents the approximate number of openings per linear inch in the final screen size used to size the grain. The following rules should be followed:

### USE COARSE GRIT

- For soft, ductile, stringy materials such as soft steel or aluminium
- For rapid stock removal
- Where finish is not important
- For large areas of contact.

### USE FINE GRIT

- For hard, brittle materials such as hard tool steels, cemented carbides & glass
- For fine finishes
- For small areas of contact
- For holding small corner radii.

## WHEEL GRADE

The grade indicates the relative holding power of the bond, which holds abrasive grains in a wheel. This is represented in the specification by letters running through the alphabet from softest to hardest. The following rules should be followed with regard to grade:

### USE SOFT GRADE

- For hard materials such as hard tool steels & carbides
- For large areas of contact
- For rapid stock removal.

### USE HARD GRADE

- For soft materials
- For small or narrow areas on contact
- For longer wheel life.

## BOND TYPES-VITRIFIED

Vitrified bonds are the most common precision grinding bond. Porosity and strength of the wheels made with this bond give high stock removal along with their rigidity helping to attain high precision. Not affected by water, acid, oils or ordinary temperature variations. The most common vitrified bonds are:

**VS3 / VS3P**

**NEW VITRIUM<sup>3</sup> REVOLUTIONARY BOND TECHNOLOGY**

**VITRIUM** 

The Vitrium<sup>3</sup> bond platform features an exclusive chemistry that delivers an entirely new grain adhesion science, resulting in improved product versatility across a wide range of precision grinding applications. Provides cool cutting, precise profile, high speed, versatile across all precision grinding applications.

**VS**

VS is a versatile, low temperature, vitrified bond system used in most precision applications.

**VX / VXP**

Equivalent to VS bond, for ceramic only.

**VQN / VQNP**

These bonds are associated with Norton Quantum technology - a versatile technology for low, medium and high force applications.

## BOND TYPES-ORGANIC

These bonds are used in two types of wheels. Firstly, wheels used on portable or fixed machines for the rapid removal of metal. Secondly, cutting-off wheels either un-reinforced or reinforced, for use on portable or fixed machines. The most common organic bonds are:

### SNAGGING WHEELS & CUPS

B & B3	Foundry wheels: multi-purpose bond that gives satisfactory results on most applications
B28	Foundry wheels: high level bond suitable for most technical applications requiring high powered machines

### CUTTING-OFF WHEELS

BFX	<b>NEW</b> Foundry X bond technology designed to increase cut rate and wheel life in all cut-off applications on a wide range of tough materials
BF1	Specific bond ensuring the best quality of cut in dry or wet conditions
BF3	New generation bond assuring the best wheel life in dry cutting operations; versatile & long wheel life. Ideal for heavy duty operations
B24	New generation bond used on silicon carbide cut-off wheels that gives the best performance & the ultimate cut quality on non-ferrous metals in wet conditions
B25	Standard multi-purpose bond that offers durability & freeness of cut in a wide variety of materials & applications. Can also be used in wet cutting on softer grades
B26	New generation bond used on aluminium oxide cut-off wheels that gives the best performance & the ultimate cut quality on ferrous metals in wet conditions
B65	Traditional bond gives good performance & long wheel life in dry cutting conditions

## DIFFERENTIATION IN THE RANGE

Norton offers the industry's widest selection of sharpening and grinding wheels to meet every customer requirement. The range is classified into 3 tiers (Best/Better/Good) to help you choose the right product for your specific application according to the type of abrasive used.

Using unparalleled abrasive technology, & extremely high performance, high concentration ceramic aluminium oxide abrasive, Norton provides innovative products dedicated to improving productivity in all industrial applications

High concentrations of the well renowned SG abrasive are used to supply Norton's high performance abrasive grains, 5SG & 3SG. These products meet the demands of the most discerning user giving high stock removal rates & long product life for lower operating costs

The SGB abrasive is used in the majority of Norton's Better products. SGB contains a medium concentration of SG ceramic aluminium oxide abrasive. SG is harder & sharper than conventional abrasive grains & gives excellent cutting capability on a wide variety of materials

Standard aluminium oxide grains, both blended & pure, give highly durable solutions that produce good performance levels

# APPLICATION GUIDE FOR PRECISION GRINDING

## TOOL GRINDING

PAGE 301 TO 319

Tool grinding refers to the maintenance and repair of the cutting tools used in manufacturing operations. Wheels of all sizes and shapes are used in tool and cutter applications. Most wheels used are vitrified, in grit sizes 36 to 220, and in grades H through to N.

## SAW SHARPENING

PAGE 320 TO 325

Saw sharpening refers to the maintenance and repair of saw blades. Vitrified flat wheels and cups are used in grit sizes 54 to 60. Resin treatment reinforces the wheel and helps reduce wheel face deformation.

## SURFACE GRINDING

PAGE 326 TO 341

The term surface grinding is used to describe the grinding of flat surfaces in which the wheel moves past the workpiece in a flat plane, or vice versa. Surface grinding applications range can vary from heavy rapid stock removal, to precision contour grinding.

## EXTERNAL CYLINDRICAL GRINDING

PAGE 342 TO 349

Norton's leading technology, provides you with the best precision, formholding vitrified wheels to maximize productivity, increase grinding efficiency and improve part quality in all your external cylindrical grinding operations.

## INTERNAL CYLINDRICAL GRINDING

PAGE 350 TO 354

Internal grinding refers to the grinding of bores or holes and is probably one of the most difficult types of grinding. Internal grinding applications range from very rapid stock removal to more controlled processes capable of generating sizes and concentricity measured in microns.

**BENCH AND PEDESTAL GRINDING** PAGE 355 TO 365

Bench and pedestral grinding application refers to offhand deburring and sharpening of parts and tools. The wheels are mounted on bench grinders or pedestral grinders and covers three types of abrasives to answer all deburring, shaping and sharpening needs: aluminum oxide for high speed tool steels and other metals, and silicon carbide for non-ferrous metals.

**REDUCTION RINGS**

Plastic reduction rings may be used to adapt grinding wheels to fit on various spindle sizes. These rings reduce the bore hole size, allowing the wheel to be safely mounted on a spindle with a smaller diameter.

- Reduction rings should never come in contact with the flange
- Reduction rings should not be used on wheels of thicknesses less than 6mm, or greater than 50mm
- Always use one reduction ring on each side of the wheel when the wheel is thick enough to allow correct seating
- Never use reduction rings to reduce the hole below the minimum specified in the FEPA safety code

WHEEL BORE (mm)	REDUCED TO (mm)	REDUCTION RING

## NORTON QUANTUM WITH VITRIUM<sup>3</sup> 5NQ

BEST +++++

INNOVATION

### REVOLUTIONARY BOND TECHNOLOGY

#### FEATURES

- Engineered ceramic grain shape and chemistry with new revolutionary bond
- Perfect combination of sharpness and toughness

#### BENEFITS

- Extreme versatility for all precision applications
- Reduced dressing frequency and cost
- High profile accuracy
- Cooler cut and high speed material removal

LINK TO WEBSITE AND ANIMATION

## NORTON QUANTUM 5NQ / 3NQ / 2NQ

BEST +++++

### FEATURES

- Engineered ceramic grain shape and chemistry with new bond technology
- A perfect blend between sharpness (free cutting) and toughness (life)

### BENEFITS

- Versatile in all low, medium and high force applications
- 30% to 100% higher metal removal rate
- >15% lower threshold power

## SG 5SG

### FEATURES

- Very high concentration of SG ceramic aluminium oxide abrasive

### BENEFITS

- Ultimate cutting capability
- High removal rate & extended wheel life
- Perfect for technical applications where grinding parameters can be adjusted to optimise performance

## SG 3SG

### FEATURES

- High concentration of SG ceramic aluminum oxide abrasive
- Unique, self sharpening, microcrystalline structure

### BENEFITS

- Very good cutting capability
- High removal rate & extended wheel life
- Suitable for very hard steels

## SG SGA / SGB

### FEATURES

- Medium concentration of SG ceramic aluminium oxide
- Harder & sharper than conventional abrasive grains

### BENEFITS

- Good cutting capability
- Suitable for low to medium power machines
- Very versatile on a wide variety of steels

## 38A

GOOD +++

## FEATURES

- High purity white aluminium oxide abrasive
- Friable

## BENEFITS

- Cool & burn free cutting
- Ideal for heat-sensitive applications with light to moderate feed rates

## 86A

## FEATURES

- Highly refined pink aluminium oxide abrasive
- Tougher abrasive than pure white aluminium oxide
- Contains a small portion of chromium oxide

## BENEFITS

- Very versatile
- Reduced dress frequency

## 19A

## FEATURES

- A blend of A & 38A abrasives
- Primarily used in saw grinding applications

## BENEFITS

- Very versatile. For use on a wide variety of steels
- Good yield, good removal rate
- Good balance between cut rate & form holding ability

A

**FEATURES**

- Regular brown aluminium oxide abrasive
- Unique, self sharpening, microcrystalline structure

**BENEFITS**

- Very tough, suitable for grinding most types of steel & soft iron
- Good cost/performance compromise
- Hard wearing wheels for general purpose cylindrical off-hand bench & pedestal grinding applications

37C

**FEATURES**

- High purity black silicon carbide abrasive
- Harder & more friable than aluminum oxide abrasive

**BENEFITS**

- Suitable for roughing operations in coarse grit & resinoid wheels
- Ideal for grinding & sharpening applications on metal carbide & non-ferrous metals

39C

**FEATURES**

- Highest purity green silicon carbide abrasive
- Harder & more friable than aluminium oxide abrasive

**BENEFITS**

- Ideal for precision grinding & sharpening applications on metal carbide

# SAW SHARPENING

Manufactured using Norton's market leading technologies, our vitrified saw sharpening wheels are designed to ensure better grinding performance.

Using premium quality abrasives and bonds, our products are intended to lower overall manufacturing and regrinding costs in all forestry and saw markets.

For Saw Sharpening, please take note of the safety instructions, about the storage and use of grinding wheels, available on page 564.

See a small selection of our new range of Saw Sharpening wheels with the revolutionary bond below

## NORTON QUANTUM WITH VITRIUM<sup>3</sup> 5NQ

BEST +++++

INNOVATION

### REVOLUTIONARY BOND TECHNOLOGY

#### FEATURES

- Engineered ceramic grain shape and chemistry with new revolutionary bond
- Perfect combination of sharpness and toughness

#### BENEFITS

- Extreme versatility for all precision applications
- Reduced dressing frequency and cost
- High profile accuracy
- Cooler cut and high speed material removal

## NORTON QUANTUM 3NQ / 2NQ

BEST +++++

#### FEATURES

- Engineered ceramic grain shape and chemistry with new bond technology
- A perfect blend between sharpness (free cutting) and toughness (life)

#### BENEFITS

- Versatile in all low, medium and high force applications
- 30% to 100% higher metal removal rate
- >15% lower threshold power

## SG 3SG

#### FEATURES

- High concentration of SG ceramic aluminum oxide abrasive
- Unique, self sharpening, microcrystalline structure

#### BENEFITS

- Very good cutting capability
- High removal rate & extended wheel life
- Suitable for very hard steels

## 38A WITH VITRIUM<sup>3</sup>

BETTER ++++

REVOLUTIONARY BOND TECHNOLOGY

VITRIUM 

### FEATURES

- High purity white aluminium oxide abrasives with enhanced bond adhesion
- High friability abrasive

### BENEFITS

- Even cooler & burn free cutting
- Extended wheel life
- Improved profile accuracy
- Ideal for heat sensitive applications with light to moderate feed rates

## SG SGB

### FEATURES

- Medium concentration of SG ceramic aluminum oxide
- Harder & sharper than conventional abrasive grains

### BENEFITS

- Good cutting capability
- Suitable for low to medium power machines
- Very versatile on a wide variety of steels

## 38A

GOOD +++

### FEATURES

- High purity white aluminium oxide abrasive
- Friable

### BENEFITS

- Cool & burn free cutting
- Ideal for heat-sensitive applications with light to moderate feed rates

## 86A

### FEATURES

- Highly refined pink aluminium oxide abrasive
- Tougher abrasive than pure white aluminium oxide
- Contains a small portion of chromium oxide

### BENEFITS

- Very versatile
- Reduced dress frequency

## 19A

### FEATURES

- A blend of A & 38A abrasives
- Primarily used in saw grinding applications

### BENEFITS

- Very versatile. For use on a wide variety of steels
- Good yield, good removal rate
- Good balance between cut rate & form holding ability

## 39C

### FEATURES

- Highest purity green silicon carbide abrasive
- Harder & more friable than aluminium oxide abrasive

### BENEFITS

- Ideal for precision grinding & sharpening applications on metal carbide

## NORTON QUANTUM WITH VITRIUM<sup>3</sup> 5NQ

BEST +++++

INNOVATION

### REVOLUTIONARY BOND TECHNOLOGY

#### FEATURES

- Engineered ceramic grain shape and chemistry with new revolutionary bond
- Perfect combination of sharpness and toughness

#### BENEFITS

- Extreme versatility for all precision applications
- Reduced dressing frequency and cost
- High profile accuracy
- Cooler cut and high speed material removal

## NORTON QUANTUM 5NQ / 3NQ / 2NQ

BEST +++++

### FEATURES

- Engineered ceramic grain shape and chemistry with new bond technology
- A perfect blend between sharpness (free cutting) and toughness (life)

### BENEFITS

- Versatile in all low, medium and high force applications
- 30% to 100% higher metal removal rate
- >15% lower threshold power

## SG 5SG

### FEATURES

- Very high concentration of SG ceramic aluminium oxide abrasive

### BENEFITS

- Ultimate cutting capability
- High removal rate & extended wheel life
- Perfect for technical applications where grinding parameters can be adjusted to optimise performance

## SG 3SG

### FEATURES

- High concentration of SG ceramic aluminum oxide abrasive
- Unique, self sharpening, microcrystalline structure

### BENEFITS

- Very good cutting capability
- High removal rate & extended wheel life
- Suitable for very hard steels

### REVOLUTIONARY BOND TECHNOLOGY

VITRIUM<sup>3</sup>

#### FEATURES

- High purity white aluminium oxide abrasives with enhanced bond adhesion
- High friability abrasive

#### BENEFITS

- Even Cooler & burn free cutting
- Extended wheel life
- Improved profile accuracy
- Ideal for heat sensitive applications with light to moderate feed rates

LINK TO WEBSITE  
AND ANIMATION

## SG SGA / SGB

#### FEATURES

- Medium concentration of SG ceramic aluminum oxide
- Harder & sharper than conventional abrasive grains

#### BENEFITS

- Good cutting capability
- Suitable for low to medium power machines
- Very versatile on a wide variety of steels

## VORTEX IPA

### FEATURES

- High performance engineered alumina grain
- High porosity & permeability for maximum coolant diffusion
- Optimal grain spacing for improved chip clearance & reduced friction

### BENEFITS

- Very high metal removal rates, resulting in reduced cycle times
- Improved part quality thanks to reduced heat generation
- Increase wheel life
- Consistent grinding performance
- Extremely cool cutting action promoting burn free results

## 38A

**GOOD +++**

### FEATURES

- High purity white aluminium oxide abrasive
- Friable

## 19A

### FEATURES

- A blend of A & 38A abrasives
- Primarily used in saw grinding applications

### BENEFITS

- Very versatile. For use on a wide variety of steels
- Good yield, good removal rate
- Good balance between cut rate & form holding ability

## 39C

### FEATURES

- Highest purity green silicon carbide abrasive
- Harder & more friable than aluminium oxide abrasive

### BENEFITS

- Ideal for precision grinding & sharpening applications on metal carbide

## 37C

### FEATURES

- High purity black silicon carbide abrasive
- Harder & more friable than aluminum oxide abrasive

### BENEFITS

- Suitable for roughing operations in coarse grit & resinoid wheels
- Ideal for grinding & sharpening applications on metal carbide & non-ferrous metals

# EXTERNAL CYLINDRICAL GRINDING (OD)

Norton's leading technology, provides you with the best precision, form holding vitrified wheels to maximize productivity, increase grinding efficiency and improve part quality in all your external cylindrical grinding operations.

For OD Grinding, please take note of the safety instructions, about the storage and use of grinding wheels, available on page 564.

## NORTON QUANTUM WITH VITRIUM<sup>3</sup> 5NQ

BEST +++++

INNOVATION

REVOLUTIONARY BOND TECHNOLOGY

### FEATURES

- Engineered ceramic grain shape and chemistry with new revolutionary bond
- Perfect combination of sharpness and toughness

### BENEFITS

- Extreme versatility for all precision applications
- Reduced dressing frequency and cost
- High profile accuracy
- Cooler cut and high speed material removal

## NORTON QUANTUM 3NQ / 2NQ

BEST +++++

### FEATURES

- Engineered ceramic grain shape and chemistry with new bond technology
- A perfect blend between sharpness (free cutting) and toughness (life)

### BENEFITS

- Versatile in all low, medium and high force applications
- 30% to 100% higher metal removal rate
- >15% lower threshold power

## SG 3SG

### FEATURES

- High concentration of SG ceramic aluminum oxide abrasive
- Unique, self sharpening, microcrystalline structure

### BENEFITS

- Very good cutting capability
- High removal rate & extended wheel life
- Suitable for very hard steels

BONDED ABRASIVES

SUPER ABRASIVES

## 38A WITH VITRIUM<sup>3</sup>

BETTER ++++

REVOLUTIONARY BOND TECHNOLOGY

VITRIUM<sup>3</sup>

### FEATURES

- High purity white aluminium oxide abrasives with enhanced bond adhesion
- High friability abrasive

### BENEFITS

- Even cooler & burn free cutting
- Extended wheel life
- Improved profile accuracy
- Ideal for heat sensitive applications with light to moderate feed rates

LINK TO WEBSITE AND ANIMATION

DIAMOND TOOLS

CLEANING, POLISHING & MASKING

PERSONAL PROTECTION EQUIPMENT

TECHNICAL INFORMATION

## SG SGA / SGB

### FEATURES

- Medium concentration of SG ceramic aluminum oxide
- Harder & sharper than conventional abrasive grains

### BENEFITS

- Good cutting capability
- Suitable for low to medium power machines
- Very versatile on a wide variety of steels

## 38A

### FEATURES

- High purity white aluminium oxide abrasive
- Friable

### BENEFITS

- Cool & burn free cutting
- Ideal for heat-sensitive applications with light to moderate feed rates

GOOD +++

## 19A

### FEATURES

- A blend of A & 38A abrasives
- Primarily used in saw grinding applications

### BENEFITS

- Very versatile. For use on a wide variety of steels
- Good yield, good removal rate
- Good balance between cut rate & form holding ability

## 39C

### FEATURES

- Highest purity green silicon carbide abrasive
- Harder & more friable than aluminium oxide abrasive

### BENEFITS

- Ideal for precision grinding & sharpening applications on metal carbide

BONDED ABRASIVES

SUPER ABRASIVES

DIAMOND TOOLS

CLEANING, POLISHING & MASKING

TECHNICAL INFORMATION

37C

**FEATURES**

- High purity black silicon carbide abrasive
- Harder & more friable than aluminum oxide abrasive

**BENEFITS**

- Suitable for roughing operations in coarse grit & resinoid wheels
- Ideal for grinding & sharpening applications on metal carbide & non-ferrous metals

**STRAIGHT WHEELS**

# INTERNAL CYLINDRICAL GRINDING (ID)

Fruit of historical and technical expertise, Norton's bond and abrasive grain formulations are optimized to best suit the technical request of your ID grinding operations: Perfect geometry (roundness, conicity of the part) and good surface finish.

For ID Grinding, please take note of the safety instructions, about the storage and use of grinding wheels, available on page 564.

## NORTON QUANTUM WITH VITRIUM<sup>3</sup> 5NQ

BEST +++++

INNOVATION

### REVOLUTIONARY BOND TECHNOLOGY

#### FEATURES

- Engineered ceramic grain shape and chemistry with new revolutionary bond
- Perfect combination of sharpness and toughness

#### BENEFITS

- Extreme versatility for all precision applications
- Reduced dressing frequency and cost
- High profile accuracy
- Cooler cut and high speed material removal

## NORTON QUANTUM 5NQ / 3NQ

BEST +++++

### FEATURES

- Engineered ceramic grain shape and chemistry with new bond technology
- A perfect blend between sharpness (free cutting) and toughness (life)

### BENEFITS

- Versatile in all low, medium and high force applications
- 30% to 100% higher metal removal rate
- >15% lower threshold power

## SG 5SG

### FEATURES

- Very high concentration of SG ceramic aluminium oxide abrasive

### BENEFITS

- Ultimate cutting capability
- High removal rate & extended wheel life
- Perfect for technical applications where grinding parameters can be adjusted to optimise performance

## SG 3SG

### FEATURES

- High concentration of SG ceramic aluminum oxide abrasive
- Unique, self sharpening, microcrystalline structure

### BENEFITS

- Very good cutting capability
- High removal rate & extended wheel life
- Suitable for very hard steels

## 38A WITH VITRIUM<sup>3</sup>

BETTER ++++

REVOLUTIONARY BOND TECHNOLOGY

VITRIUM<sup>3</sup>

### FEATURES

- High purity white aluminium oxide abrasives with enhanced bond adhesion
- High friability abrasive

### BENEFITS

- Even cooler & burn free cutting
- Extended wheel life
- Improved profile accuracy
- Ideal for heat sensitive applications with light to moderate feed rates

BONDED

TECHNICAL  
INFORMATION

## SG SGB

### FEATURES

- Medium concentration of SG ceramic aluminum oxide
- Harder & sharper than conventional abrasive grains

### BENEFITS

- Good cutting capability
- Suitable for low to medium power machines
- Very versatile on a wide variety of steels

## 38A

### FEATURES

- High purity white aluminium oxide abrasive
- Friable

### BENEFITS

- Cool & burn free cutting
- Ideal for heat-sensitive applications with light to moderate feed rates

GOOD +++

## 39C

### FEATURES

- Highest purity green silicon carbide abrasive
- Harder & more friable than aluminium oxide abrasive

### BENEFITS

- Ideal for precision grinding & sharpening applications on metal carbide

## 37C

### FEATURES

- High purity black silicon carbide abrasive
- Harder & more friable than aluminum oxide abrasive

### BENEFITS

- Suitable for roughing operations in coarse grit & resinoid wheels
- Ideal for grinding & sharpening applications on metal carbide & non-ferrous metals

# BENCH AND PEDESTAL WHEELS

The Norton bench and pedestal wheels line consists of all wheel diameters and arbor sizes, abrasive types and grit sizes. Our offering answers all metal removal, deburring, shaping and sharpening needs: white aluminum oxide for high-speed tool steels, brown aluminum oxide for carbon steel, and silicon carbide for non-ferrous metals and carbide tooling.

For bench and pedestal grinding, please take note of the safety instructions, about the storage and use of grinding wheels, available on page 564.

	STEELS									NON-FERROUS METALS		
	AEROSPACE ALLOYS: NIMONIC, INCONEL, HASTALLOY	CAST IRON	CHROME PLATE	HIGH SPEED STEEL	INOX	STEEL - SOFT (UP TO 45RC)	STEEL HARDENED (OVER 54RC)	STEEL-HIGH CARBON / HIGH CHROME CONTENT	STELLITE	ALUMINIUM	TITANIUM	TUNGSTEN CARBIDE

## STARLINE BROWN ALUMINIUM OXIDE

**GOOD +++**

For steel removal, shaping and deburring.

### FEATURES

- High quality aluminium oxide in a premium vitrified bond
- Precision engineered grit sizes and hardness

### BENEFITS

- Maximised cut rate finish and wheel life

BONDED ABRASIVES

SUPER ABRASIVES

TECHNICAL INFORMATION

## STARLINE WHITE ALUMINIUM OXIDE

GOOD +++

For light material removal and sharpening of high speed tool steels.

### FEATURES

- White aluminium oxide in a premium vitrified bond
- Precision engineered grit sizes and hardness

### BENEFITS

- Maximised cut rate and cool grinding action on hardened or high-speed tool steels

## STARLINE GREEN SILICON CARBIDE

For all general purpose bench and pedestal applications on non-ferrous materials and carbide tools.

### FEATURES

- Sharp green silicon carbide
- Precision engineered grit sizes and hardness

### BENEFITS

- Maximised cut rate and finish on non-ferrous metals

A

### FEATURES

- Regular brown aluminium oxide abrasive
- Unique, self sharpening, microcrystalline structure

### BENEFITS

- Very tough, suitable for grinding most types of steel & soft iron
- Good cost/performance compromise
- Hard wearing wheels for general purpose cylindrical off-hand bench & pedestal grinding applications

39C

### FEATURES

- Highest purity green silicon carbide abrasive
- Harder & more friable than aluminium oxide abrasive

### BENEFITS

- Ideal for precision grinding & sharpening applications on metal carbide

ART. NO. With **VITRIUM** Revolutionary bond technology

# 38A

## FEATURES

- High purity white aluminium oxide abrasive
- Friable

## BENEFITS

- Cool & burn free cutting
- Ideal for heat-sensitive applications with light to moderate feed rates

## STARLINE - BROWN ALUMINIUM OXIDE

# MOUNTED POINTS & WHEELS

Norton Quantum (NQ) vitrified mounted points are the best, versatile choice for high volume Foundry and Aerospace operations. The unique, engineered ceramic grain shape in combination with the chemistry of the proven bond technology can provide 33%+ longer life versus competitive ceramic products with 30%+ higher metal removal rates. With minimal loading and heat build-up they are ideal for grinding Inconel and similar alloy turbine blade components, e.g. to attain final geometry and to create a uniform finish. Less pressure is needed to get optimum performance so... **Let the Norton Quantum grain do the work!**

## APPLICATIONS & MARKETS

## NORTON QUANTUM NQ

### FEATURES

- Unique, engineered ceramic grain shape and chemistry with proven bond technology

BEST +++++

### BENEFITS

- Ideal for high-volume foundry operations – grinding Inconel and similar alloy turbine blade components
- Minimal loading and heat build-up
- 33%+ longer life vs. competitive ceramic products
- 30%+ higher metal removal rates
- Versatile, optimized for all low, medium and high force applications
- Exceptional productivity and life

## 86A

GOOD +++

### FEATURES

- Highly refined pink aluminium oxide abrasive
- Tougher than pure white aluminium oxide abrasive
- Good profile holding
- Contains a small portion of chromium oxide abrasive

### BENEFITS

- Very versatile
- Reduced dress frequency
- Better part geometry

### SPEC CHECK

- Use 36 grit & coarser for rough grinding
- Use 60 grit for imparting fine finishes or when grinding on narrow surfaces

# DRESSING STICKS

Regular use of properly selected dressing sticks will help you achieve maximum performance from your vitrified wheels.

## APPLICATIONS & MARKETS

- Truing, cleaning & dressing Diamond, CBN & conventional abrasive wheels

## NORBIDE

**BEST +++++**

### FEATURES

- Manufactured from sintered boron carbide
- Extremely hard & very dense

### BENEFITS

- Excellent chemical & wear resistance
- Long product life, reduced maintenance & less downtime
- Suitable also for dressing tool & cutter wheels 200mm & smaller, especially cup & dish shapes

## 39C

**BETTER ++++**

### FEATURES

- Highest purity green silicon carbide abrasive
- Harder & more friable than aluminium oxide abrasive

### BENEFITS

- Ideal for dressing conventional vitrified grinding wheels
- Outperforms 37C for better cutting efficiency & longer life

## CRYSTOLON

GOOD +++

### FEATURES

- Premium silicon carbide abrasive
- Pre-filled with oil

### BENEFITS

- Fast cutting stone; ideal for general sharpening of cutting tools
- Fast stock removal for quick edge shaping with minimal loading
- Saves time by eliminating the need for pre-soaking prior to use

## INDIA

### FEATURES

- Smooth cutting aluminium oxide abrasive
- Norton's trademark for a fine finish
- Pre-filled with oil

### BENEFITS

- Long lasting cutting edge
- Ideal for cleaning, deburring & good quality finishes
- Saves time by eliminating the need for pre-soaking prior to use

## ARKANSAS

### FEATURES

- Natural premium Novaculite quarried in Arkansas & available in soft & hard
- Dense construction

### BENEFITS

- Sharpest possible razor edges
- Near mirror finishes
- Use for finer honing after India stone
- Absorbs oil at a slower rate, hence does not require pre-filling

# ORGANIC CUT-OFF WHEELS

Reinforced cut-off wheels contain fiberglass to increase mechanical resistance when in use. The reinforcements increase the lateral stress capacity, resulting in higher resistance to breakage. Non-reinforced cut-off wheels are only designed for use on fixed base machines, where the work is securely clamped, the wheel is adequately guarded and operating on a controlled cutting plane. They are suitable for use in dry or wet conditions, depending on bond type.

## APPLICATIONS & MARKETS

### REINFORCED CUT-OFF WHEELS

- Foundry – all steel types
- Aerospace
- Automotive

### NON-REINFORCED CUT-OFF WHEELS

- Saw sharpening
- Tool cut-off
- Lab cut-off
- Industrial cut-off

## TOROS 4NZ

BEST +++++

TYPE 41

TYPE 42

### FEATURES

- High concentration of zirconia oxide abrasive
- Extremely tough aluminium oxide abrasive

### BENEFITS

- Very long wheel life
- Very high cutting capability & high metal removal rate if high pressure is applied: shelf re-sharpening
- Perfect for technical applications for premium performances

**TOROS**

## TOROS 5NZ

TYPE 41

TYPE 42

### FEATURES

- Medium concentration of zirconia oxide abrasive
- Extremely tough aluminium oxide abrasive

### BENEFITS

- Long wheel life
- Good metal removal rate
- Versatile: suitable for most steels

## TOROS XGP

### TYPE 41

#### FEATURES

- Special combination of abrasive blends
- High durability with a good cutting capability

#### BENEFITS

- Very long wheel life & high metal removal rate
- Perfect for lab applications
- Suitable for use on all types of steel

## TOROS 39C

### TYPE 41

#### FEATURES

- Highest purity green silicon carbide abrasive
- Harder & more friable than aluminium oxide abrasive

#### BENEFITS

- Excellent to cut all non metals (titanium, aluminum, bronze)
- Extremely friable abrasive for better cutting efficiency & cut quality

## TOROS U57A

BETTER ++++

TYPE 41

TYPE 42

### FEATURES

- Specially treated brown aluminium oxide abrasive
- Tough & hard aluminium oxide abrasive
- Not suitable for use on extremely hard materials

### BENEFITS

- Long wheel life
- Ideal for heavy duty applications

**TOROS**

## NORZON WITH FOUNDRY X TECHNOLOGY

TYPE 41

TYPE 42

Norzon cut-off wheels with new Foundry X bond technology increase cut rate and wheel life in all cut-off applications on a wide range of tough materials.

### FEATURES

- Foundry X bond technology
- Latest generation of Norzon grain with finer structure and sharper shape
- Excellent micro-fracturing properties

### BENEFITS

- Greater heat resistance
- Longer wheel life
- Lower total abrasive cost
- Improved cut rate (removes material faster)
- Reduced cycle time
- Lower specific cutting energy relative to previous technology

**NorZon**

## TOROS 57A

GOOD +++

### TYPE 41

#### FEATURES

- Semi-friable aluminium oxide abrasive
- Less tough than type A abrasive but offers better cutting quality
- Pointed shape

#### BENEFITS

- Cool & burn free cutting
- Ideal for heat-sensitive applications with light to moderate feed rates
- Suitable for all steels
- Good compromise between cut quality & wheel life
- Very versatile: suitable for all steels

**TOROS**

## TOROS 23A

### TYPE 41

#### FEATURES

- An abrasive blend of semi-friable 57A aluminium oxide & white monocristalline 32A aluminium oxide

#### BENEFITS

- Cool & burn free cutting
- Suitable for all steels
- Improved metal removal rate compared to 57A pure semifriable aluminium oxide abrasive

## NORTON WITH FOUNDRY X TECHNOLOGY

### TYPE 41

### TYPE 42

Norton cut-off wheels with new Foundry X bond technology increase cut rate and wheel life in all cut-off applications on a wide range of tough materials.

#### FEATURES

- Foundry X bond technology
- High performance aluminium oxide or silicon carbide grain
- Good choice for low to medium power machines

#### BENEFITS

- Greater heat resistance
- Longer wheel life
- Lower total abrasive cost
- Consistent performance range on standard applications
- Stable surface cut quality

### SPEC CHECK

- B24 New generation bond used on silicon carbide cut-off wheels that gives the best performance & the ultimate cut quality on non-ferrous metals in wet conditions
- B25 Standard multi-purpose bond that offers durability & freeness of cut in a wide variety of materials & applications. Can also be used in wet cutting on softer grades
- B26 New generation bond used on aluminium oxide cut-off wheels that gives the best performance & the ultimate cut quality on ferrous metals in wet conditions
- BF1 Specific bond ensuring the best quality of cut in dry or wet conditions
- BF3 New generation bond assuring the best wheel life in dry cutting operations; versatile & long wheel life. Ideal for heavy duty operations
- B65 Traditional bond gives good performance & long wheel life in dry cutting conditions.
- BFX Engineered Foundry X bond to increase cut rate and wheel life in all your cut-off applications on a wide range of tough materials.

## REINFORCEMENTS

The main purpose of the fibreglass reinforcement in cut-off wheels is safety. Reinforcements also permit wheels to withstand high rotational speed & make them more flexible. Reinforcements can be external or internal, half or full diameter. Reinforcements impact the cutting profile, affecting both the straightness & quality of cut.

Reduction rings are available upon request to adapt the product to different spindle sizes.

### SPEC CHECK

- Non-reinforced cut-off wheels are designed for use on “fixed base” machines where the work is securely clamped, guarded, & where the wheel operates on a controlled cutting plane
- Run the cut-off machine at the highest possible speed marked on the wheel
- Long life wheels should be used on a cut-off machine with 1 horsepower for every 25mm wheel diameter. With a less powerful machine, we recommend starting with a Free Cut specification.

# ORGANIC SNAGGING WHEELS & CUPS

Norton offer a range of products for portable snagging foundry applications. Type 01 straight wheels are used on portable machine and Type 06 and 11 cup wheels on vertical grinders. Since finish tolerances are not usually critical, coarse, durable wheels are used with grit sizes ranging from 16 to 24.

## APPLICATIONS & MARKETS

- Foundries
- Welding shops
- Steel mills
- Forge shops

## ZF7A/ZF7C

# INTRODUCTION

Diamond is the hardest material known to man, closely followed by Cubic Boron Nitride (CBN). As a result of their hardness these materials are used extensively in the most demanding precision grinding, slicing, and cutting applications. Super Abrasive wheels use diamond and CBN technology to cut demanding materials such as carbide, high speed steel, ceramics, and glass.

Norton provides ultimate, high performance Super Abrasive solutions for the cutting tools industry, offering products specifically designed to deal with the hardest and most challenging materials.

## UNDERSTANDING THE PRODUCT

## WHEEL COLOUR

## GRIT SIZE

The grit size selection depends on the required stock removal rate and the required surface finish.

## CONCENTRATION

The concentration influences the stock removal rate and the geometry of the workpiece.

**DIAMOND** 50/75/100/125

**CBN** Q/T/W/Z

## BOND TYPES

**BEST +++++**

**Aztec IV** Premium teflon/silver bond used for dry grinding on in typical tool room applications.

**ECO line** Especially designed resin bonds for saw blade applications.

**BETTER ++++**

**B99** Extremely versatile resin bond used in advanced products both for wet and dry applications.

**GOOD +++**

**B49** Versatile resin bond for dry applications.

## APPLICATIONS & MARKETS

Although both diamond and CBN are Super Abrasives, the areas of usage varies dramatically depending on the workpiece material.

### DIAMOND

- Cemented carbide
- Glass
- Ceramics
- Fibreglass
- Plastics
- Stone
- Abrasives
- Electronic components and materials

### CBN

- High speed tool steels
- Die steels
- Hardened carbon steels
- Alloy steels
- Aerospace alloys
- Hard stainless steel
- Abrasion-resistant ferrous materials

# DIAMOND & CBN GRINDING WHEELS

Norton diamond and CBN wheels are designed to grind and cut the hardest materials known to man, helping make 'difficult-to-grind' applications routine operations. Hardness, abrasion resistance, compressive strength, thermal conductivity are all features designed to achieve a high level of precision and quality, making them a logical choice for a wide range of applications.

## DIAMOND WHEELS

### FEATURES

- High quality synthetic diamond
- Pre-engineered resin bond - B99
- Optimised design

### BENEFITS

- High material removal rates. Longer wheel life versus conventional silicon carbide wheels
- Free cutting; superior form holding. Efficient wet or dry
- Ideal for dry tool room reconditioning applications
- Ideal for 1A1R cut-off applications and grinding glass or ceramic materials
- Fast stock removal, cool cutting; excellent for dry off-hand finishing of carbide tools, no wheel dressing required
- Durable under high grinding forces. Excellent for wet off-hand finishing of carbide tools

## CBN WHEELS

### FEATURES

- High quality durable CBN abrasive
- Pre-engineered resin bond - B99
- High performance Aztec IV bond
- Optimised design

### BENEFITS

- Easily cuts difficult to grind steel parts, HRC 50 or harder
- Highly wear resistant and thermally stable
- Free cutting, superior form holding
- Larger cutting depth
- Extremely efficient for dry tool re-sharpening especially when heavy stock removal is required

# ROUND TOOLS

## DIAMOND AND CBN GRINDING WHEELS

### FOR THE MACHINING OF ROUND TOOLS

Norton offers a comprehensive, newly designed product range for work on round tools such as drills, end mills and reamers. Diamond and CBN grinding wheels are ideal for producing and re-sharpening tungsten carbide and HSS tools.

The following sections are arranged by application for easy identification of the correct grinding wheel for fluting, gashing, grinding of clearance angles and re-sharpening. Within the sub-chapters the grinding wheels are ordered by FEPA code.

### BOND OVERVIEW DIAMOND

BOND	WEAR RESISTANCE	RECOMMENDATION FOR USE
R100 B99	↑	For CNC grinding operations (wet)
R75 B99		For universal grinding (wet or dry)
R50 B99		For universal grinding (wet or dry)

### BOND OVERVIEW CBN

BOND	WEAR RESISTANCE	RECOMMENDATION FOR USE
W B99	↑	For CNC grinding operations (wet)
T B99		For universal grinding (wet or dry)
Aztec IV		Very free grinding dry grinding bond

# ROUND TOOLS CNC GRINDING

The Norton B99 resin bonded wheel is ideal for flute grinding on CNC machines and is particularly suitable for applications on standard tools.

D64R100B99 and B107 W B99 are the most commonly used products for flute grinding, however other specifications can be made available on request.

TECHNICAL INFORMATION

The state-of-the-art Norton B99 resin bond is free cutting and has good corner stability, the most essential characteristic required for CNC gashing.

Two standard specifications are offered:

- for tungsten carbide tools: ASD64 R100 B99
- for HSS-tools: CB107 W B99.

Both are available in 12V9 as well as in 1V1 shape.

Further combinations of dimensions, grit sizes and concentrations are available on request.

Norton B99 resin bond tools are an ideal choice for grinding clearances and relief angles on CNC machines. With excellent cutting behaviour the bond produces a good surface finish. The listed grinding wheels are suitable for the production and re-sharpening of tungsten carbide and HSS round tools.

D64 R100 and B107 W are the most common specifications for clearance angle grinding applications, however, other specifications are available on request.

# ROUND TOOLS UNIVERSAL GRINDING

Norton offers a comprehensive selection of different bonds and concentrations for re-sharpening applications on universal machines. The B99 grinding wheels can be used wet or dry.

The lower the diamond or CBN concentration the more suited the product will be to grinding large contact areas. Aztec IV is a special free cutting resin bond which is designed for dry grinding operations and enables high material removal.

# SAW BLADES

## DIAMOND AND CBN GRINDING WHEELS

### FOR THE SAW BLADE INDUSTRY

Norton provides a comprehensive range of diamond and CBN grinding wheels. With an emphasis on excellent price vs. performance ratios, the saw blade programme aims to provide the best solutions for grinding tungsten carbide tipped saw blades and one-piece HSS saws.

The tungsten carbide tipped circular saw blade grinding wheels have been specifically designed for face grinding and flank grinding. Norton offers grinding wheels for the most common machine types required for these applications.

### BOND OVERVIEW DIAMOND

# SAW BLADES TUNGSTEN CARBIDE TIPPED SAWS

The tooth face of circular saw blades is ground with sharp angled cup wheels. Depending on the tooth pitch, different angles and wheel thicknesses are required. The greater the number of teeth around the circumference, the narrower the space between them and the thinner the grinding wheel needs to be. Even the narrowest tooth gaps can be machined with our 12V9 **ECO** Face wheels.

For reasons of stability, conventional tooth gaps are mainly ground using 4A2 or 12V2 grinding wheels.

TECHNICAL INFORMATION

To ensure the circular nature of the saw and to define the wedge and clearance angles, the top of the saw blade needs to be ground.

Vollmer and Widma machines normally require 6VV5 cup wheels Akemat and Woodtronic machines require 14M1 state of the art peripheral wheels.

TECHNICAL INFORMATION

During the flank grinding process the cutting width of the circular saw blade is defined. Therefore, typically two 4A9 grinding wheels are simultaneously fed from both sides.

When manufacturing saw blades there is a wide variety of tooth geometries and designs to choose from. Depending on the intended use of the saw, the tooth design can be flat, alternate, trapezoid or any combination of these. Hollow ground teeth are very common to achieve finer cuts with no burrs. The rounded shape of hollow ground teeth is produced with 1A1W grinding pins.

## SAW BLADES HSS SAWS

HSS saw blades are one-piece saws that are ground from one solid piece of metal. For this process HSS saws require special grinding machines.

14F1 wheels grind the required profile under CNC control. Wheels are ideal for both initial profiling and re-sharpening thanks to the advanced resin bond systems which ensure the wheels are economic and extremely wear resistant.

## DIAMOND AND CBN GRINDING WHEELS

### FOR GENERAL ENGINEERING

Norton diamond and CBN wheels for general engineering are suitable for many grinding applications like OD-, ID-, and flat grinding, machining of knives, milling cutters and polishing.

Most of the bonds listed in this section are made with ASD (armoured synthetic diamonds) grit and are suitable for wet and dry grinding applications. Some wheels use AMD (armoured metal bond diamonds) which are more wear resistant but require a coolant.

More information about the application can be found in the relevant sub-chapters.

### BOND OVERVIEW DIAMOND

BOND	WEAR RESISTANCE	RECOMMENDATION FOR USE
R100 B99	↑	For universal grinding (wet or dry)
R75 B99		For universal grinding (wet or dry)

Norton offers a comprehensive stock programme for resin bonded 1A1 standard grinding wheels designed for OD- and flat grinding tungsten carbide and steel parts.

All specified grinding wheels can be used for OD- and flat grinding. However wheels (R50) with lower concentration have been specifically designed for flat grinding operations.

Other specifications are available on request.

# GENERAL ENGINEERING

Resin bonded grinding pins and grinding wheels can be used for wet or dry applications, either manually or on automatic grinding machines.

To avoid burning and to ensure stable grinding conditions the diameter must be carefully selected. It is highly recommended to chose a diameter no bigger than 70% of the bore. When using grinding pins it is very important to follow the permitted speed instructions, which are engraved on the grinding tool.

If the permitted speed is slower than the adjustable speed of the grinding spindle, a different technical solution is required.

Norton offers a small assortment of standard resin bonded cut-off grinding wheels (ex stock). The specified diamond cut-off wheels cut hard, short-chipping and wear resistant materials such as glass, ceramics and carbide. The contained CBN cut-off wheels are ideal for machining high speed steel, hardened steel, 55 HRC and magnetic materials.

Further specifications for resin bond, sintered metal and electroplated metal bond are available on request.

# GENERAL ENGINEERING KNIFE GRINDING

Norton offers a range of resin bonded grinding wheels for machining flat, circular and profile knives (ex stock).

The 6A2 grinding wheels are specifically designed for wet grinding of circular knives with tungsten carbide-steel combinations on Göckel and Reform machines.

The 14F1 grinding wheels are designed for use on Weing machines for grinding profile knives for the wood industry.

## GENERAL ENGINEERING DIAMOND LAPPING COMPOUNDS

Norton lapping compounds are supplied in a standard concentration of 5g dispenser syringes. Perfectly sized synthetic diamond powder is mixed with a paste. When used, this compound should be diluted with water or alcohol.

### APPLICATIONS & MARKETS

- Used for lapping an extremely wide range of parts by hand
- Superfinishing of electronic components, semi-conductors, magnetic heads, rigid discs and optical discs
- Finishing for routine operations
- Preparatory lapping
- Fast removal of material, roughing

## DIAMOND COMPOUND PASTE

### FEATURES

- Optimised diamond grit distribution

### BENEFITS

- Easy and safe application

# GENERAL ENGINEERING DIAMOND FILES

Norton offers a range of diamond files in various shapes.

## APPLICATIONS & MARKETS

- Deburring
- Tool profiling
- Touching up hardened steels and metal carbides
- Glass
- Ceramics
- Hard plastics

## FILES

### FEATURES

- Several shapes available

### BENEFITS

- Free cutting and very high wear resistant, requiring only low contact pressure

# DIAMOND DRESSERS

Norton stationary diamond dressing tools have a worldwide reputation for quality and technology.

## APPLICATIONS & MARKETS

- For the profiling and straight dressing of all conventional grinding wheels

## PRODUCT SELECTION

Usage Key ● Highly recommended ○ Recommended	GENERAL CHOICE					
	STRAIGHT GRINDING WHEELS WITH NO PROFILE	PROFILED GRINDING WHEELS	GRIT	AUTOMATIC DRESSING PROCESS	ECONOMICAL DRESSING	HIGH REMOVAL RATE
DRESSING TOOL						
Single-point	○		All			
Multi-point	●		36-180		●	●
Blade tool dresser	●	○	36-180	●	●	○
Profile dresser		●	80-180			

### SPEC CHECK

- A new dressing tool should be put through at least 5 dressing cycles in order to fit the diameter of the grinding wheel
- The lifetime of the dressing tool is extended by ensuring that adequate coolant pressure and volume are directed at the tool.

TECHNICAL INFORMATION

## SELECTION OF BLADE TOOL DRESSERS

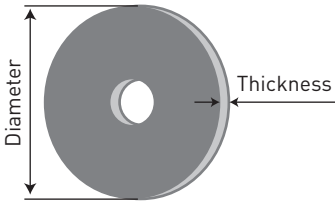

Dressing of profiles with blade tools	Dressing tools use a 'needle' form of natural or synthetic diamonds. Needle diamonds are especially suited to dressing profiles using infeeds and angular feeds.
Natural diamonds	An effective diamond layer with a length of up to 15mm creates an economical dressing solution. Using precise diamond setting patterns, with overlapped rows of stones, ensures that consistent dressing results are achieved.
Synthetic diamonds	The constant cross section given by synthetic diamonds, guarantees a constant dressing behaviour through the complete life of the dressing tool.

SELECTION OF GRIT SIZE		
Grit size of grinding wheel	Synthetic diamond size	Natural diamond size
46	0,8x0,8	D1181
60	0,8x0,8	D1001
80-120	0,6x0,6	D711

SELECTION OF TOOL SIZE			
	Diameter x Thickness (mm)	No. of synthetic needles	Dimensions
	<35000	2	10,5x28
	35000-60000	3	20,5x28
	60000-100000	4	20,5x28

## CHOICE OF SINGLE-POINT DRESSERS

Which tool to choose depends mainly on the dimensions of the wheel to be dressed. In order to calculate this, it is best to use the following method:

MULTIPLY THE DIAMETER OF THE WHEEL BY ITS THICKNESS		
	Diameter x Thickness (mm)	Carat
	< 6000	0,33 Carat
	6000 - 18000	0,50 Carat
	> 18000	1,0 Carat

For best results, always use a coolant when dressing

## BLADE TOOL DRESSERS HPB-D 3565 & 3585

**BEST +++++**

### FEATURES

- Synthetic multi-crystalline diamond

### BENEFITS

- Gives the most repeatable and consistent dresser for the highest demands in profiling and straight dressing

# INTRODUCTION

Norton Clipper Diamond Blades are the ultimate abrasive cutting solution in construction and building industries. With a range of products suitable for use on concrete, tile, brick, and asphalt, Norton Clipper offers the best choice for every cutting and drilling application in the building/construction industry.

## UNDERSTANDING THE PRODUCT

- 1 Safety pictograms
- 2 Strong Norton Clipper branding
- 3 Product name
- 4 Product dimensions (mm)
- 5 Machine type
- 6 oSa certified  
The Organisation for Safety of Abrasives
- 7 European safety standard EN13236:2010

## DIFFERENTIATION IN THE RANGE

Norton offers the industry's widest selection of diamond blades to meet every customer requirement. The range is classified into three quality-tiers (best/better/good) to help you choose the right product for your specific application.

BEST <b>+++++</b>	<b>EXTREME</b>	The Norton Clipper Extreme product range offers high performance; fast cutting and long blade life, for heavy usage, to meet the need of the most demanding applications.
BETTER <b>++++</b>	<b>PRO</b>	Norton Clipper Pro is a professional quality range designed for frequent use. The Pro range offers great performance in speed of cut and blade life.
GOOD <b>+++</b>	<b>CLASSIC</b>	Norton Clipper Classic is a range of standard diamond tools for low frequency use, providing a good quality to performance ratio.

# APPLICATIONS KEY - DIAMOND BLADES

Choosing the right diamond tool for the job is not always straight forward. For this reason Norton Clipper diamond blades are colour coded to ensure you pick the most appropriate tool for the job.

# DIAMOND BLADES FOR ANGLE GRINDERS

Norton Clipper diamond blades offer the user a cost-effective range of safe, easy to use products designed for use on all common types of building materials.

## APPLICATIONS & MARKETS

- Construction
- Renovation
- Maintenance
- Tiling
- Plumbing
- Engineering

## EXTREME BETON SILENCIO

BEST +++++

INNOVATION

**SILENCIO**

For use on engineering bricks, cured concrete, reinforced concrete, hard paviors, concrete paving slabs, concrete kerbs, concrete pipes, limestone, medium block paviors, & facing bricks.

### FEATURES

- Sandwich steel-centre with newly developed absorbing material
- Patented offset gullets prevent air from flowing through the steel-centre gullets
- Up to 17mm high segments, with a bespoke specification for each different application

### BENEFITS

- The Norton Clipper Silencio features unprecedented noise-dampening effect, reaching reductions of up to -11db - 15 times less noise !!
- The blade does not whistle at all while running idle, for a much better comfort of the operator and the surrounding area
- The Norton Silencio is among the best cutting Clipper diamond blades. Select the blade specifically designed for your machine type to get the best cutting performance

**15x**  
LESS NOISE

## 4X4 EXPLORER

BETTER ++++

**4X4 EXPLORER**

For use on granite, engineering bricks, hard paviors, reinforced concrete, concrete kerbs & slabs, medium block paviors, facing brick, concrete roof tiles, sandstone, asphalt over concrete & asphalt.

### FEATURES

- 12mm high segments with new specification
- Trapezoidal shape segments
- Patented drop-shape gullet
- Smarter diamond blade with segment wear-indicator and cutting depth indicator

### BENEFITS

- Up to 40% faster cut in concrete  
Up to 20% longer life
- Ensure narrowest possible space between each segments for reduces vibrations and better comfort
- Better resistance to cracks for enhanced safety. Norton Clipper 4x4 Explorer can cut in metal (up to 5mm thickness).
- Easier mounting, depth control while cutting and better follow up of the product life

# DIAMOND BLADES FOR ANGLE GRINDERS

## EXTREME UNIVERSAL TURBO

BEST +++++

Suitable for use on very hard masonry materials, block paviors, granite & marble.

### FEATURES

- Special blade geometry
- Protection segments
- Ventilated steel centre
- Heavy duty diamond blade
- Sintered, continuous rim diamond blade with corrugated steel centre

### BENEFITS

- Gives more rigidity
- Protect the steel centre & provide outstanding rigidity
- Provides efficient cooling during cutting
- Has extreme long life & an excellent cutting speed

## PRO UNIVERSAL TURBO

BETTER ++++

Suitable for use with engineering bricks, clay pipes/paviors, marble, clay roof tiles, concrete pipes/kerbs, slate, hard paviors, facing bricks, concrete roof tiles, medium block paviors, breeze blocks & concrete paving slabs.

### FEATURES

- 12mm segment height
- High-quality diamond blade
- Sintered, corrugated continuous rim diamond blade

### BENEFITS

- Longer life
- Long life, excellent cutting speed & all round excellent performance

## PRO UNIVERSAL TP

Suitable for removing mortar prior to the rejoining of brick walls.

### FEATURES

- Brazed, segmented diamond blade especially designed for the removal of mortar prior to rejoining
- Tungsten carbide tips

### BENEFITS

- Premium performance
- Gives undercutting protection

## PRO UNIVERSAL LASER

For use on cured concrete, hard paviers, facing bricks, concrete paving slabs, concrete kerbs, concrete pipes, limestone, medium block paviers, concrete roof tiles & breeze blocks.

### FEATURES

- 10mm segment height
- Diamond-shape apertures on 230mm diamond blades
- Laser-welded, segmented diamond blade

### BENEFITS

- Longer life
- Prevent over-heating of the diamond blade

# DIAMOND BLADES FOR ANGLE GRINDERS

GOOD +++

## CLASSIC UNIVERSAL TURBO

For use on engineering bricks, clay pipes/paviors, clay roof tiles, concrete pipes/kerbs, facing bricks, concrete roof tiles, medium block paviors, breeze blocks & concrete paving slabs.

### FEATURES

- Economy diamond blade
- Sintered, continuous rim diamond blade with corrugated segments

### BENEFITS

- Value for money

## CLASSIC UNIVERSAL LASER

Cured concrete, concrete pipes, concrete kerbs, hard paviors, roof tiles, medium block paviors, concrete paving slabs.

### FEATURES

- Economy diamond blade
- Laser-welded, segmented diamond blade

### BENEFITS

- Value for money

## CLASSIC UNIVERSAL

For use on concrete pipes, concrete kerbs, roof tiles, medium block paviors & concrete paving slabs.

### FEATURES

- Economy diamond blade
- Sintered, segmented diamond blade

### BENEFITS

- Value for money
- Recommended for soft to medium hard materials.  
Not recommended for very hard materials

# DIAMOND BLADES FOR ANGLE GRINDERS

## EXTREME CERAM TURBO

BEST +++++

INNOVATION

For use on granite slabs, ceramic tiles, quarry tiles, porcelain & terazzo.

### FEATURES

- Extra-thin diamond blade
- Additional metal flanges on each side of the blade
- 10mm high continuous rim
- For professional cutting of tiles

### BENEFITS

- Best quality of cut & cutting speed even on the hardest tiles
- Prevents the steel-centre wobbling during the cut
- For longer product life

# DIAMOND BLADES FOR PETROL HAND HELD & FLOOR SAWS

Norton offers a large range of high performance diamond tools for all applications and user needs.

## APPLICATIONS & MARKETS

- Construction
- Civil Engineering
- Road Contractors

## EXTREME BETON SILENCIO

BEST +++++

INNOVATION

# SILENCIO

For use on cured concrete, reinforced concrete, concrete paving slabs, concrete pipes/kerbs, medium block paviors & concrete roof tiles.

### FEATURES

- Patented offset gullets prevent air from flowing through the steel-centre gullets
- Sandwich steel-centre with newly developed absorbing material
- 15mm high segments, with a bespoke specification for each different application

### BENEFITS

- The blade does not whistle at all while running idle, for a much better comfort of the operator and the surrounding area
- The Norton Clipper Silencio features unprecedented noise-dampening effect, reaching reductions of up to -13dBa - 20 times less noise !!
- The Norton Silencio is among the best cutting Clipper diamond blades. Select the blade specifically designed for your machine type to get the best cutting performance

## 4X4 EXPLORER

BETTER ++++

**4  
EXPLORER  
4**

For use on granite, engineering bricks, hard paviers, reinforced concrete, concrete kerbs & slabs, medium block paviers, facing brick, concrete roof tiles, sandstone, asphalt over concrete & asphalt.

### FEATURES

- 12mm high segments with new specification
- Trapezoidal shape segments
- Patented drop-shape gullet
- Smarter diamond blade with segment wear-indicator and cutting depth indicator

### BENEFITS

- Up to 40% faster cut in concrete  
Up to 20% longer life
- Ensure narrowest possible space between each segments for reduces vibrations and better comfort
- Better resistance to cracks for enhanced safety. 4x4 Explorer can cut in metal (up to 5mm thickness).
- Easier mounting, depth control while cutting and better follow up of the product life

## PRO ASPHALT

For use on all abrasive materials including asphalt, tarmac top blocks, breeze blocks, sandstone, mortar jointing & green concrete.

### FEATURES

- Features the innovative patented "depth of cut indicator"
- High-quality diamond blade for professional requirements
- Laser-welded diamond blade with 10mm segment height

### BENEFITS

- The perfect device to optimise cutting speed & blade life in step-cutting. It also shows the way of rotation for an easier mounting of the diamond blade
- Slant segments protect against undercutting giving excellent performance

DIA (mm)	HxTxB (mm)	PK QTY	ART. NO.

# CORE BITS FOR CONCRETE & REINFORCED CONCRETE (DRILL RIGS)

Norton core bits are extremely high performance products, providing an extremely good cutting speed and long product life. The products meet the professional requirements of all users in industrial markets, including builders, electricians and plumbers. They are recommended for use on motors up to 3300W.

## APPLICATIONS & MARKETS

- For installation of electrical wall sockets & switches
- For use on cured concrete, reinforced concrete & bricks

## PRO CB BETON CROWNED

BETTER ++++

Crowned corebit for use on cured concrete & bricks.

### FEATURES

- Excellent performance for professional requirements
- Back end R1/2" male
- Length 300mm
- Recommended for engines up to 2000W

### BENEFITS

- Excellent cutting speed and long product life

# CORE BITS FOR CONCRETE & MASONRY (HAND DRILLS)

## EXTREME CB UNIVERSAL

BEST +++++

Laser-welded dry-drilling corebits with M16 connection.

### FEATURES

- New swirled core
- Laser-welded core bit
- Useful length 150mm, connection M16 female thread

### BENEFITS

- Reduced frictions and better dust evacuation
- High speed & long product life

## PRO CB UNIVERSAL

BETTER ++++

Newly developed specification for improved productivity on the jobsite.

### FEATURES

- Braced segmented corebit
- Heavy duty diamond tool
- Connection R1/2" female

### BENEFITS

- Long life, ideal for craftsmen
- Excellent cutting speed
- Useful length 150mm

# CORE BITS FOR CONCRETE & MASONRY (HAND DRILLS)

## CLASSIC CB UNIVERSAL

GOOD +++

Affordable corebits for professional craftsmen.

### FEATURES

- Heavy welded segmented core bit
- Connection R1/2" female

### BENEFITS

- Long life

## CLASSIC DS

Suitable for drilling domestic & industrial installation of electrical wall sockets & switches.

### FEATURES

- Laser-welded segments
- Heavy diamond tool
- For dry & wet drilling
- Useful length
- Connection M16

### BENEFITS

- Extremely long life
- Excellent cutting speed

# INTRODUCTION

Norton offers a broad range of wire brushes suitable for a wide range of surface processing applications. The range encompasses crimped & knotted wire power wheel brushes, bevelled brushes, cup brushes, end brushes & hand brushes.

Our high quality products contain a number different types of wire which have been specifically selected to give the best results in any specific application.

## WIRE TYPES

TEMPERED QUALITY STEEL WIRE			STAINLESS STEEL WIRE			BRASS WIRE
CRIMPED	STRAIGHT		CRIMPED	STRAIGHT		CRIMPED
						
Removing dust and smoothing low-grade and non alloy steels			Brushing and smoothing chrome-nickel steels, including stainless steel			Brushing, cleaning and smoothing brass, copper and bronze
NOSCW NOrmal Steel Crimped Wire	NOSKW NOrmal Steel Knotted Wire	NOSSW NOrmal Steel Straight Wire	STSCW STainless Steel Crimped Wire	STSKW STainless Steel Knotted Wire	STSSW STainless Steel Straight Wire	BRACW BRAss Crimped Wire

## SHAPE KEY

CODE	PRODUCT TYPE	TOOL	APPLICATION
WHB	Crimped Wheel Brushes		Supplied as standard with arbour hole as indicated. The size of the arbour hole can be reduced with reduction rings. Wheel brushes with short wire are more aggressive. Larger widths require more horse power.
	Twist Knotted Wheel Brushes		This brush is ideally suited for brushing out welded joints and brushing sharp corners.
BEB	Bevel Brushes		Specially designed for brushing hard-to-reach places such as edges and corners.
CPB	Crimped Cup Brushes		This brush is designed for cleaning jobs, especially on larger surfaces. It is ideal for removing rust, corrosion, paint & primers. Removal of rust, corrosion, paint and primers.
	Twist Knotted Cup Brushes		An aggressive brush which is excellent for heavy-duty cleaning and finishing of large surfaces. Extremely suitable for removing barnacles, scale, paint, rust and corrosion, as well as cleaning weld seams and spot-welds.
WHB/ENB	Shaft Mounted Brushes		Suitable for industrial use. Ideal for hard-to-reach areas. All shaft mounted brushes are equipped with a 6mm shank.
HCB/SPB	Hand Brushes		With wooden core. Available in different widths. For use on narrow work pieces. Ideal for light deburring & cleaning profiled surfaces
TUB	Pipe Brushes		With handle or thread. For deburring and cleaning tubes.

## OPERATING SPEED

Peripheral speed is a decisive factor in achieving optimum performance from a brush, the table opposite enables you to determine the relevant peripheral speed by simply reading down and across the appropriate diameter and drive shaft operating speed columns.

RPM	BRUSH DIAMETER (mm)											
	20	40	50	80	100	125	150	180	200	250	300	350

### HOW TO READ THIS TABLE?

Select your brush diameter, then move down till you reach desirable peripheral speed in m/s, after check on the left side of the table the value for the RPM. Check on page 466 the maximum operating speed per type of brush.

## MAXIMUM OPERATING SPEED

TYPE	DIAMETER (mm)	MAX RPM	TYPE	DIAMETER (mm)	MAX RPM	
 WHEEL BRUSHES	80	10000	 BEVEL BRUSHES	100	11000	
	100	8000		100/115	11000	
	125	6000		115	10000	
	 CUP BRUSHES	150	6000	 TWIST KNOTTED WHEEL BRUSHES	100	11000
		180	6000		115	11000
		200	4500		125	10000
		250	3600		150/180	8500
		250 - 1 row	3500		200	6500
		300	3000	 SHAFT MOUNTED WIRE BRUSHES	20	20000
60/65/75		11000	30		20000	
60/65/75		11000	40		18000	
75	9300	50	15000			
80/100	8500	60	15000			
125/150	6500	70	15000			
			80	12000		

The maximum RPM ratings are safety ratings not recommended operating speeds. The optimum operating speed is determined by the application and in most cases lower operating speeds will prove more efficient and achieve the best result. As a general guide we recommend the following peripheral speeds when working on the materials listed with:

APPLICATION	CRIMPED WIRE	TWIST KNOTTED
STEEL	30m/s	35-40m/s
NON FERROUS	18-20m/s	
PLASTIC	15m/s	

### BRUSHING PRESSURE

- Let the tip of the wire brush do the work. Operate the brush with the lightest pressure so only the tips of the wire come in contact with the work
- If heavy pressure is used, wires will be over stressed, resulting in a wiping action, and if this is continued, the life of the brush will be shortened due to wire fatigue
- Apply the work to the face of the brush ensuring as much of the brush face as possible is in full contact. Applying the work to the side or edge of the brushing tool will result in wire breakage and shortened brush life
- Reversing the wheel brush rotation periodically will tend to increase the life of the brush. This results in the sharpening of the wire tips or ends, ensuring faster cutting action

### SIZE OF WIRE

- Use the finest size of wire suitable for the application
- Finer wire size will perform better and last longer than heavier

## TROUBLESHOOTING

Several factors can influence a brush application. If the selected brush does not achieve the expected result, the following table may provide solutions for the most common problems faced by a user. For further information, please contact our technical department.

PROBLEM	RECOMMENDED ACTIONS
Brush is too aggressive	Increase trim length
	Reduce wire diameter
	Reduce operating speed
Brush is not aggressive enough	Reduce trim length
	Increase wire diameter
	Increase operating speed
Action of brush does not totally remove scale	Reduce trim length
	Increase wire diameter
Finish is too coarse	Increase trim length
	Reduce wire diameter
	Increase operating speed
	Choose a nylon abrasive brush
Finish is too smooth	Reduce trim length
	Increase wire diameter
Action of brush is not uniform	Reduce brushing pressure
	Automate operations to avoid human inaccuracy
Wire breaks more than usual	Reduce brushing pressure
	Reduce wire diameter
	Reduce operating speed
Life of the brush is too short	Reduce wire diameter
	Increase brush diameter
	Reduce brushing pressure

### SAFETY & STORAGE

Safety goggles or full face protection with side shields must be worn by all operators and others in the immediate area of power brush operations.

- Keep all machine guards in place
- Observe all speed restrictions indicated on brushes
- Appropriate protective clothing and equipment must be used
- Brushes should be carefully checked when removed from the original carton. Do not use if rusted or damaged
- Store brushes in the original carton. Wire brushes should not be exposed to heat, high humidity, acids, fumes or liquids that can result in deterioration of the wire filaments, and subsequently, premature failure of the wires. Also, check for distortion of brush fill that can cause imbalance and excessive vibration when the brush is running
- Check maximum spindle speed. Do not mount and operate the brush if spindle RPM exceeds the maximum safe free speed for which the brush is rated. Spindle length should be sufficient to permit a full nut mounting
- Before starting the machine, rotate the wire brush with a gloved hand to determine that the brush has been correctly mounted and turns freely

# WIRE BRUSHES FOR BENCH GRINDERS

## FEATURES

- Wheel brushes are ideal for removing corrosion, rust, hardened paints & hard adhesive residues
- Twist Knotted Wire is ideal for heavier applications
- Crimped Wire is ideal for lighter applications

## BENEFITS

- Can be used universally on all kinds of applications (tubes, corners, angles)
- Good surface finish, especially smaller diameter wheels
- Good price/performance ratio

## WHEEL BRUSHES (WHB)

# WIRE BRUSHES FOR ANGLE GRINDERS

## FEATURES

- Larger diameter brushes for heavier applications
- Smaller diameters brushes for finer applications
- Twist Knotted Wire is ideal for pipes

## BENEFITS

- Excellent performance for deburring, removing rust, paint & corrosion and weld scale spatter
- Almost spark free and lower thermal impact
- Good price/performance ratio
- Uniform brushing, even in difficult-to-reach areas

## BEVEL BRUSHES (BEB) WITH SAFETY GUARD

Specially designed for brushing hard-to-reach places such as edges and corners, offering higher:

- **PROTECTION AND VISIBILITY**  
The guard acts as a shield that prevents wire, dust and any other kind of projections from reaching the user during work.
- **FLEXIBILITY**  
The adaptability of the material of the guard makes the brush suitable for work not only on open surfaces but also on difficult areas.

# WIRE BRUSHES FOR ANGLE GRINDERS

## CUP BRUSHES (CPB) WITH SAFETY GUARD

### TWIST KNOTTED WIRE

Aggressive model for high speed brushing in metalwork such as roughening, removing rust, paint & corrosion and weld scale spatter. Ideal product for brushing larger surfaces offering higher:

- PROTECTION AND VISIBILITY  
The guard acts as a shield that prevents wire, dust and any other kind of projections from reaching the user during work.
- FLEXIBILITY  
The adaptability of the material of the guard makes the brush suitable for work not only on open surfaces but also on difficult areas.

CPB	65	M14	0,50	T20	12	66261103171

### CRIMPED WIRE

Multi-purpose model for cleaning jobs, especially on larger surfaces. It is ideal for removing rust, corrosion, paint & primers, offering higher:

- PROTECTION AND VISIBILITY  
The guard acts as a shield that prevents wire, dust and any other kind of projections from reaching the user during work.
- FLEXIBILITY  
The adaptability of the material of the guard makes the brush suitable for work not only on open surfaces but also on difficult areas.

# WIRE BRUSHES FOR HAND DRILLS

## FEATURES

- Ideal for medium force brushing
- Available in crimped and knotted wire
- Inox wire contains less oil

## BENEFITS

- For difficult-to-reach areas (holes, tubes)
- Steady brushing
- Knotted wire for heavy brushing, crimped wire for normal brushing

# TUNGSTEN CARBIDE BURRS

State of the art, "Inox" & "Steel" cut styles, new round edge burrs and fiberglass routers brings innovation to the Norton Carbide burr offering. The specially designed geometries suit the growing market demands for stainless steel, steel, cast steel and composites applications offering fast stock removal and long service life, providing optimum efficiency.

This extended line of carbide burrs covers a variety of teeth and cutting shapes providing optimum adaptation to the key characteristics of various application materials.

Carbide burrs can be used on with hand-held tools or CNC machines. Each carbide burr is packed individually in a plastic case.

## APPLICATIONS & MARKETS

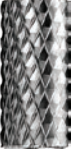

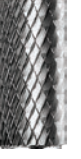

- Weld removal
- Chamfering
- Weld preparation
- Deburring
- Aerospace
- Automotive
- Shipbuilding
- Foundry
- Aviation

## UNDERSTANDING THE PRODUCT

### BURR DIMENSIONS & DESCRIPTION

A	16,0	x	25,0	6x65	DTECH
Shape	Head diameter		Head length	Shank diameter & overall burr length (OL)	Cut style
	$D_1$		$L_1$	$D_2 + L_2$	

## APPLICATION BY CUT STYLE

						
Cut Style	INOX	STEEL	DTECH Double Cut Extra	D Double Cut	ALU Aluminium Special	Fiberglass routers
Qualities	Developed cutting geometry - generating high stock removal on stainless steel and on Ferritic, Austenitic & Martensitic based materials, ensuring production savings and reduced downtime, reducing heat buildup at the cutting edge and work piece.	Specially designed geometry to suit growing market demands for steel and cast steel applications, producing large chips with increased stock removal.	Better stock removal. Stronger tooth formation (decreased tooth wedge angle) longer tool life and reduced chipping.	Universal cutting style, fast material removal, smooth finish and granular chip break.	For deburring of aluminium alloys & plastic wide tooth formation, easy chip flow.	Best for Carbon or Glass fibre reinforced materials. Best for roughing and contouring composite.

## RECOMMENDED OPERATING SPEEDS (RPM)

MATERIAL TYPE	∅	∅	∅	∅	∅
	3mm	6mm	10mm	12mm	16mm
Steel	60000-90000	45000-90000	30000-40000	22500-30000	18000-24000
Tempered steel	60000-90000	30000-45000	19000-30000	15000-22500	12000-18000
Stainless steel	60000-90000	30000-45000	19000-30000	15000-22500	12000-18000
Casting	45000-90000	22500-60000	15000-40000	11000-30000	9000-24000
Titanium	60000-90000	30000-45000	19000-30000	15000-22500	12000-18000
Nickel	60000-90000	30000-45000	19000-30000	15000-22500	12000-18000
Copper & copper alloys	45000-90000	22500-60000	15000-40000	11000-30000	9000-24000
Aluminium	30000-90000	15000-70000	10000-50000	7000-38000	6000-30000
Plastics	30000-90000	15000-70000	10000-50000	7000-38000	6000-30000
Carbon or glass fibers	64000-117000	32000-59000	19000-35000	16000-30000	12000-22000

Recommended speeds are for standard shank length of 45mm, maximum overhang 10mm. Maximum recommended speed for extra long burrs is 15000 RPM.

## RECOMENDATIONS FOR USE

- It may be necessary to adjust the rates shown to achieve optimum performance
- Running below the optimum speed will encourage chipping
- Harder materials or sticky metals such as, titanium, require slower speeds
- Running above optimum speed will cause tooth wear
- Smaller burrs require faster speeds
- Allowing the tool to become too hot may cause the braze to melt and detach the head of the shank
- Apply constant movement and light pressure when in use
- Do not sink the burr for more than one third of its periphery

## CARBIDE BURRS FOR STAINLESS STEEL

### FEATURES AND BENEFITS:

- Special cut style "INOX" for higher stock removal and reduced heat build up at the cutting edge and workpiece
- Aggressive cut creating large chips ensures production savings and reduced downtime

## CARBIDE BURRS FOR TITANIUM, NICKEL, COPPER AND COPPER ALLOYS

### BEST +++++

#### FEATURES AND BENEFITS:

- "D" Double cut style COATED with TiALN (Titanium aluminium nitride) for better sliding characteristics, improved removal of chippings, less wear of tothing, Less heat build up and reduction of cutting pressure due to improved lubrication.

### BETTER ++++

#### FEATURES AND BENEFITS:

- "D" Double CUT style, universal cutting style for fast material removal, smooth finish and granular chip break.
- Sharp cutting edges for improved productivity & longer product life.
- Available on a wide variety of shapes and sizes.

## CARBIDE BURRS FOR ALUMINIUM

**BEST +++++**

### FEATURES AND BENEFITS:

- "ALU" cut syle COATED with TiALN (Titanium aluminium nitride) for better sliding characteristics, improved removal of chippings, less wear of toothing, Less heat build up and Reduction of cutting pressure due to improved lubrication.

**BETTER ++++**

### FEATURES AND BENEFITS:

- Cut style "ALU" for deburring of aluminium alloys & plastic. Wide tooth formation for easy chip flow .

## FIBERGLASS ROUTER

BEST +++++

### FEATURES AND BENEFITS:

- Best for trimming, routing and pocketing applications on composite, Carbon and Glass fibre reinforced materials
- Can be used on various material with hand-held tools or CNC machines
- Special cut style allows precise machining. Select the different tooth geometry to drill (plunge) into the material or optimal facing application

# CLEANING & POLISHING PRODUCTS

Norton cleaning & polishing products are designed to provide excellent results, save time and increase efficiency. Pure Ice Q175 and Norton Ice combined with Liquid Ice provide a complete system to achieve a flawless finish. The exceptionally uniform cut of Pure Ice Q175 provides a consistent finish that significantly reduces polishing time. Using Liquid Ice produces an exceptionally fine finish. Get the job done faster and right the first time. New Norton Ice foam backed discs are ideal for polishing out faster on spot repair applications. When only the perfect finish is acceptable, use the new Liquid Ice polishing compounds and accessories. By reducing the number of polishing steps required, Liquid Ice Xtra Cut, Quick Cut and OEM are a practical solution to improve productivity and quality of work.

## APPLICATIONS & MARKETS

- Automotive
- Marine

## NEW PURE ICE FILM DISCS Q175

BEST +++++

**PUREice**

A strong, thin film backing with premium aluminium oxide abrasive and a patented resin technology sands flat, resists loading, lasts long and cuts consistently for a finish that's faster to buff out. A superior no-fil coating means loading is minimised for even longer sanding life.

### FEATURES

- Patented resin technology
- Consistent, water-based No-Fil stearate application
- Ultra-thin film backing for maximum flexibility
- R&D integral design of film backing and unique resin system
- Colour coded grits

### BENEFITS

- Excellent grain adhesion for long life and consistent cut
- Resists loading to extend disc life and eliminate pigtails
- Even surface provides a very consistent finish that is easier to buff out
- Can conform to irregular surfaces
- Discs stay flat for a superior surface finish
- Easy identification of grit and application

### MOUNTING

For better results, use with the Norton Soft interface pad.  
For detailed information see page 193.

**NEW** NORTON ICE DISCS Q255

BEST +++++

*ice*

New improved Norton Ice foam backed discs are ideal for polishing out even faster on spot repair applications. The new 'open mesh' backing technology absorbs water and moulds to the surface for equal pressure distribution. Norton Ice also provides a uniformed cut throughout the product life, with a smooth finish and lower scratch depth for a high quality finish.

**FEATURES**

- Ultra fine grits available 1500, 2000 & 3000
- Colour coded discs
- Foam backing absorbs water and moulds to the surface for equal pressure distribution

**BENEFITS**

- Uniform cut throughout product life
- Smooth finish and lower scratch depth
- Requires less effort during the application
- Easy grit identification
- Washable and waterproof
- Reusable
- High quality finish
- Use by hand on difficult to reach areas

DIMENSIONS (mm)	COLOUR	GRADE	ART NO.	PK QTY	BOX QTY

	Green	3000	66623324954	15	60

**APPLICATION TIP**

Use Pure Ice and Norton Ice discs with Liquid Ice polishing compounds and Blue Magnet microfibre cloth to achieve a professional high shine finish.

## IMPROVED POLISHING SOLUTIONS

**LIQUID**  
**ice**

When only the perfect finish is acceptable, use Liquid Ice polishing compounds and accessories. By reducing the number of polishing steps required, Liquid Ice Xtra Cut, Quickcut, and OEM are a practical solution to improve productivity and quality of work.

### FEATURES

- 0% silicone
- Waterbased
- Easy to use single and dual step processes

### BENEFITS

- Contamination free
- Environmentally friendly
- Reduces polishing and buffing time

### APPLICATION TIP

A polished finish can be achieved on most common clear coats using only Liquid Ice Xtra Cut, single step process. Use the single step process for quick applications and good results. If holograms appear or if a higher gloss finish is required (on black, metallic or pearl coating), use Liquid Ice Quick Cut and OEM, dual step process. The dual step process gives accurate results and an exceptional finish.

## SINGLE STEP PROCESS

	POLISHING - 1 STEP REMOVE SCRATCHES AFTER 2000 OR FINER	PROTECTION REMOVE EXCESS COMPOUND RESIDUE & PAINT PROTECTION
SINGLE STEP PROCESS	<p>Liquid Ice Xtra Cut + OR + Red Backed White Flat Cutting Foam or Norwool + Red Microfibre Cloth</p> <p>+ CUT INDICATOR - - GLOSS INDICATOR +</p>	<p>Detailer Spray + Black Microfibre Cloth</p>

## DUAL STEP PROCESS

	POLISHING - STEP 1 REMOVE SCRATCHES AFTER 1500	POLISHING - STEP 2 REMOVE HOLOGRAMS & IMPROVE GLOSS (DEEPER COLOUR)	PROTECTION REMOVE EXCESS COMPOUND RESIDUE & PAINT PROTECTION
DUAL STEP PROCESS	<p>Liquid Ice Quick Cut + OR + White Backed White Waffle Cutting Foam + White Microfibre Cloth</p> <p>+ CUT INDICATOR - - GLOSS INDICATOR +</p>	<p>Liquid Ice OEM + Black Backed Black Finishing Flat Foam + Black Microfibre Cloth</p> <p>+ CUT INDICATOR - - GLOSS INDICATOR +</p>	<p>Detailer Spray + Black Microfibre Cloth</p>

## LIQUID ICE - XTRA CUT

**SINGLE STEP  
PROCESS**

Remove in a single step scratches after grade 2000 and finer, use with hard foam or Norwool lambswool for best results. Only one single step is required for the most common top clear coat applications, for high gloss finishing and fast application.

ART NO.	VOLUME	PK QTY
66623339742	1 Litre	6 bottles

## IMPROVED SYSTEM LIQUID ICE - QUICK CUT

**DUAL STEP  
PROCESS**

Polish after grade 1500, use with hard foam or Norwool lambswool for best results. Follow with OEM and black backed finishing foam to achieve a perfect gloss finish.

ART NO.	VOLUME	PK QTY
66254429419	1 Litre	6 bottles

## LIQUID ICE - OEM

To remove holograms and clouds and improving gloss for a final finish.

ART NO.	VOLUME	PK QTY
66261191537	1 Litre	6 bottles

## IMPROVED FOAM POLISHING HEADS

The unique combination of density and softness is ideal for polishing and improving shine. The open cell design allows the compound to flow in and is held during use with little or no splattering.

### APPLICATION TIP

For the best comfort in application, use the super comfort support pad.

## FINE LINE TAPE

BEST +++++

### FEATURES

- Used where there is resistance flakes
- Conforms to contours, irregular shapes and surfaces
- Performs in temperatures of up to 150°C for approx 30 minutes
- Easy to use
- One thickness for all

### BENEFITS

- Follows lines without wrinkling or tearing
- Leaves a sharp, clean separation line
- No adhesive residue
- Longer lasting
- Minimum build up
- Longer rolls compared to competitor products (55m)

Applications:  
Delicate paint work

## FOAM TAPE STANDARD

BETTER ++++

Applications:  
Car body repair,  
preparation before  
spraying, all car  
door openings

### FEATURES

- Recessed adhesive, no paint edge & no rubbing down
- Dimensions available:  
13mm x 50m, 19mm x 50m

### BENEFITS

- Quick and easy protection of painted edges

DIM WxL	PK QTY	ART. NO.
13mmx50m	1	66254470735
19mmx35m	1	66254470744

### SPEC CHECK

Thanks to its new features, the premium foam tape will ensure perfect job:

- Highly absorbent to avoid any leaking runs of paint.
- Flat and unique size to fit all gap adjustments and to allow to fix having the adhesive hidden.
- Consequently, when removed after spraying, there will be no defect and no need to rework upon removal.

## DOUBLE SIDED FOAM TAPE

Applications:  
Marine, Car body repair,  
Truck, Train

### FEATURES

- High density foam coated with high strength acrylic
- Bonds medium to large mouldings and accessories

### BENEFITS

- Instant pressure sensitive bonding
- Does not absorb moisture
- Superior adhesion to plastics, metal, glass and paint
- Remains flexible at low/high temperature
- Conforms to irregular surfaces

519 Single Use Gloves  
520 Glasses

522 Overalls

# INTRODUCTION

From Norton, the world's leading abrasive brand, comes a new range of personal protection equipment designed to provide the highest standard of protection in the workplace. Through understanding our customers needs and requirements for a safer working environment, we are able to deliver a valuable, effective solution for applications in multiple industries.

## STANDARD SAFETY REGULATIONS

All products in the range adhere to the most stringent European directives and regulations. Our responsibility to our customers, particularly in the area of safety and comfort is taken very seriously. Products are designed and produced to the most rigorous quality standards to guarantee optimum personal safety and user comfort. In addition, Norton prides itself on having an environmentally friendly approach to caring for the environment, which is a fundamental part of corporate Saint-Gobain culture.

## AN OVERVIEW OF THE RANGE

- Respiratory Masks (various protection levels)
- Premium safety glasses
- Standard safety glasses
- Latex single use gloves
- Nitrile single use gloves
- Painting overalls
- Bodyshop overalls

## STANDARD SAFETY REGULATIONS

Protection against major hazards: Respiratory protective devices are PPE Class 3:

- The hazard may be serious, irreversible or fatal
- The design is complex as defined by the directive
- Certification is provided by an approved body with a CE-type examination combined with a quality control system for production
- Marking is regulated, with additional markings according to the standard in force at the time of the product's certification

### NORTON UPHOLDS THE FOLLOWING EUROPEAN DIRECTIVES FOR RESPIRATORY MASKS:

- Directive 89/656/CEE of 30 November 1989: on the use of PPE by workers. It stipulates the employers' obligations
- The PPE required for work must be provided free of charge
- PPE must comply with the legal provisions in force
- The employer must have, at its disposal, the information needed for proper use of the product. The rules and conditions of use must be defined
- The user must be informed, and training provided
- Directive 89/686/CEE of 21 December 1989: on the design, market entry, free circulation of PPE within the European Union. This Directive has evolved and been modified by 95/58/CEE
- The essential requirements to be met by PPE in order to be put on the European market
- The specific texts provide a classification with regard to hazards

### SINGLE USE RESPIRATORS AND DUAL CARTRIDGE RESPIRATOR MASK

#### DISPOSABLE MASK

**EN149:** Filtering half-masks (single use) for protection against particulates. There are three protection classes: FFP1, FFP2, FFP3.

#### SEMI DISPOSABLE MASK

**EN405:** Filtering masks with valves for protection against gases or against gases and particulates.

#### GASES VAPOURS: FOR EACH TYPE OF CONTAMINANT THERE IS A DEDICATED FILTER

**A:** Gases and organic vapours, including boiling points above 65°C e.g.: Solvents, hydrocarbons, etc.

**AX:** Gases and organic vapours, including boiling points below 65°C.

**P:** Particulates, dust.

## STANDARDS AND LEGISLATION FOR GLASSES

Directive 89/686/EEC (Design) describes the essential requirements to be met in order to sell protective glasses on the European market.

PPE from the European Union must bear a marking testifying to its compliance with Directive 89/686/EEC. All our glasses complies with Directive 89/686/EEC and EN 166 which describes "Technical Performance standards". Our premium glasses complies with the EN 175 which describes "equipment for eye and face protection during welding and allied process".

The "CE" marking appears on the smallest packaging unit.

# RESPIRATORY MASKS

All Norton respiratory masks offer state of the art design, protection and comfort. The Dual Cartridge mask offers improved vision, adjustable head straps, and a form guard to maintain mask shape and cleanliness. All Norton masks protect against dust and potentially harmful gasses found in the automotive refinish, marine, aerospace, metal work and wood work markets.

## DUAL CARTRIDGE RESPIRATOR MASK MODEL 2016

### FEATURES

- Soft, non-allergenic material
- Patented hygienic form guard
- Low profile cartridge
- Cradle suspension and adjustable head straps

### BENEFITS

- Smooth and comfortable on the face
- Maintain shape and cleanliness after use
- Improved vision
- Proper and comfortable fit

MASK (mm)	ELASTIC LxTxW (mm)	PROTECTION LEVEL	QTY PER BOX	SELLING UNIT	ART NO.
Inferior part Width 112 Height 134	605x1,5x12	A2P2	12	12	66254482016

EN405:2001+A1:2009

## USAGE ADVICE

Place the respirator over the mouth and nose, then pull the head harness over the crown of the head.

Attach the bottom straps behind the neck.

Tighten top strap by pulling on ends to obtain a secure and comfortable fit. Tighten bottom straps by pulling on ends or loosen by pushing out on buckle tab.

Check respirators each time you enter a contaminated area.

## PARTICULATE FILTER PAD REPLACEMENT MODEL 2017

Use with the Dual Cartridge mask (model 2016) to protect against dust and gases. Filter replacement pads are low maintenance and can be frequently replaced to prevent replacing the mask itself.

PROTECTION LEVEL	QTY PER BOX	SELLING UNIT	ART NO.
P2	12	12	66254482017

EN405:2001+A1:2009

## RESPIRATORY MASK WITH VALVE MODEL 2020

Single use protection mask FFP2D SL, protects against low toxicity solid and liquid aerosols in concentration of up to 12xOEL. Protects against calcium carbonate, ferrous metal, hardwood, glass fibres, plastic, quartz, copper and aluminium. Not for use when oxygen concentration is less than 17% vol.

### FEATURES

- Expiration valve
- Polypropylene filter media
- Wire moulding

### BENEFITS

- Allows easier breathing
- Maximum protection every time
- High filtration efficiency
- Shapes to the form of the nose

EN149:2001+A1:2009

# SINGLE USE GLOVES

Nitrile and latex gloves are designed for handling chemical and non-chemical compounds in the automotive refinish, marine, aerospace, metal work and wood work markets.

## CERTIFICATIONS

- Certification ISO 9001:2000 + ISO 13485:2003
- Conformity to technical standards EN 455-1 (pinholes detection) + EN 455-2 (physical properties) + EN 455-3 (biological evaluation) + Pr EN 455-4 (shelf life determination)
- Mark according to European Directive 93/42/EEC

## NON-STERILE NITRILE GLOVES MODEL 2022

Disposable gloves, designed for handling chemical compounds, powder-free and resistant to disinfectants.

### FEATURES

- Latex free, synthetic nitrile rubber
- Ambidextrous shape

### BENEFITS

- Prevents skin irritation
- Fits all hand sizes

SIZE	QTY PER BOX	SELLING UNIT	ART NO.
Medium	100	100	66623398849
Large	100	100	66254482022
Extra Large	100	100	66623398850

## NON-STERILE LATEX GLOVES MODEL 2023

Disposable gloves for handling non-chemical compounds, powder-free and resistant to disinfectants. Minimum protection level 50µg/g.

### FEATURES

- Natural rubber latex
- Ambidextrous

### BENEFITS

- Prevents skin irritation
- Fits all hand sizes

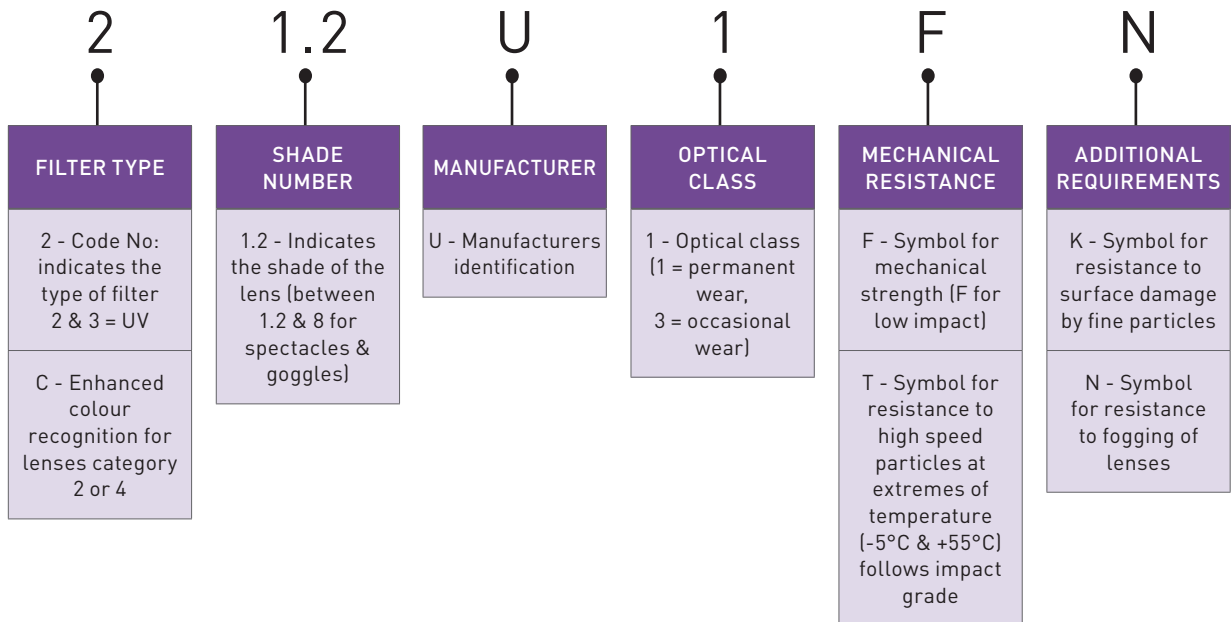

SIZE	QTY PER BOX	SELLING UNIT	ART NO.
Medium	100	100	66623398847
Large	100	100	66254482023
Extra Large	100	100	66623398848

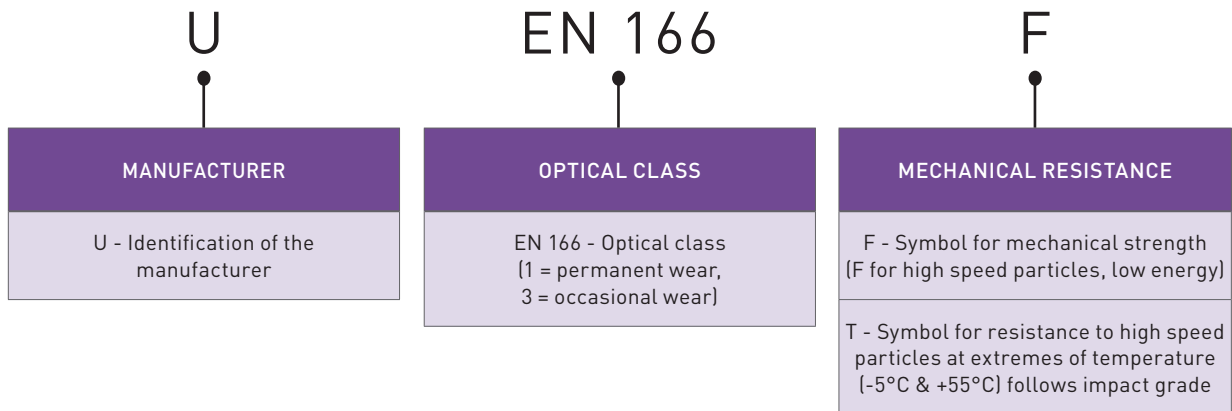

# GLASSES

Providing eye protection for metal, welding, cutting, grinding and sanding applications. Adjustable hinges on Premium glasses allow for comfortable use with respiratory masks.

## UNDERSTANDING LENS MARKING

## UNDERSTANDING FRAME MARKING

## SAFETY GLASSES: PREMIUM MODEL 2024

Provides optimum eye protection during welding and metal applications

### FEATURES

- Adjustable hinges
- Frame & lens marking
- Hydrophobic coated lenses

### BENEFITS

- Comfortable use with respiratory masks
- Quality & safety assurance

QTY PER BAG	SELLING UNIT	ART NO.
1	10	66254482024

EN 175

## SAFETY GLASSES: STANDARD MODEL 2025

For general purpose applications

### FEATURES

- Frame & lens marking

### BENEFITS

- Quality & safety assurance

QTY PER BAG	SELLING UNIT	ART NO.
1	10	66254482025

EN 166

# OVERALLS

Protect clothes from paint, dust and damage with Norton overalls. Overalls are washable and reusable and available in medium, large and extra large sizes.

## PAINTING OVERALLS

### FEATURES

- Polyester material
- Anti-static

### BENEFITS

- Breathable
- Washable and reusable
- Easy to wear

MODEL	SIZE	QTY PER BOX	ART NO.

# CUTTING-OFF & GRINDING WHEELS

## TECHNICAL INFORMATION

### SHAPE SPECIFICATION SYSTEM

BF 27	BF 29	BF 41	BF 42
			
DEPRESSED CENTRE GRINDING WHEELS	DEPRESSED CENTRE GRINDING WHEELS	FLAT CUTTING-OFF WHEELS	DEPRESSED CENTRE CUTTING-OFF WHEELS
Available in diameters 76-230mm for hand-held machines.	Available in diameters 115mm & 125mm for hand-held machines.	Available in diameters 40-400mm for hand-held machines & 250-400mm for stationary machines.	Available in diameters 76-230mm for hand-held machines.
Application: grinding	Application: grinding	Application: cutting-off	Application: cutting-off

## RECOMMENDED PRACTICE

### PORTABLE GRINDERS

#### GRINDING ROUGH WORK

- Do not use a cutting-off wheel for snagging
- Do not work with the side of a wheel, you will cut the reinforcing cloths
- Work at an angle of 10 to 30° with a longitudinal action

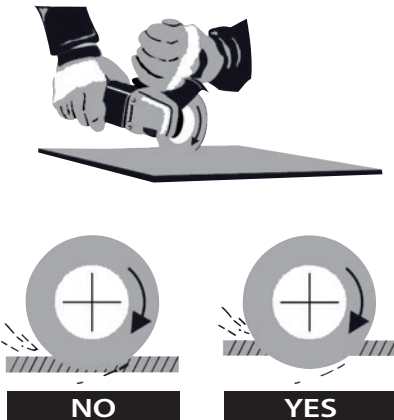

#### GRINDING FINISHING WORK

- Angle of work 15°
- Rotary action

#### CUTTING-OFF

- Arrange the workpiece so that a uniform section can be cut

## FIXED MACHINE

### DOWNSTROKE HEADS

- Lay out the shape parts in order to have a constant section
- Avoid any wedging of the grinding wheel
- Make sure the wheel is cleared

### AUTOMATIC FEED

- In the case of thick parts, use the reciprocating motion of the carriage

### OSCILLATING HEADS

#### OPERATING MODE

1. Oscillating
2. Cutting-off

Do not use this type of machine with a downstroke action

## METAL RING WITH VALIDITY DATE

V = VALIDITY DATE (PRODUCTION QUARTER + 3 YEAR)

V01	V04	V07	V10
1st quarter	2nd quarter	3rd quarter	4th quarter

#### EXAMPLE:

V04/2019 indicates production in the 2nd quarter of 2016 and advised usage before the 2nd quarter of 2019

## PERSONAL PROTECTION

Safety goggles, ear defenders, safety gloves, dust masks and, if conditions are severe, additional face protection. Leather aprons and safety shoes must be worn.

Mouth  
Protection

Wear  
Gloves

Eye  
Protection

Ear

## GENERAL PRECAUTIONS

Safety instructions provided by the machine manufacturers must be followed. Where fitted, all guards, covers and hoods must be in place on the machine during grinding, and should not be modified in any way. Abrasives should not be used near inflammable material or in an environment where there is a risk of explosion.

Sparks should be directed away from the face and body, if possible towards the floor. Dust extraction equipment must be used whenever it is available. The instructions for use given by the abrasive manufacturer must be followed e.g. 'Not to be used without a support', or 'Not to be used for wet grinding'. The workpiece must be firmly fixed before grinding starts. Check all abrasives visually before use and make certain that the product is suitable for the application. No modifications should be made to abrasive products after delivery.

When using a portable grinder always switch it off and allow the spindle to stop completely before putting the tool down. Wet grinding should only be carried out on machines designed for this purpose and with abrasives designated as suitable for this type of operation.

## OPERATING SPEEDS

Norton products are designed and tested for certain applications and operating speeds. Choose a wheel suitable for the application material. Suitable materials are indicated on the wheel label. Before mounting the grinding or cutting-off wheel on the machine, ensure that the operating speed of the machine does not exceed the maximum operating speed as it is marked on the product.

WHEEL DIAMETER (mm)	SPEED CONVERSION FOLLOWING EN 12413								
	MAXIMUM OPERATING SPEED (RPM)								
	35	40	50	63	80	100	125	140	160

## TROUBLESHOOTING

### CUTTING-OFF WHEELS

#### WHEEL DOES NOT CUT

Cause	In case of blue cutting: wheel too hard or too thick
Solution	Use softer or Norton Thin Cut wheels, check peripheral speed
Cause	Peripheral speed too low
Solution	Increase rpm up to max. (80m/sec)

#### EXCESSIVE WEAR

Cause	In case of white cutting edge: wheel too soft
Solution	Use harder wheel
Cause	Operating speed too low
Solution	Increase rpm up to max (80m/sec)
Cause	Decrease of rpm during cutting
Solution	Use machine with more power, reduce pressure on the machine

#### CRUMBLED WHEEL EDGE

Cause	Cutting-off wheel used for grinding operations
Solution	Use a grinding wheel for grinding operations
Cause	Workpiece is moving
Solution	Clamp the workpiece properly
Cause	Too much side-pressure
Solution	Add only the radial pressure to the wheel

#### ARBOR HOLE OR CENTRE BREAK OUT

Cause	Wheel sticks in the workpiece/material
Solution	Use more radial pressure & swing the wheel forwards and backwards
Cause	Cutting-off wheel used for grinding operations
Solution	Use a grinding wheel for grinding operations
Cause	Too much side pressure
Solution	Add only the radial pressure to the wheel
Cause	Different diameter top/bottom flange
Solution	Use flanges with the same diameter

## GRINDING WHEELS

### WHEEL DOES NOT CUT

Cause	Wheel too hard, wheelglazing
Solution	Use softer wheel
Cause	Not enough pressure
Solution	Increase pressure
Cause	Machine power too low
Solution	Use machine with more power
Cause	Loading & wheelglazing (non-ferrous)
Solution	Use Norton Alu wheels which counteract loading & wheelglazing

### EXCESSIVE WHEELWEAR

Cause	Wheel too soft
Solution	Use harder wheel
Cause	Too much pressure
Solution	Reduce pressure, let the wheel do the grinding
Cause	Decrease of peripheral speed
Solution	Use machine with more power, reduce pressure on the machine
Cause	Too low peripheral speed
Solution	Max. 80m/sec is optimum speed

### CRUMBLED WHEEL EDGE

Cause	Grinding angle too flat
Solution	Change angle to 30 - 40°
Cause	Workpiece is moving
Solution	Clamp the workpiece properly
Cause	Too much pressure
Solution	Reduce pressure, let the wheel do the grinding

### CRACKS ON THE BOTTOM OF THE WHEEL

Cause	Contact area too large
Solution	Reduce contact area
Cause	Too much pressure
Solution	Reduce pressure, let the wheel do the grinding

### UNBALANCE

Cause	Dirty flanges
Solution	Clean flanges
Cause	Wheel mounting insecure
Solution	Tighten flanges
Cause	Flanges with different diameter
Solution	Replace flanges

## SAFETY ADVICE

### D0s

✓	D0	Always handle & store wheels carefully. Cutting-off wheels should be stacked horizontally & flat, preferably on a steel base plate. Depressed centre wheels should be placed on top of each other or stored in the original packaging
✓	D0	Always visually inspect all wheels before mounting for possible damage in transit
✓	D0	Always use a safety guard & ensure that it is correctly positioned & securely fitted. It should cover at least one half of the wheel & protect the operator in the unlikely event of a wheel breakage. <b>NON-REINFORCED CUTTING-OFF WHEELS SHOULD ONLY BE USED ON FIXED MACHINES &amp; SHOULD BE CORRECTLY GUARDED.</b>
✓	D0	Always switch 'OFF' the power at supply source &/or remove the plug from the socket before changing the wheel
✓	D0	Always ensure that the spindle speed of the machine does not exceed the operating speed marked on the wheel
✓	D0	Always use the correct wheel mounting flanges & ensure that they are undamaged, clean & free from burrs
✓	D0	SEE EN 12413
✓	D0	Allow newly mounted wheels to run at operating speed, with the guard in place, for a reasonable time before cutting or grinding
✓	D0	Always wear EYE PROTECTION
✓	D0	Always wear appropriate safety clothing such as DUST MASK, GLOVES, EAR PROTECTION, OVERALLS & SAFETY SHOES
✓	D0	Always have machine speeds checked regularly, especially after maintenance or repair. Machines fitted with speed control devices (Governors), must be properly maintained at all times
✓	D0	Check tension of driving belts, where fitted, on a regular basis. Belts must be kept tight to ensure full power transmission.
✓	D0	Always secure the workpiece firmly while it is being cut or ground
✓	D0	Put portable machines in suitable cradles, when not being used, to avoid damage to the wheel
✓	D0	Always use a portable machine in a comfortable position, where the workpiece is well balanced & the machine is well supported
✓	D0	Grind at an angle above 30 degrees to the workpiece with a depressed centre grinding wheel
✓	D0	Keep the working area around cutting & grinding operations clear. It is very dangerous if an operator trips & falls with an operating machine in his hands

## DON'Ts

X	DON'T	Handle wheels roughly
X	DON'T	Use non-reinforced cutting-off wheels on portable machines
X	DON'T	Store wheels in a damp atmosphere or in extreme temperatures
X	DON'T	Mount a damaged wheel
X	DON'T	Tighten the mounting nut or locking flange excessively. To do so can distort the flanges
X	DON'T	Force a wheel onto a machine spindle
X	DON'T	Use mounting flanges which are incorrect, damaged, dirty or burred
X	DON'T	Use blotters with depressed centre wheels less than or equal to 406mm (EN 12413)
X	DON'T	Use a machine which is not in good mechanical condition
X	DON'T	Use a machine without a wheel guard
X	DON'T	Use wheels without proper ventilation or dust protection equipment
X	DON'T	Apply side pressure to cutting-off wheels. You should not bend the wheel
X	DON'T	Stop the wheel by applying pressure to the periphery or face. Always switch the machine off & allow the wheel to stop revolving
X	DON'T	Allow the wheel to be trapped or pinched in the cut
X	DON'T	Apply excessive pressure onto the wheel so that the driving motor slows down
X	DON'T	Grind on the side of cutting-off wheels or depressed centre wheels below 4,0mm thickness
X	DON'T	Drop or lower a portable machine by the cable or airline onto the floor. A wheel can be easily cracked, if it is put down hard, by the weight of the machine. This is a common cause of wheel breakage
X	DON'T	Grind with a depressed centre grinding wheel at an angle below 30 degrees to the workpiece
X	DON'T	Use a machine in a position where you do not have full control of the machine & you are not well balanced

# COATED ABRASIVES

## TECHNICAL INFORMATION

### WHAT IS A COATED ABRASIVE?

Modern coated abrasives are the product of an extremely technical process developed through many years of research and development. They remain, however, a product composed of three basic elements: a flexible or semi-rigid backing to which abrasive grains are bonded by an adhesive.

### ABRASIVE TYPES

The ideal abrasive grain offers maximum resistance to point wear, yet fractures before serious dulling occurs, thereby satisfying both stock removal and finishing requirements.

#### SYNTHETIC ABRASIVES

- Aluminium oxide is tough and well adapted to grinding high tensile materials, such as carbon steel, alloy steels, tough bronze and hard woods. Wherever toughness (ability to resist fracturing) is the main consideration, aluminium oxide outperforms all other coated abrasive grains
- Silicon carbide is the hardest and sharpest of the minerals used in coated abrasives. Its hardness and sharpness make it the ideal abrasive for sanding non-ferrous metals (aluminium, brass, bronze, magnesium, titanium, etc.), rubber, glass, plastics, fibrous woods, enamel and other relatively soft materials. Silicon carbide is superior to any other abrasive in its ability to penetrate and cut faster under light pressure
- Zirconia alumina has a unique self-sharpening characteristic which gives it long life on rugged stock removal operations. Zirconia alumina is well suited for heavy grinding of metals and planing of wood, because the controlled fracturing of the grain continuously produces sharp, new abrading points
- Ceramic aluminium oxide is a long-lasting, tough, dense abrasive due to its micro structure. The extremely small micron size particles break off during grinding, producing multiple new cutting edges. As it stays sharp, especially when used in medium and high pressure operations, it cuts at a higher rate than other abrasives. Recommended for use on forged and carbon steels, high nickel and cobalt alloys

#### NATURAL ABRASIVES

- Emery is a natural composite of corundum and iron oxide. The particles are blocky in shape and tend to cut slowly, thereby producing a polishing action on the material being abraded. Used for general maintenance and polishing of metals and in very fine grits for highly technical polishing, such as preparing metallurgical specimens requiring very close tolerances. Emery products are black in colour

### ABRASIVE GRAIN DISTRIBUTION

There are two types of abrasive grain coverage on the backing:

- Openly spaced distribution where between 30% and 60% of the backing is covered leaving large spaces between each abrasive grain. It is used in operations where the grinding swarf would otherwise 'load' or clog the surface, reducing cutting efficiency and shortening the coated abrasive life
- Closely packed grain distribution is where the grain completely covers the backing. The greater number of abrading points in a given area leads to faster stock removal. It is recommended where loading is not a problem and where smoother surface finishes are desired

## ABRASIVE GRAIN SIZE

After the crude abrasives have been crushed, the grains are separated (graded) into standard particle sizes using screens carefully made from silk threads of exact size and number per square inch to ensure extreme accuracy. The grit number (mesh number) appearing on the coated abrasive backing represents the number of openings per linear inch in the final screen. Grits 240 and finer, called flours, are graded by hydraulic separators, air classifiers and levigating tanks.

The European standard of grit sizes is the FEPA grading system. All FEPA grit sizes are preceded with the letter 'P', i.e. P180 etc.

In the USA a different grading system called CAMI is used. This chart provides a comparison between FEPA and CAMI grades and also shows average particle sizes in microns and inches.

Additionally, some products produced for the woodworking and floor sanding markets are identified with a 'grit symbol'. Although use of this symbol is infrequent, the backing of these products contain both the mesh number and the grit symbol.

## NARROW BELTS & WIDE BELTS

The results achieved when sanding with belts depends on several factors including:

- The machine condition & available horsepower
- The belt speed
- The grinding pressure
- The contact wheel
- The choice of the belt in relation to the shape of the part & material type
- The use of coolant (when machine & belt allows)

### BELT SPEED

The speed of the belt has a direct relationship with its cut rate, as well as the amount of heat generated, the surface finish achieved, and the stress on abrasive grain. Some abrasives like zirconia alumina and ceramic support much higher stresses because they have a better resistance to uncontrolled fracture. Some materials are more sensitive to heat generation. The chart below gives the recommended speed range according to material.

### RECOMMENDED GRINDING BELT SPEED

Heat sensitive materials, plastics, etc.	5-15m/s	Stainless steel, high-speed steel & tool steel	20-30m/s
Sintered metals & carbides	8-15m/s	Grey cast iron & cast steel	30-40m/s
Titanium & similar alloys	8-15m/s	Carbon steel	30-40m/s
Glass, porcelain & special steel	8-15m/s	Brass, copper, zinc, bronze & tin	25-35m/s
Heat-resistant plastics	20-30m/s	Aluminium & light metal	20-35m/s
Wood	15-30m/s	Varnish	10-15m/s

### GRINDING PRESSURE

The amount of grinding pressure depends on:

- The force used
- The size of the contact area between the belt & the workpiece
- The backing on which the belt runs (generally a contact wheel)

Higher pressure increases the cut rate and the amount of heat generated increases the stress on the individual abrasive grain (a minimum stress is necessary to achieve a controlled fracture of the abrasive grain), and generally generates a rougher finish.

## CONTACT WHEELS

Many machines use contact wheels as a backing for belts. Contact wheels are generally covered with rubber, polyurethane, steel, rubber foam, felt, or compressed canvas, and are classified from soft to hard, with or without serrations. Using a different type of contact wheel has a direct effect on the end results.

- Harder contact wheels provide a higher cut rate, a rougher surface finish & generate a much more uniform surface than softer contact wheels. They are used with stiff belts for a faster cut
- Softer contact wheels provide lower cut rates, a better surface finish & follow the contours of the part. They are generally used for finishing contoured parts or for generating slightly rounded surfaces. They are much less hard wearing on the belt & its joint

The design of the contact wheel will also have an effect on the contact area, which in turn affects grinding pressure.

- Contact wheels with a larger diameter act softer & should generally be used on larger surfaces
- Serrated contact wheels act harder but should generally be used on smaller surfaces

## CONTACT WHEEL TYPES

HARD ←————→ SOFT

Aggressiveness increases as angle increases

Contact surface decreases as lands decrease giving a more aggressive, harder wheel

## JOINT TYPES

Belts are made with a standard joint design best adapted to the product and its main application:

## NORaX AN INNOVATIVE TECHNOLOGY

NORaX is the innovative coated abrasive technology from Norton. The innovation lies in the abrasive layer: a multi-layer coating of abrasive is engineered into a 3D pattern. These patterns give a controlled contact surface between the abrasive and part that optimises belt performance.

NORaX works like a grinding wheel on a cloth backing. As the belt wears, dull abrasive particles are removed from the belt surface to expose a

new layer of sharp abrasives. This continuous replacement of dulled abrasives results in longer life, higher cut rates, and a more consistent surface finish throughout the belt life. Also, contributing to this higher performance, NORaX is also covered with a surface powder grinding aid that increases cut and life while decreasing grinding temperature.

For more information on NORaX please contact your local Sales or Customer Service Representative.

## BACKING TYPES

Whether paper, cloth, vulcanised fibre, a combination or polyester film, the backing must be smooth enough for uniform adhesive coating, strong enough to withstand grinding pressures and flexible enough to conform to contours (if necessary). For reasons of economy, the least expensive backing compatible with the job requirements should be selected.

## PAPER

The standard paper weights used in coated abrasives are indicated by a letter code which appears immediately after the grit size on the finished product backing. Briefly stated, the lighter the backing, the greater the degree of flexibility; the heavier the backing, the greater the resistance to tearing.

### A-weight (70gms)

Light and flexible, A-weight is used primarily for hand finishing operations both wet and dry. Grits 80 and finer.

### C-weight (120gms)

Stronger and less flexible than A-weight. This backing is chosen for hand sanding, dry or wet, and for use on small portable power sanders. Intermediate through fine sanding. Grits 60 through 180.

### D-weight (150gms)

Stronger and less flexible than C-weight. This backing is also chosen for hand sanding and for use on small portable power sanders. Coarse through intermediate sanding. Grits 36 through 80.

### E-weight (220gms)

Stronger and less flexible than D-weight, this backing is used primarily on roll, belt and disc applications where high resistance to tearing is needed.

### F-weight (300gms)

The strongest, least flexible paper backing utilised. Used for crankshaft lapping rolls, tannery industry belts and rolls, and NorZon belts only.

## BACKING TYPES

### CLOTH

Cloth backings are more durable than paper, offer greater resistance to tearing, and tolerate continual bending and flexing during use. Norton use traditional woven cloth in the manufacture of their coated abrasives. The backing has construction and finishing characteristics designed to make it ideally suited to a specific application. The standard cloth weights used in coated abrasives are indicated by a letter code which appears immediately after the grit size on the finished product backing.

#### J-weight

The lightest and most flexible cloth backing, this backing is used where finish and uniformity of the surface are more important than stock removal. Ideal for finishing, blending and where flexibility and conformity are required, such as contour work or curved surfaces.

#### X-weight

Stronger and relatively stiff when compared to J-weight, this backing is used on products designed for coarse grit stock removal applications through fine grit finishing and polishing. Consistent productivity, relatively good finishes and long product life are characteristics of products made on X-weight backings.

#### Y-weight

Stronger and more resistant to longitudinal splitting than regular drills cloth, Y-weight backing is used on products designed for severe applications, such as narrow belt grinding of hand tools and wide belts sanding of lumber and particleboard dimensioning.

### FIBRE

Fibre backings, made of multiple layers of impregnated paper, are very hard and strong, yet provide sufficient flexibility for the intended applications. 0,8mm thick fibre has the greatest strength of any backing used for coated abrasives. This backing is used on resin bonded fibre discs designed for heavy duty portable grinding applications.

### COMBINATION

Combination backing, constructed by laminating light cloth and stiff E-weight paper, is used where resistance to tearing and breaking is a requirement. Primarily utilised on products designed for chipboard/MDF sanding.

### FILM

Polyester is used as the backing media for Norton's range of precision graded microfinishing products. Film backings can be used wet or dry and have excellent resistance to chemical attack, while being tear resistant and durable.

## SPECIAL COATED SURFACE TREATMENT

### NO-FIL TREATMENT

In order to provide even further resistance to loading, some Openkote paper products are given a special surface treatment of zinc stearate after the sizing operation. Such products are ideal for sanding between sealer coats on furniture, sanding after primer coats on automobiles, removing varnish from wood, and numerous other operations where conventional abrasive products fail prematurely due to loading.

Norton's trademark for products utilising this treatment is No-Fil.

## SURFACE FINISH & GRINDING EFFICIENCY VARIABLES

### SURFACE FINISH VARIABLES

Changes in any one of many factors can affect the surface finish generated by a product. The purpose of this chart is to show the effect on surface finish by changes in single factors of product specifications. Arrows have been used to signify the trend direction. The length of the arrows have no significance as the effect of each variable factor will not be the same. The chart is meant to be general in nature and to show direction or trend.

	VARIABLE FACTOR	ROUGH HIGHER RA READING	SMOOTH SURFACE LOWER RA READING
1.	Grit Size	Coarse	Fine
2.	C/A Product Condition	New	Used
3.	Adhesive Bond	Resin	Resin/Glue Glue
4.	Coating Method	Open-Coated	Close-Coated
5.	Product Flex	Single Linear	Double Triple
6.	Contact Wheel Configuration	Serrated	Smooth
7.	Composition	Wider Groove Width Steel	Rubber Wider Width Canvas
8.	Diameter	Smaller	Larger
9.	Belt Speed	Slower	Faster
10.	Grinding Aid	Dry	Water Oil Solubles Straight Oils Grease
11.	Abrasive Mineral Type	Zirconia Alumina	Ceramic Aluminium Oxide Silicon Carbide Emery
12.	Workpiece Hardness	Softer	Harder

## CUTTING EFFICIENCY

Although general in nature, this chart can serve as a useful guide as to what effect a change in a single given factor in the specification will have on the cutting efficiency of coated abrasive products. Arrows have been used to signify the trend direction. The length of arrows has no significance. Some important machine and setup parameters have also been included since they do have significant impact on product performance.

	VARIABLE FACTOR	MORE AGGRESSIVE BETTER CUT	SMOOTH SURFACE LOWER RA READING
1.	Workpiece Feed Speed	Slower ←	Faster →
2.	C/A Belt speed (m/s)	Slower ←	Faster →
3.	Abrasive Product Condition	New ←	Used →
4.	Grit Size	Coarse ←	Fine →
5.	Product Durability	Fibre ←	Cloth →
			Paper →
6.	Abrasive Mineral Type	Zirconia Alumina ←	Ceramic →
			Aluminium Oxide →
			Silicon Carbide →
			Emery →
7.	Adhesive Bond	Resin ←	Resin/Glue →
			Glue →
8.	Coating Method	Close-Coated ←	Open-Coated →
9.	Contact Wheel Configuration	Serrated ←	Smooth →
10.	Composition	Steel ←	Rubber →
			Canvas →
11.	Diameter	Smaller ←	Larger →
12.	Pressure	High ←	Low →
13.	Grinding Aid	Oil ←	Soluble Oil →
			Water →
			Dry →
14.	Workpiece Hardness	Softer ←	Harder →

## SAFETY ADVICE

### SAFETY IN THE STORAGE & USE OF COATED ABRASIVES

#### TRANSPORT & STORAGE

All coated abrasives should be handled carefully. Damage can be caused by mishandling, which should be avoided.

Coated abrasives should be stored in dry, frost free conditions. They should be kept away from heat sources, cold, damp walls, doors or windows and should not be in direct contact with the floor. Temperatures and humidity should be between 18°C and 22°C and 45%-65% relative humidity. Coated abrasives should not be exposed to direct sunlight. Products should be kept in their original packaging until immediately before use. Once unpacked, they should be stored in a way which avoids distortion.

#### PERSONAL PROTECTION

Safety goggles, ear defenders, safety gloves, dust masks and, if conditions are severe, additional face protection. Leather aprons and safety shoes must be worn.

#### GENERAL PRECAUTIONS

Safety instructions provided by the machine manufacturers must be followed. Where fitted, all guards, covers and hoods must be in place on the machine during grinding, and should not be modified in any way. Abrasives should not be used near inflammable material or in an environment where there is a risk of explosion.

Sparks should be directed away from the face and body, if possible towards the floor. Dust extraction equipment must be used whenever it is available. The instructions for use given by the abrasive manufacturer must be followed e.g. 'Not to be used without a support', or 'Not to be used for wet grinding'. The workpiece must be firmly fixed before grinding starts. Check all abrasives visually before use and make certain that the product is suitable for the application. No modifications should be made to abrasive products after delivery.

When using a portable grinder always switch it off and allow the spindle to stop completely before putting the tool down. Wet grinding should only be carried out on machines designed for this purpose and with abrasives designated as suitable for this type of operation.

## TUNGSTEN CARBIDE BURRS

### DOs

✓	DO	Always operate the burr within the recommended speed range
✓	DO	Select the appropriate shape, diameter & cut style for the application
✓	DO	Ensure the appropriate grinder is used & that it is regularly maintained
✓	DO	Fix the maximum length of the burr in the collet (recommended max 10mm overhang)
✓	DO	Check that the burr is running true in the grinder before use
✓	DO	Securely fix workpiece & hold the grinder firmly
✓	DO	Use a smooth cutting action with constant movement in both directions. Use light pressure, letting the burr do the work
✓	DO	For best finish, always end on a reverse stroke

### DON'Ts

✗	DON'T	Run burr above the Maximum Operating Speed
✗	DON'T	Run burr too slowly (refer to recommended speed guide)
✗	DON'T	Allow burr to be exposed to excessive mechanical or thermal shock
✗	DON'T	Sink the burr to more than one-third of its periphery
✗	DON'T	Jam the burr into grooves, crevices & cavities
✗	DON'T	Allow burr to become too hot, causing braze to weaken (applies to burrs where head diameter is greater than shank diameter)
✗	DON'T	Apply shock or excessive force to the product or let it overheat

# BEARTEX

#### SPEC CHECK

Did you pick the most efficient solution?

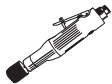

The most cost effective method usually involves getting the job done fast and efficiently.

The most dramatic savings come from labour expenses, rather than material costs.

Warning - Do not use a product which was not designed specifically for that tool.  
Always verify that the speed rating of the product meets or exceeds the rating of the tool!

#### SPEC CHECK

Starting point recommendations can vary depending on the level of aggression required, by choosing a different product grade  
Depending upon performance results, other specifications may be substituted on the basis of product testing.  
The best practice is to test at least 2 variations of specifications to obtain the desired result.

Ask your Norton contact for more advice.

## PRODUCT SELECTION- BY APPLICATION

SHORTCUT TO FINDING THE RIGHT PRODUCT...

For deburring or cleaning/finishing, or on completely new operations, the product specifications listed below are recommended as starting points.

Depending upon performance results, other specifications may be substituted on the basis of product testing.

We believe that the best practice is to test at least 2 variations of specifications to obtain the desired result.

### DEBURRING

Medium Burrs	Light Burrs
CONVOLUTE WHEELS	
Series 1000 Long Life 1 - 8 SF C4408	Series 1000 Long Life 1 - 7 SF C4408
or (for extra cut)	
Series 1000 Long Life 1 - 9 SF C4408	
UNITISED WHEELS	
NEX -6AM (or 8AM) U2301	NEX -2SF U4401
For Ti and Aerospace Alloys, use 6SF U4401	
RIGHT ANGLE DISCS	
Surface Blending DSJ or DSB	Surface Blending DSJ
Aluminium Oxide 120 Medium	Aluminium Oxide 320 Very Fine
HAND PADS	
F2302 Heavy Duty Extra Cut Tan Pad	F2504 VFA LL Maroon General Purp Pad

### WOOD CONDITIONING

Sanding and Shaping	Finishing and Rubbing
CONVOLUTE WHEELS	
Series 1000 Long Life 1 - 8 SM C4308	F2801 Micro Fine S Gold Pad

## CLEANING AND FINISHING

Clean / Medium Grain Finishing	Fine Grain Finishing
CONVOLUTE WHEELS	
DSS Surf Fin S/C Med Wheel C4302	DCS Clean/Finish S/C Fine Wheel C4401
or	or
Series 1000 Long Life 1 - 6 SM, C4308	Series 1000 Long Life 1 - 6 SF C4408
UNITISED WHEELS	
NEX -4AF U2401	NEX -2SF U4401
FLAP WHEELS	
Med Grit Aluminium Oxide F2301	Fine Grit Aluminium Oxide F2401
Medium Density Flap Wheel	Medium Density Flap Wheel
HAND PADS	
F2504 VFA LL Maroon General Purp	F2801 Micro Fine S Gold Pad
or	
F4300 Medium S Pad for stainless steel	

## HAND PAD APPLICATIONS

Heavy Duty Cleaning & rust removal	Medium Cleaning	Light Cleaning & Finishing
HAND PADS		
F2302 Heavy Duty Extra Cut Pad Tan	F2504 VFA LL General Purpose Pad Maroon	F2801 Mfine S Pad Gold

## MATERIAL IDENTIFICATION

PRODUCT SHAPE	COLOUR	GRADE	GRIT TYPE	SIZE	FIBRE	STRENGTH
Flastock - Hand Pads - Rolls	White	White Cleaning	None	None	Polyester	Least Aggressive - Most Aggressive
	Green	General Purpose Clean & Scour	Aluminium Oxide	320	Nylon	
	Gold	Micro Fine A	Aluminium Oxide	1000		
	Gray	Ultra Fine S	Silicon Carbide	800		
	Maroon	Very Fine A	Aluminium Oxide	320		
	Maroon	Fine A	Aluminium Oxide	180		
	Maroon	Medium A	Aluminium Oxide	120		
	Brown	Extra Cut	Aluminium Oxide	80		
	Black	Medium S	Silicon Carbide	60		
Bearflex	Gold	Micro Fine A	Fused Alumina	1000	Nylon	
	Maroon	Very Fine A	Aluminium Oxide	600		
	Gray	Ultra Fine S	Silicon Carbide	320		
High Strength	Maroon	Very Fine A	Aluminium Oxide	280	Nylon	
	Maroon	Medium A	Aluminium Oxide	100

Floor Pads Thick Line General Purpose	White	White Super Gloss	None		Nylon	Least Aggressive - Most Aggressive
	Beige	Beige Polish & Burnish	Aluminium Oxide			
	Maroon	Red Buffer	Aluminium Oxide			
	Blue	Blue Super Clean	Aluminium Oxide			
	Green	Green Super Scrub	Aluminium Oxide			
	Black	Black Super Strip	Aluminium Oxide			
Floor Pads Thin Line General Purpose	White	White	None		Nylon	Least - Most Aggressive
	Tan	Tan	Aluminium Oxide			
	Green	General Purpose Pad	Aluminium Oxide			
	Black	Black Strip	Aluminium Oxide			

Finishing characteristics of non-woven abrasives are determined by many attributes in addition to grain size, the data provided here is for reference only - and cannot be considered as a specification of our products.

Sizes - colours are approximate.

## SAFETY ADVICE - DO'S & DON'TS

For your safety you should ensure that you are fully aware of how to safely use abrasives

✓	DO	Read the safety instructions provided by the abrasives and equipment supplier
✓	DO	Store abrasives in dry, frost-free conditions avoiding wide variations in temperature
✓	DO	Ensure that the product is suitable for its purpose
✓	DO	Handle, store and transport products with care
✓	DO	Disconnect the power to the machine before fitting the product
✓	DO	Examine all products before mounting and periodically during use for possible defects or damage (core flatness, fatigue cracks, undercutting, arbor hole damage...)
✓	DO	Check that correct mounting devices are used and that they are clean, undistorted and free from burrs
✓	DO	Ensure that work rests are properly adjusted and secure
✓	DO	Always use a correctly designed and adjusted guard (on belts)
✓	DO	Ensure that the workpiece is secure
✓	DO	Wear appropriate personal protective equipment at all times
✓	DO	Avoid clogging and uneven wear to ensure that the product is working efficiently
✓	DO	Ensure accordance between product direction arrow / machine rotation
✓	DO	Ensure that all machines using abrasives meet the requirements of the current european machinery directives-CE
✓	DO	<p>Be aware of the hazards likely during the use of abrasives and observe the recommended precautions to be taken:</p> <ul style="list-style-type: none"> <li>• Bodily contact with the abrasive product at operating speed</li> <li>• Injury resulting from product breakage during use</li> <li>• Grinding debris, sparks, fumes and dust generated by the grinding process</li> <li>• Noise</li> <li>• Vibration</li> </ul>

## SAFETY ADVICE - DO'S & DON'TS

For your safety you should ensure that you are fully aware of how to safely use abrasives.

<b>X</b>	DON'T	Allow untrained people to use abrasives
<b>X</b>	DON'T	Use a product that is damaged
<b>X</b>	DON'T	Use a product if it cannot be properly identified
<b>X</b>	DON'T	Use a machine that is not in good working order or one with defective parts
<b>X</b>	DON'T	Force the abrasive onto the mounting device or modify the size of the mounting hole
<b>X</b>	DON'T	Exceed the maximum operating speed marked on the product
<b>X</b>	DON'T	Apply shock or excessive force to the product or let it overheat
<b>X</b>	DON'T	Use mounting flanges which are not clean and flat
<b>X</b>	DON'T	Tighten the mounting device excessively
<b>X</b>	DON'T	Start the machine until the guard is in place and fastened securely
<b>X</b>	DON'T	Continue to use a product if vibration occurs. True or replace it
<b>X</b>	DON'T	Grind on the part of the product which is not designed for the operation
<b>X</b>	DON'T	Start the machine with the workpiece in contact with the abrasive product
<b>X</b>	DON'T	Grind material for which the product is not designed
<b>X</b>	DON'T	Stop the abrasive by applying pressure to its surface, let it stop naturally
<b>X</b>	DON'T	Wear loose clothing, ties and jewellery
<b>X</b>	DON'T	Use abrasive products near flammable materials

# BONDED ABRASIVES

## TECHNICAL INFORMATION

### WHAT IS A GRINDING WHEEL?

A grinding wheel is a precision tool with thousands of cutting points. It consists of abrasive grains held in a matrix of bond and separated by pores. The abrasive grains are the cutting points while the purpose of the bond is to hold the individual grains together. The pores (hollow spaces between adjacent abrasive grains and the bond) serve to provide clearance for coolant penetration and metal chips removed in the grinding process.

When the wheel is rotated at grinding speed and applied to the workpiece, the abrasive grains cut the material that is being ground, removing the material in small chips.

Under the action of the forces imposed during grinding the abrasive cutting points are worn flat, resulting in the points becoming blunt. This causes an increase in friction, and a build up of heat.

The increase in grinding forces causes either the abrasive to fracture, exposing new cutting edges, or fractures the bond bridges holding the abrasive grains. In the latter case fresh abrasive grains are exposed to cut the workpiece.

In normal vitrified grinding applications the wheel has to be dressed.

By varying the properties of the abrasive, the type of bond, the make-up of the wheel, it is possible to produce grinding wheels with a vast range of different grinding characteristics.

### ABRASIVES

Modern synthetic abrasives allow accurate control over the physical properties and form of the abrasive grain. This helps to ensure that grinding wheels can be manufactured with consistent cutting properties.

Norton offers a comprehensive selection of abrasive types to provide a wide range of specific grinding characteristics. This is necessary for maximum efficiency in the large variety of operations demanded by the industry today.

#### Abrasive Grain Size

The grain or grit size is most important in determining a wheel's ability to achieve the required surface finish and remove stock. The size is designated by a number which increases as grain size decreases.

For example 10 grit has a median size of about 2,0mm and 60 grit 0,25mm.

Standard sizes are used in all Norton wheels as specified in the European Standards laid down by FEPA.

An ideal grinding abrasive has the ability to stay sharp with minimum point dulling, and when dulling begins it fractures revealing new sharp cutting edges. Abrasive grains used in the manufacture of bonded abrasives come in three main categories.

### UNDERSTANDING THE SPECIFICATION

ABRASIVE			GRIT SIZE			GRADE			STRUCTURE		BOND

## ABRASIVE TYPES

ABRASIVE TYPE	DESCRIPTION
A	This is a particularly tough form of aluminium oxide. Its toughness is due to the presence of 3% of titanium oxide in the abrasive. Fired at low temperature the abrasive retains its natural brown colour. Fired at high temperature further oxidation of the titanium oxide takes place which changes the normal brown colour to a grey-blue. Because of its toughness, regular brown alumina is suitable for grinding high tensile strength materials, specifically off-hand grinding (bench grinding wheels) & sharpening stones.
19A	A blend of A & 38A abrasives. This abrasive gives a grinding action that can be compared to the average of its components. It is supplied in some standard tool room wheels, used for surface, cylindrical, centreless & miscellaneous grinding on less heat sensitive steels.
38A	White fused aluminium oxide (99,8% pure). The most friable & cool cutting of the aluminium oxides. This abrasive is supplied in all types of standard range wheels ideal for use on hard & heat sensitive steels & alloys. It has traditionally been used for sharpening high-speed steel & cast alloy tools & cutters. 38A is used for cylindrical, surface & internal grinding of tools, dies & gauges.
57A	Semi-pure brown fused aluminium oxide (98% pure). The higher purity of 57A makes it a good general purpose abrasive. Its versatility enables it to be used for grinding steel parts in both soft & hard states, especially on large cylindrical & centreless operations. U Treatment (U57A) is a ceramic coating applied to this abrasive to increase its durability in resin bonded cutting-off wheels. It is used in the advanced range resinoid cut-off wheels.
86A	Pink aluminium oxide is a highly refined form of alumina containing a small proportion of chromium oxide. This addition makes 86A a little tougher than pure white, increasing the strength along the shear planes. This abrasive is available in a range of mounted points & wheels.
SGB	A blend of premium abrasives that include a medium concentration of ceramic Norton SG.
3SG	A blend of premium abrasives that include a high concentration of ceramic Norton SG.
5SG	A blend of premium abrasives that include a very high concentration of ceramic Norton SG.
37C	Crystolon silicon carbide abrasive. Supplied mainly in the resin bonds of advanced wheels used for grinding grey iron, non-ferrous metals & in vitrified bonds for grinding non-metallic materials, such as rubber & stone.
39C	Crystolon is the highest purity silicon carbide abrasive. It is ideal for grinding cemented carbide cutting tools, fired ceramics & glass, where it provides advanced performance.

## BOND TYPES

### VITRIFIED

Vitrified bonds are the most common precision grinding bond. Porosity and strength of the wheels made with this bond give high stock removal along with their rigidity helping to attain high precision. Not affected by water, acid, oils or ordinary temperature variations. The most common vitrified bonds are:

V	V is the original high temperature vitrified bond, usually used where tougher acting wheels are required
VS	VS is a very versatile, low temperature, high performance vitrified bond system used in almost all applications but predominately for tool room, centreless, cylindrical, & surface grinding
VTECH	Low temperature, very technical bond, used with conventional abrasives & recommended for high tech applications to maximise performance & dressing parameters
VX	VX bond provides improved corner/form holding for most applications – it is the first choice bond for our premium abrasives
VXP	Induced porosity VX bond suitable for large contact areas & surface grinding

## BOND TYPES

### ORGANIC

These bonds are used in two types of wheels. Firstly, wheels used on portable or fixed machines for the rapid removal of metal. Secondly, cutting-off wheels either un-reinforced or reinforced, for use on portable or fixed machines. The most common organic bonds are:

#### SNAGGING WHEELS & CUPS

B & B3	Foundry wheels: multi-purpose bond that gives satisfactory results on most applications
B28	Foundry wheels: high level bond suitable for most technical applications requiring high powered machines

#### CUTTING-OFF WHEELS

BF1	Specific bond ensuring the best quality of cut in dry or wet conditions
BF3	New generation bond assuring the best wheel life in dry cutting operations; versatile & long wheel life. Ideal for heavy duty operations
B24	New generation bond used on silicon carbide cut-off wheels that gives the best performance & the ultimate cut quality on non-ferrous metals in wet conditions
B25	Standard multi-purpose bond that offers durability & freeness of cut in a wide variety of materials & applications. Can also be used in wet cutting on softer grades
B26	New generation bond used on aluminium oxide cut-off wheels that gives the best performance & the ultimate cut quality on ferrous metals in wet conditions
B65	Traditional bond gives good performance & long wheel life in dry cutting conditions

## WHEEL GRADES

The grade indicates the relative holding power of the bond, which holds abrasive grains in a wheel. This is represented in the specification by letters running through the alphabet from hardest to softest. The following rules should be followed with regard to grade:

#### USE SOFT GRADE

- For hard materials such as hard tool steels & carbides
- For large areas of contact
- For rapid stock removal

#### USE HARD GRADE

- For soft materials
- For small or narrow areas on contact
- For longer wheel life

#### COMMON RANGE OF GRADES

E	F	G	H	I	J	K	L	M	N	O	P	Q	R	S	T	U
					CYLINDRICAL/CENTRELESS											
SURFACE GRINDING																
					ID GRINDING

					THREAD GRINDING											
NON-REINFORCED ORGANIC																
											REINFORCED ORGANIC					

## AVAILABILITY SUMMARY

ABRASIVE TYPE	BOND	ABRASIVE COLOUR
IPA	VTX	White
SGB-3SG-5SG-ES5-1TGP	VX-VXP	Blue
A-19A	VS	Brown
86A	VS-VXP-VTECH	Ruby
38A	VS	White
37C	V-VP	Black
39C	V-VS	Green

## SELECTING THE RIGHT PRODUCT

There are nine main factors to be considered when selecting a grinding wheel for any application:

- The material to be ground – its type & hardness
- The stock to be removed
- The workpiece geometry & surface finishes required
- The grinding machine, the type of machine, the power available & its conditions
- Wheel speeds & feeds
- Grinding contact area
- Grinding fluid – whether the operation is wet or dry
- The severity of the grinding operation
- The dressing method

### MATERIAL TO BE GROUND

The type of material affects the selection of abrasive, grit size and grade. Alumina type abrasives are the most suitable for grinding high tensile materials such as steel and ferritic cast irons. The more friable types of alumina are preferred on harder steels and applications having large arcs of contact.

Low tensile strength materials and non-metallic materials are most efficiently ground or cut with silicon carbide abrasive.

The hardness of the material governs the amount of penetration that can be achieved by the abrasive. For this reason finer grit size wheels are required to grind hard materials and soft materials are best ground with medium to coarse grit size wheels.

For most efficient operation, the grade must be adjusted to suit the hardness of the material. As a general guide, the harder the material, the softer the grade of wheel required.

### STOCK TO BE REMOVED

This affects the choice of abrasive size and bond type.

High stock removal rates, as in fettling operations, require coarse grit wheels, typically 12 to 24 mesh. Fine finishes and tight limits on finished workpiece geometry require finer grit sizes.

Final surface finish is often achieved by 'spark out'. No further infeed is applied and the wheel is allowed to grind until the majority of the grinding sparks cease.

## SURFACE FINISH

Usage Key ● Highly recommended		SURFACE FINISH & GRIT SIZE							
SURFACE	FINISH	GRAIN SIZE							
μ in CLA	μ m Ra	46	60	80	100	120	150	180	220
42	1,10	●							
32	0,80	●							
26	0,70	●							
21	0,50		●						
16	0,40		●						
14	0,35		●	●					
11	0,25		●	●					
8	0,20			●	●				
7	0,17			●	●	●			
6	0,14				●	●	●		
5	0,12					●	●	●	
4	0,10						●	●	●
3	0,08							●	●
2	0,05								●
MIN FORM RADIUS	METRIC (mm)	0,75	0,50	0,40	0,25	0,20	0,18	0,13	0,10
	IMP INS	,030	,020	,015	,010	,008	,007	,005	,004

The achievable surface finish in any grinding operation is highly dependent upon the grit size of the grinding wheel. The following chart shows the range of surface finishes achievable when using grinding wheels of different grit sizes on conventional precision grinding applications, together with the minimum form radius that can be ground using each grit size.

Other factors can affect the surface finish achieved. In particular:

- Production grinding applications, with higher stock removal ranges, will give surface finishes at the coarser end of the range
- Plunge grinding applications will often require the selection of a grit size one size finer than shown
- Dressing techniques & the type of material can also affect the surface finish achieved

### ACHIEVING IMPROVED SURFACE FINISHES

By changing the wheel dressing technique, it is possible to achieve finer surface finishes than those shown. As well as reducing the dresser infeed per revolution of the grinding wheel, it is also possible to reduce the infeed and traverse rate when grinding, thus reducing the stock removal rate. Obviously this approach will have limited application in production grinding but it can be very useful in tool room work.

## THE GRINDING MACHINE

The type of machine can effectively define the grinding contact area and the ease with which grinding fluid can be applied to the grinding zone.

The power available on the machine governs the stock removal rate. The greater the power available, the harder the grade of wheel that is required for efficient operation.

Any deterioration in the condition of machine bearings and slideways will lead to vibration and, consequently, premature wheel breakdown. This can, in part, be overcome by using a harder grade wheel and/or a tougher abrasive but the only effective solution is to maintain the machine as recommended by the machine manufacturer.

## SPEEDS & FEEDS

The effect of speeds and feeds on grinding action and, hence, the selection of wheel, can best be summarised in the following table:

### EFFECT ON GRINDING ACTION

SPEED	INCREASED	DECREASED
Wheel speed*	Harder	Softer
Work speed	Softer	Harder
Traverse speed	Softer	Harder
Infeed rate	Softer	Harder

\*The maximum peripheral speed (m/s) specified for the wheel must never be exceeded

## GRINDING CONTACT AREA

The contact area affects the selection of wheel grade and structure. Large contact areas, as on segmental grinders, generally produce low grinding pressures and require soft grade, open structure wheels. Induced porosity wheels are most efficient for grinding very large contact areas. Conversely, small contact areas, as on cylindrical grinding machines, require harder grade and/or closer structure wheels.

The size of workpiece can also affect the grinding contact area. In general, the larger the workpiece, relative to the grinding wheel diameter, the larger the contact area, requiring softer grade wheels.

## GRINDING FLUID

Dry grinding with vitrified wheels require wheels one or two grades softer than when wet grinding.

## SEVERITY OF THE GRINDING OPERATION

This can affect the choice of abrasive type, grade and even bond type. Where the wheel is subjected to shock loads, as in fettling operations, a resinoid bond should be used. In general, the more severe the grinding operation, the harder the grade of wheel required and the tougher the abrasive that can be used. Severity of grinding operation can be due to heavy infeeds, high work speeds and traverse rates or intermittent grinding contact. The latter is usually due to workpiece geometry, resulting in a dressing action on the wheel.

## GRINDING WHEEL DRESSING & TRUING

Truing and dressing of grinding wheels are often considered to be the same thing, since they are frequently performed as one operation. Truing is performed to ensure concentricity and introduce any profile that may be required on the wheel face. Dressing conditions the wheel surface to give the desired cutting action.

## SINGLE & MULTI-POINT DIAMONDS

Diamonds are the first choice where close tolerances, fine finishes, speed and flexibility are required. Since diamond dressing is primarily a machining operation rather than a crushing operation, the surface formed on the wheel is closer than that obtained from mechanical dressers. This results in a slower cutting wheel with better form holding characteristics and superior finish control.

By varying the depth of cut per pass made by the diamond and changing the traverse rate, different wheel surfaces, and hence different cutting actions, can be achieved.

The following are general recommendations for dressing with single-point diamonds.

	ROUGHING	FINISHING
Diamond infeed mm per pass	0,025mm	0,012-0,020mm
Diamond traverse rate mm/wheel rev.	0,18mm	0,10mm

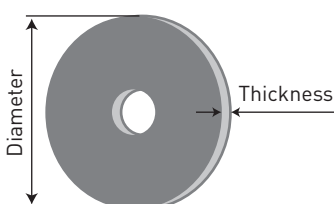

The diamond should always be applied at the centreline of the wheel with a 5°-15° drag angle.

## DIAMOND SIZE

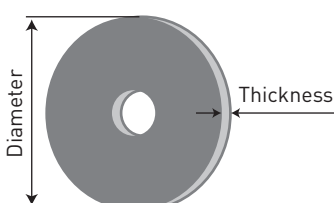

The size of diamond is important when selecting a dressing tool and several factors are relevant in this selection, e.g. large, coarse grit wheels require a larger diamond than smaller, fine grit wheels. If a fine finish is required, the use of a diamond which is too large can adversely affect the finish and cancel the effect of fine grit selection. The trend today is away from single-point dressers and towards multi-point dressers employing a matrix shape to suit the form required.

A useful formula for determining single-point & multi-point diamond size is:

Wheel diameter (mm) x Wheel thickness (mm)

SINGLE-POINT	MULTIPLY THE DIAMETER OF THE WHEEL BY ITS THICKNESS	
	Diameter x Thickness (mm)	Carat
	<6000	0,33 Carat
	6000-18000	0,50 Carat
	>18000	1,0 Carat

For best results, always use a coolant when dressing

MULTI-POINT	MULTIPLY THE DIAMETER OF THE WHEEL BY ITS THICKNESS	
	Diameter x Thickness (mm)	Carat
	<30000	1,3 Carat
	30000-60000	2,5 Carat
	>60000	5,0 Carat

For best results, always use a coolant when dressing

## COOLANT

Dressing with diamonds should always be carried out using a copious supply of coolant. The coolant should always be turned on fully before the diamond touches the wheel. The diamond life will deteriorate rapidly if it is allowed to become hot and then cooled rapidly as can be experienced with an intermittent coolant flow.

## ROTATION OF THE DRESSING TOOL

To ensure maximum diamond life, single-point and conical cluster diamond dressing tools should be systematically rotated after every four or five dressings to ensure that the keen edge generated from the drag angle is constantly presented to the wheel.

## REDUCTION RINGS

Plastic reduction rings may be used to adapt grinding wheels to fit on various spindle sizes. These rings reduce the bore hole size, allowing the wheel to be safely mounted on a spindle with a smaller diameter.

- Reduction rings should never come in contact with the flange
- Reduction rings should not be used on wheels of thicknesses less than 6mm, nor greater than 50mm
- Always use one reduction ring on each side of the wheel when the wheel is thick enough to allow correct seating
- Never use reduction rings to reduce the hole below the minimum specified in the FEPA safety code

WHEEL BORE (mm)	REDUCED TO (mm)	REDUCTION RING
50,8	35	07660704766
32	25	07660717540
32	20	07660717538
31,75	15,88	07660704757
31,75	12,7	07660704755
20	16	07660717530
20	15	07660717529
20	13	07660717527
20	12	07660717525
20	10	07660717524
16	6	00510008919

## MOUNTING

A wheel should only be mounted onto the machine for which it was intended. The speed of the spindle on which the wheel is mounted should not under any circumstances exceed the maximum RPM speed specified for the wheel when it is full size. The wheel should fit freely, but not loosely, onto the spindle or spigot diameter of the flange plates. Wheels, blotting paper washers and flanges should be free from foreign matter. Certain wheels have a positioning mark (Mount Down or Mount Up) marked on them. Care must be taken to ensure that this mark occupies the position stated by the manufacturer.

### REDUCING BUSHES

Where a removable bush is used as a means of reducing the bore of an abrasive wheel, care must be taken to ensure the bushes should not project beyond the side of the wheel and the wheel blotter. The clamping faces of the flange plates **MUST** clamp on the mounting washers attached to the wheel and not on any part of the reducing bush. Reducing bushes should never be used on wheels less than 6mm thick or on products with a back or web of less than 6mm. Never use plastic bushes on wheels used with portable grinding equipment.

### MOUNTING WASHERS

Blotters should be used with all grinding wheels unless there is a specific exemption. Blotters should be slightly larger in diameter than the mounting flanges and free from any scuffs, wrinkles or other damage.

### MOUNTING FLANGES

Mounting flanges are designed to clamp the wheel to the machine and transfer the driving forces from the machine spindle to the grinding wheel. They should be designed to take the driving forces away from the area around the grinding wheel bore and generally should be not less than one third of the grinding wheel diameter.

Flange surfaces should be flat, free from burrs, bumps, bruises and other damage. Flanges should be of equal diameter, have equal bearing surfaces and be properly recessed or undercut.

The rear flange must be positively driven by the machine spindle, being either keyed or shrunk onto the spindle.

Flanges must run true to the machine spindle.

Clamping nuts (centre nut locking) should only be tightened sufficiently to hold the wheel securely without slippage and must not be over-tightened. When flanges are clamped by a series of screws, they should be tightened in stages uniformly in a diametric sequence.

In most instances it is appropriate to tighten the nut or screws by hand with the correct tool (spanner or hexagonal socket key) until they stop turning. By adopting this technique it is very rare that the wheel would be under-tightened and impossible to over-tighten the wheel. Bolts for mounting wheels with inserted nuts should be long enough to engage an adequate length of thread, i.e. equal to the thread diameter, but must not protrude through the nut insert.

For recommended designs of flanges, refer to the FEPA Safety Guidelines.

### CAUTION

After mounting or re-mounting a grinding wheel on a machine, stand well clear, ensuring that there are no persons in line with the wheel and allow the wheel to run free for two minutes. A re-mounted wheel should always be treated as if it were a new wheel.

### TYPE 06 CUP WHEELS – FIXED MACHINES

The diameter of the flange and paper washer inside the cup must be smaller than the diameter of the cup recess to avoid any risk of radial pressure on the wheel. When used for work heavier than light tool and cutter grinding, the back flange may be larger than that inside the cup but the recess diameter of both flanges must be equal.

### MOUNTED POINTS & WHEELS

The spindle dimensions of the mounted point must be suitable for the collet being used, and the spindle overhang corresponding to the machine speed should be observed.

### TYPE 31 GRINDING SEGMENTS

Segments are held by special chucks with suitable provision for adjustment to compensate for segment wear. To prevent breakages segments should not protrude more than 1,5 times their thickness from the clamping chuck face, and should be mounted with markings uppermost.

## WHEEL BALANCE

Most Norton grinding wheels are balance corrected to a minimum of ISO Standards. Precision grinding machines usually provide methods of accurately balancing the complete wheel and flange assembly. Modern production machines are now supplied with automatic balancing systems, whereas, tool room and older production machines still have to be manually balanced, ensuring the best possible grinding performance from the wheel.

The balancing procedure can be carried out either on a special balancing stand or in-situ on the machine. The machine manufacturer's instructions should be closely followed. There are many methods of manually balancing the wheel assembly, depending upon the number of balance weights in the wheel arbour. A typical 'two weight' balancing system technique is described below:

## TWO WEIGHT SYSTEMS

- Mount wheel between flange plates
- Remove balance weights from annular groove on mounting flange (can also be set diametrically opposite if preferred – ensuring the weights cancel each other out)
- Dress periphery of wheel until running in perfect truth
- Remove complete wheel assembly from the machine (after allowing sufficient time for the coolant to spin out) & fix assembly onto the balancing mandrel
- Place on balancing unit & allow to turn freely. When stationary, mark top centre (light spot) with chalk
- Re-position the balance weights so that the bottom side face of each weight, that is furthest from the light spot, forms a right angle i.e. 90°. See illustration 1A
- Turn wheel assembly so that one balance weight is approximately 45 degrees from the horizontal line & release the wheel. Note the direction in which wheel rotates, the weight may revolve upwards towards the vertical line. In this instance the weight should be moved down away from the light spot (always adjust the weights in the opposite direction of rotation) to begin bringing the wheel into balance. See illustration 1B
- Continue checking the weights, alternating between the left & right hand balance weights in turn. Repeat until the wheel remains stationary in all positions. Move the weights a maximum of 3mm at a time, reducing this amount as the wheel rotates slower. See illustration 1C
- Continue until assembly remains static in all positions. Lock balancing weights in position & remount assembly onto the machine spindle
- Important: – Ensure the balancing ways (knife edges or rollers) on the balancing stand are level in all directions. Care must be taken to initially find the true light spot of the wheel

## TROUBLESHOOTING

### SOLVING SURFACE FINISH PROBLEMS

Many problems associated with grinding relate to surface finish defects. The following chart describes some common surface finish problems, shows the probable causes and suggests remedies to cure the problem.

#### REGULAR SPACED CHATTER MARKS

Immediately after dressing

Cause	Machine vibration
Solution	Check for wear in machine bearings

#### REGULAR SPACED CHATTER MARKS

After a period of time

Cause	Wheel too hard
Solution	Use softer grade of wheel

#### CHEQUERED PATTERN

Cause	Wheel out of balance
Solution	Balance wheel

#### CHATTER MARKS

Cause	Wheel out of truth
Solution	Re-dress wheel

#### IRREGULAR CHATTER MARKS

Cause	Wheel mounting insecure
Solution	Tighten wheel mounting
Cause	Workpiece centres loose
Solution	Adjust centres

#### SPIRAL MARKS

Cause	Dressing techniques
Solution	Check diamond is sharp & secure
Cause	Dressing techniques
Solution	Check dress is parallel

#### FINISH TOO COARSE

Cause	Grit size too coarse
Solution	Use fine, slow traverse dress
Cause	Wheel too soft
Solution	Decrease workspeed. Use harder grade wheel
Cause	Metal pick-up on wheel
Solution	Dress more frequently. Use more open, softer grade wheel

## SAFETY ADVICE

### SAFETY IN THE STORAGE & USE OF GRINDING WHEELS

Stringent safety standards are maintained throughout the manufacture of Norton Grinding Wheels. To reduce the risk of accidents further, the law requires that certain basic precautions are taken in the storage and use of abrasive wheels.

#### RECEIPT

On receipt, grinding wheels should be thoroughly examined to see if they show any signs of damage, such as chips, cracks or discolouration. Damaged wheels must not be used.

#### HANDLING

Any mishandling that results in the wheel being subjected to any shock loading can damage all grinding wheels. This can occur if the wheel is inadvertently dropped, knocked over or banged against any other object. This is equally true if the wheel is secured on a pallet, which has been dropped heavily from a forklift truck.

Any grinding wheel subjected to such mishandling should be carefully examined for signs of damage. If in any doubt – do not use.

#### STORAGE

Small wheels up to 80mm diameter, together with cones, plugs, mounted points and wheels may be stored in suitable bins, drawers or boxes. Type 02 cylinder wheels, type 06 straight cup wheels, type 12 dish wheels and type 13 saucer wheels should normally be stacked on flat sides with cushioning material between them. Thick rim and hard grade cylinder and straight cup wheels may be stored on their periphery as for plain wheels. Soft grade, straight cup wheels, and all type 11 taper cup wheels, should be stored base to base and rim to rim, to prevent chipping of edges and cracking of walls. Thin plain wheels, such as cutting-off wheels or saw sharpening wheels should be stacked on a flat surface of steel, or similar rigid material. Other plain or shaped wheels of appreciable thickness, are best supported on their periphery in racks. The racks should provide cushioned, two point, cradle support to prevent the wheels from rolling.

#### STORAGE CONDITIONS

During storage, grinding wheels must not be subjected to:

- Exposure to humidity, water or other liquids
- Freezing temperatures
- Any temperature low enough to cause the formation of condensation on the wheels when moving from storage to an area of high temperature

#### SHELF LIFE OF RESINOID

##### & VITRIFIED BONDED WHEELS

The outer surfaces of certain organically bonded wheels may be affected by oxidation if they are stored for long periods. These types of wheel should not be stored for more than three years and proper stock control should ensure that older wheels are used first. In use, a three year old Resinoid product will act considerably softer than a brand new wheel (wheel will wear away more quickly).

The glass bonding system used in vitrified wheels is very inert and generally only attacked by certain acids. Cold temperatures can result in a vitrified wheel cracking if wheels are put away wet and are subjected to freezing temperatures. It must be remembered that the longer a product is in storage the chances of it becoming damaged increases. Provided vitrified wheels are stored correctly, thoroughly examined and mounted correctly they will last for many years.

#### RING TEST

The ring test depends upon the damping characteristics of a cracked wheel to alter the sound emitted when it is lightly tapped. The test is applicable only to vitrified bonded wheels.

To perform the ring test; support the wheel gently with a finger through the bore section. Using a light non-metallic implement (a file handle is ideal), gently tap the wheel about 45° each side of the vertical centre line. Rotate the wheel 45° and repeat the test.

The sound and undamaged wheel will omit a clear tone. If cracked, there will be a dead dull sound – not a clear ring – and the wheel should NOT be used. The ring test should be carried out in a place where the ring can easily be heard.

## SAFE WORKING PRACTICES

### PERSONAL PROTECTION

Safety goggles, ear defenders, safety gloves, dust masks and, if conditions are severe, additional face protection. Leather aprons and safety shoes must be worn.

### TRAINING OF OPERATORS

Grinding operators should be trained in the safe use of each machine they operate.

### SPEEDS

No abrasive wheel should be operated at a speed in excess of the maximum permissible speed marked on the wheel in RPM when the wheel is new and full size. It is permissible, however, to increase the spindle speed of the machine beyond the RPM stated on the wheel provided the increase is in proportion to the reduction in diameter and that the original peripheral speed is not exceeded (quoted on the wheel in metres/sec). In high production areas it is now normal for machines to have constant peripheral speed spindles. This is an electronic device that automatically increases the spindle speed of the machine as the wheel diameter wears down and prevents most of the reduction in wheel performance that is experienced when the wheel becomes smaller.

### COOLANTS

The strength of resin bonded grinding wheels can be reduced by coolants. The concentration and alkalinity of coolants should be regularly checked and a pH value of 8 should not be exceeded. Prolonged immersion of a stationary wheel in coolant can produce an out of balance condition. Coolant should be shut off before stopping a wet grinding wheel, and the wheel allowed to run free until all the coolant has been spun out.

### WORK RESTS

Work rests should be kept adjusted as close as possible (gap between wheel and work rest should not exceed 3mm) to the wheel and maintained in good condition.

### TRUING & DRESSING

Re-dressing of wheels that have become malformed and out of truth in off-hand operations must only be performed by a competent person.

If an out of balance condition, due to the wheel wearing excessively out-of-round, cannot be

corrected by truing, the wheel should be removed from the machine. Wheels should be dressed regularly to avoid loading

### SIDE GRINDING

Side grinding should only be performed with wheels designed for this purpose (straight cups etc.).

Grinding on the flat sides of wheels designed for peripheral grinding may be dangerous and cause a wheel breakage. This does not preclude their use for certain precision applications such as shoulder and form grinding, where it is recognised that a limited amount of side grinding is performed; however, in these operations the operator has control of the pressure through the hand wheels of the machine whereas with bench grinding and off-hand machines the pressure is uncontrolled. Extreme caution should be exercised not to use excessive pressure.

As a general guide, do not use a straight wheel which has a thickness of less than 10% of the wheel diameter for side grinding.

### ORGANIC CUTTING-OFF WHEELS

'Non-reinforced' cutting-off wheels should never be used:

- On a portable grinding machine
- On any machine where the workpiece is fed into the wheel by hand

Cutting-off wheels should only be mounted on machines designed for their use.

Cutting-off wheels should be inspected for warping before use. Warped wheels should not be used.

When grinding, twisting or the exertion of any pressure on the side of the wheel should be avoided.

Workpieces should be rigidly supported and firmly clamped wherever possible.

### STOPPING WHEELS

Wheels should not be brought to rest by applying pressure to the periphery or face of the wheel.

# SUPER ABRASIVES

	*3/6*	4000						
M4	*2/4*	5000						
M1	*0/2*	15000						

## CONCENTRATION

The concentration is defined by a standard and indicates the weight of abrasive (in carats) contained in 1cm<sup>3</sup> of abrasive strip – 1 carat = 0,2 grams.

CONCENTRATION*			NUMBER OF CARATS/cm <sup>3</sup>	ABRASIVE WEIGHT PER cm <sup>3</sup>
DIAMOND ABRASIVE	=	CBN ABRASIVE*		
100	=	W	4,4	= 0,88g/cm <sup>3</sup>
75	=	T	3,3	= 0,66g/cm <sup>3</sup>
50	=	Q	2,2	= 0,44g/cm <sup>3</sup>

\* Other concentrations available upon request

## SELECTION OF CONCENTRATION

The choice of concentration depends on the machining parameters:

HIGH CONCENTRATION			MEDIUM OR LOW CONCENTRATION	
Roughing operations			Finishing operation	
Powerful machine			Low power machine	
Small contact area			Large contact area	
Retention of profile or sharp edges of wheel			Cutting without temperature rise	
OPERATION	INTERNAL GRINDING	EXTERNAL GRINDING	SURFACE GRINDING	SHARPENING
Diamond	100	75	50	50/75
CBN	W	T	Q	Q/T

## COOLANT

Generally speaking, working with coolant is preferable to working without coolant because the coolant reduces friction and dissipates heat generated by machining.

However, many sharpening operations are performed without coolant under good conditions and with appropriate bonds.

Choice of coolant:

- DIAMOND wheel = pure water + 1,5% rust inhibitor or soluble oil
- CBN wheels = pure oil or water, always with 5 to 10% soluble oil
- For CBN wheels, changing from soluble oil to pure oil increases the service life of the wheel

## MOUNTING, TRUING & DRESSING

To achieve the best results using Norton Diamond and CBN products, the following steps for mounting, truing and dressing should be practised:

### MOUNTING – PUTTING WHEEL ON MACHINE SPINDLE

- Examine wheel flanges & spindle carefully
- Be sure flanges' surfaces are clean & free of damage
- Ensure that the mounting flanges are flat & of equal diameter, especially on wheels with rigid centres, such as vitrified bond wheels
- Inspect machine spindle for excessive runout – TIR (Total Indicated Runout) should be no greater than 5 microns

- Mount wheel between hand-tightened flanges
- Using a dial indicator, tap the wheel lightly with a rubber or wooden block to minimize runout to less than 25 microns
- Tighten flange securely & recheck with indicator
- Allow a newly mounted wheel to operate for one full minute before grinding
- The use of one permanent mounting for the life of the wheel is recommended whenever possible:
  - If the grinding machine has a tapered spindle, mount each straight, flaring cup or dish wheel on a separate collet or adapter
  - When changing wheels the entire unit is removed, keeping the wheel in running truth
  - When needed again, the entire unit can be placed directly on the spindle or arbor, thereby eliminating the time & abrasive lost in retrueing

## TRUING – MAKING WHEEL ROUND & CONCENTRIC WITH THE SPINDLE AXIS

- Prior to truing the wheel, run a wax crayon over the wheel face. Important: do not use any liquid based ink on super abrasive wheels
- Any crayon left on the wheel face after truing will reveal untrued areas
- Norton Brake Controlled Truing Devices are most commonly used to true Diamond & CBN straight, cup & cylinder wheels
  - Always use Brake Controlled Truing Device dry
  - Bring the Diamond/CBN wheel & the truing wheel together until they almost touch
  - Start the Diamond/CBN wheel to normal speed; start the truing wheel in the same direction
  - Bring the two wheels together until they touch
  - Make sure the truing wheel is spinning at time of contact
  - Traverse the wheel back & forth at 10-20mm/s
  - Downfeed 0,01-0,02mm at the end of each traverse
  - At the end of truing, the Diamond/CBN wheel should be smooth & in truth

## DRESSING - OPENING THE FACE OF A TRUED WHEEL

The core material (the part of the wheel that holds and supports the abrasive-bearing section) should never contact the workpiece during grinding; rubbing will generate excessive heat. As the abrasive section of a cup wheel wears, the core material may become exposed - necessitating dressing.

- Use a single-point carbide or steel tool to dress an exposed resaloy core
- Clamp the tool in a vice
- Direct the cutting edge accurately to leave a 1,5mm of abrasive section exposed

## DRESSING THE ABRASIVE TO EXPOSE THE GRITS

**Purpose:** to expose the grinding stone face to give a better cut

After each truing operation, dressing is necessary to give a more precise cut to the wheel. This operation consists of highlighting the grits by eliminating part of the bond and is generally carried out using vitrified bonded abrasive sticks.

Selection of the stick specification depends mainly on the nature of the bond of the super abrasive grinding stone and its grit size.

### STICKS RECOMMENDED

BOND	GRIT SIZE	TRUING STICKS
Resin	126 & bigger	38A 150 HVBE
	107 - grit - 64	38A 220 HVBE
	54 & finer	38A 320 HVBE

## TROUBLESHOOTING

### USE RIGID WORK SUPPORT

- All workpieces should be supported firmly during the grinding process. Any amount of vibration will cause wheel wear & produce chatter or wave marks on the ground surface
- On work ground between centres, centreholds should be properly prepared
- Minimise work overhang
- If the ground work is supported by a work finger, ensure the finger is strong enough to provide vibration-free support

### AVOID EXCESSIVE FEEDS

- Excessive feeds will result in premature wheel wear. Excessive feed rates are characterised by:
  - A hard grinding sound
  - Chatter
  - Burn
  - High wheel wear rate
  - Vibration

## DRY GRINDING

### BURNING (EXCESSIVE HEAT)

Cause	Wheel loaded or glazed
Solution	Dress wheel with a dressing stick
Cause	Excessive feed rate
Solution	Reduce infeed of wheel or workpiece
Cause	Wheel too durable
Solution	Use freer cutting specification or slow down wheel speed
Cause	Wheel speed too high
Solution	Slower wheel speed

### POOR FINISH

Cause	Grit size too coarse
Solution	Select a finer grit size
Cause	Excessive feed rate
Solution	Reduce infeed of wheel or workpiece

### CHATTER

Cause	Wheel out of truth
Solution	True wheel; ensure it is not slipping on mount
Cause	Wheel too hard
Solution	Check specification

## WET GRINDING

### BURNING (EXCESSIVE HEAT)

Cause	Wheel glazed or loaded
Solution	Re-dress wheel
Cause	Poor coolant placement
Solution	Apply coolant directly to wheel/workpiece interface
Cause	Excessive material removal rate
Solution	Reduce downfeed &/or crossfeed
Cause	Wheel speed too high
Solution	Slower wheel speed

### POOR FINISH

Cause	Excessive dressing
Solution	Use lighter dressing pressure Stop dressing as soon as wheel starts to consume stick rapidly
Cause	Grit size too coarse
Solution	Select a finer grit size
Cause	Poor coolant flow or location
Solution	Apply heavy flood so it reaches wheel/work interface

### CHATTER

Cause	Wheel out of truth
Solution	True wheel; ensure it is not slipping on mount
Cause	Wheel too hard
Solution	Check specification

### WHEEL WILL NOT CUT

Cause	Glazed by truing
Solution	Dress lightly until wheel opens up
Cause	Wheel loaded
Solution	Dress lightly until wheel opens up Increase coolant flow to keep wheel surface clean Never run wheel with coolant turned off
Cause	Grit size too fine
Solution	Check specification

### SLOW CUTTING

Cause	Low feeds & speeds
Solution	Increase feed rate; increase wheel speed (observe maximum wheel speed)

### SHORT WHEEL LIFE

Cause	Incorrect coolant flow
Solution	Apply coolant to flood wheel/work surface
Cause	Low wheel speed
Solution	Increase wheel speed (observe maximum operating speed)
Cause	Excessive dressing
Solution	Use lighter dressing pressure
Cause	Wheel too soft or too hard
Solution	Change grit or grade; use higher concentration

# DIAMOND BLADES

## TECHNICAL INFORMATION

### OPERATING SPEEDS

MAXIMUM OPERATING SPEED		
DIAMETER (mm)	MAX M/S	MAX RPM
100	80	15300
115	80	13300
125	80	12250
150	80	10200
180	80	8500
200	80	7650
230	80	6650
250	80	6100
300	100	6400
350	100	5500
400	100	4800
450	63	2700

Never exceed the Maximum Operating Speeds:

- Hand held blades  $\varnothing \leq 230\text{mm}$ : 80m/s
- Hand held blades  $\varnothing > 230\text{mm}$ : 100m/s
- Others: 63m/s

### PERSONAL PROTECTION

Safety goggles, ear defenders, safety gloves, dust masks and, if conditions are severe, additional face protection. Leather aprons and safety shoes must be worn.

							
Mouth Protection	Wear Gloves	Eye Protection	Ear Protection	Read Instructions	Not for Side Grinding	Dry Cutting	Wet Cutting

## TROUBLESHOOTING

### DIAMOND BLADE DOES NOT CUT

Cause	The segments are too hard for the material
Solution	Check if the blade is suitable for the material
Cause	The segments have become blunt
Solution	Sharpen the segments by cutting an abrasive material (e.g. sandstone)
Cause	Insufficient machine power
Solution	Check the voltage, machine power & filters

### EXCESSIVE WEAR

Cause	The segment is too soft for the material (e.g. if a blade for hard material is used to cut abrasive material)
Solution	Check if the diamond blade is suitable for the material

### CRACKING OF STEEL CENTRE

Cause	The segments are too hard for the material
Solution	Check if the blade is suitable for the material
Cause	Excessive cutting pressure, overheating, material slippage, twisting or jamming in the cut
Solution	Leave the blade to do the work, do not exert too much pressure & allow the blade to cool regularly by leaving it to rotate away from the workpiece for a few seconds

### LOOSENING OR CRACKING OF SEGMENTS

Cause	The segments are too hard for the material. This results in the diamond blade bouncing in the cut resulting in cracking segments
Solution	Check if the diamond blade is suitable for the material

### SCORCHING OF SEGMENTS

Cause	Excessive cutting pressure causing overheating. This is easily recognisable from the blue colouring where the segments & the steel core are welded together
Solution	Allow the diamond blade to cool regularly by rotating the blade away from the workpiece for a few seconds
Cause	The segments are too hard for the material
Solution	Check if the diamond blade is suitable for the material. Alternatively use less cutting pressure & let the blade do the work

### UNDERCUTTING

Cause	Undercutting occurs when the steel core wears faster than the segment, i.e. where the segment & steel core meet. This is usually caused by materials that are highly abrasive. The cutting debris is not removed sufficiently & the steel core is affected. Undercutting is certain to occur if a diamond blade for hard materials is used to cut abrasive materials
Solution	Use a diamond blade suitable for the specific material

## SAFETY ADVICE

### SAFETY D0s

For your safety you should ensure that you are fully aware of how to safely use diamond blades

✓	D0	Read the safety instructions provided by the abrasives & equipment supplier
✓	D0	Store abrasives in dry, frost-free conditions avoiding wide variations in temperature
✓	D0	Ensure that the product is suitable for its purpose
✓	D0	Handle, store & transport products with care
✓	D0	Disconnect the power to the machine before fitting the product
✓	D0	Examine all products before mounting & periodically during blade use for possible defects or damage (core flatness, fatigue cracks, undercutting, arbor hole damage...)
✓	D0	Check that correct mounting devices are used & that they are clean, undistorted and free from burrs
✓	D0	Ensure that work rests are properly adjusted & secure
✓	D0	Always use a correctly designed & adjusted guard (on the blade and belts)
✓	D0	Ensure that the workpiece is secure
✓	D0	Wear appropriate personal protective equipment at all times
✓	D0	Avoid clogging & uneven wear to ensure that the product is working efficiently
✓	D0	Ensure accordance between product direction arrow / machine rotation
✓	D0	Ensure that all machines using abrasives meet the requirements of the current European machinery directives-CE
✓	D0	<p>Be aware of the hazards likely during the use of abrasives &amp; observe the recommended precautions to be taken:</p> <ul style="list-style-type: none"> <li>• Bodily contact with the abrasive product at operating speed</li> <li>• Injury resulting from product breakage during use</li> <li>• Grinding debris, sparks, fumes &amp; dust generated by the grinding process</li> <li>• Noise</li> <li>• Vibration</li> </ul>

## SAFETY DON'Ts

For your safety you should ensure that you are fully aware of how to safely use diamond blades

<b>X</b>	DON'T	Allow untrained people to use abrasives
<b>X</b>	DON'T	Use a product that is damaged or one which has been dropped
<b>X</b>	DON'T	Use a product if it cannot be properly identified
<b>X</b>	DON'T	Use a machine that is not in good working order or one with defective parts
<b>X</b>	DON'T	Force the abrasive onto the mounting device or modify the size of the mounting hole
<b>X</b>	DON'T	Exceed the maximum operating speed marked on the product
<b>X</b>	DON'T	Apply shock or excessive force to the product or let it overheat
<b>X</b>	DON'T	Use mounting flanges which are not clean & flat
<b>X</b>	DON'T	Tighten the mounting device excessively
<b>X</b>	DON'T	Start the machine until the guard is in place & fastened securely
<b>X</b>	DON'T	Continue to use a product if vibration occurs. True or replace it
<b>X</b>	DON'T	Grind on the part of the product which is not designed for the operation
<b>X</b>	DON'T	Start the machine with the workpiece in contact with the abrasive product
<b>X</b>	DON'T	Grind material for which the product is not designed
<b>X</b>	DON'T	Stop the abrasive by applying pressure to its surface, let it stop naturally
<b>X</b>	DON'T	Exceed permissible rotation speeds: refer to values engraved on product
<b>X</b>	DON'T	Use blades with missing segments or core cracks
<b>X</b>	DON'T	Use dry products marked for wet use
<b>X</b>	DON'T	Wear loose clothing, ties & jewellery

Reshaping  
your  
world.
